IF Brooklyn is to obtain a new Borough Hall, why should one be denied to Manhattan? The practical need on this side of the river is quite as great; and the matter has been even longer under discussion. It is very much to be hoped that the mayor, when he begins his new term of four years will take up projects of this kind with more vigor. During his first term, he has not shown himself very much interested in pushing any of the many plans for municipal improvement, which have been seriously proposed, and which will satisfy incontestable practical needs. The longer the erection of a municipal office building in Manhattan is postponed, the more expensive the land which is needed will have become; and the city cannot continue indefinitely to house its various departments in rented offices without suffering both in pocket and dignity. During the coming winter arrangements should be made to build both a new Court House and a new municipal office building, and even then judging by the Hall of Records, it will be ten years before they are finished and occupied.

## The Real Estate Situation—Conditions and Prospects.

AS the weeks go by it becomes apparent that the demand for real estate at the present time possesses some very remarkable and encouraging characteristics. It is not too much to say that this demand has, on the whole, a broader basis and a sounder sanction than at any previous time during the past five years. This new phase differs from the other phases, which the real estate market has passed through during this period, because the activity on which it is based is more general, and more wholesome. In every previous year since 1901 the activity while extraordinary, was concentrated on special sections or particular kinds of improvement. But the existing market has no such limitation. All kinds of real estate in all parts of the city are in excellent demand. There is no great pressure of speculative buying in any one section, unless it be the section affected by the Pennsylvania terminal; but almost everywhere in Manhattan, and in all the accessible positions of the Bronx and Brooklyn, a great deal of real estate is being sold at good prices, which is just the condition which benefits the largest possible number of people.

This condition is all the more remarkable, because it is the sequence of a prolonged period of speculative exploitation. One part of the city after another has, as we have said, been taken up by the operators during the past few years, and considerable advances established in the level of prices prevailing at that time. During 1901, 1902 and the first part of 1903, for instance, values were largely increased in the financial district, in the vicinities of Long Acre and Greeley Squares, along the line of 5th av, and in the residence section east and southeast of Central Park. It was freely predicted at the time that this speculation was being carried altogether too far and that a recession in values would certainly follow; but such did not prove to be the case. In the summer and fall of 1903 the speculation itself did indeed cease, except in the business part of 5th av; but prices did not weaken, and in the meantime a speculative movement was being developed in a wholly different direction. It was suddenly discovered that owing to a number of different causes, there was a scarcity of living accommodation in Manhattan, and that an opportunity was offered for the speculative exploitation both of old-law tenements, and of vacant land, on which new-law tenements could be constructed. During 1904 and the first half of 1905 speculative interest was fastened on these classes of real estate, and many advances in values were brought about. In respect to these advances, also, lugubrious

predictions have been made; but there is no reason to suppose that they have been carried further than is safe, and in this case the proof of the pudding is in the eating, because as a matter of fact the renovated tenements and the vacant lots are being bought by investors and builders. Hence it looks as if these various speculative improvements have all been successful—that prices have not been advanced higher than was warranted by the earning power of the various classes of property under the new conditions. The existing well-distributed and wholesome activity is taking place on the basis of the values, which the speculators have established.

Neither do we believe that at least so far as Manhattan real estate is concerned, there is any cause for apprehensions about the near future. It is true that at the present time residential accommodation is being provided more liberally than is justified by the increase in population; and it can hardly be expected that renting conditions will continue to be as wholly favorable for the landlord as they have been recently. But neither will they return to the conditions which prevailed during 1900. On both the East and the West Sides there is more neighborhood feeling than there used to be. Large numbers of people have become accustomed to live in these neighborhoods; and the amount of vacant land thereabouts which remains to be improved is so small that there cannot be any radical alteration between supply and demands. In districts such as the East Side and Harlem, in which they are beginning to demolish private dwellings in order to substitute tenements and flats, there need not be any fear of the free-rent evil; and it will not be long before on the West Side, also, they will begin to substitute apartment houses for residences. In these older neighborhoods, which are well provided with means of communication, certain stable conditions have assuredly been established. Of course, this condition does not apply to Washington Heights and Inwood. It is improbable that these neighborhoods will be improved and settled without certain periods, in which the owners of the new buildings will be obliged to make unpleasant concessions in order to attract tenants. At the present time builders are disappointed, because the new buildings do not rent more quickly and there will be the usual difficulties in inducing people to settle in a new and unfamiliar locality—particularly as nothing is being done, as was done twenty years ago on the West Side, to make the locality attractive. Yet even on Washington Heights things cannot go far wrong. Within a few years it will be getting almost all the increase of population of Manhattan; and it will fill up twice as quickly as the West Side did. Behind the whole existing real estate situation in this city is the fact that Manhattan is a very small island, considering the demands which are made upon its space, and that in the long run an investment in Manhattan real estate can hardly go wrong.

## Building Interests Congratulated.

ON THE SUCCESS OF THE MOVEMENT FOR RELIEF FROM COMPULSION IN USE OF FIREPROOF WOOD.

**By PAUL STARRETT.**

(President of the George A. Fuller Company.)

The building interests of New York City are to be congratulated on the outcome of the movement to obtain relief from the oppression of the Fireproof Wood Clause in the Building Code. An architect may now specify and a builder agree to produce a beautiful piece of finished woodwork without fear of having it ruined by being required to saturate the material with a chemical injurious to the wood itself, to the nails and screws holding it together, and to the varnishes upon which depend the beauty of the finished job.

The remarkable thing about the whole fireproof-wood matter is that it has been allowed to remain a requirement of the Code for so long. Its influence on building has been much more detrimental than would appear to the casual observer. Many buildings which would have been built several stories higher were kept below the 150-ft. limit for no other reason than that buildings under that height did not come under this obnoxious requirement. Hundreds of thousands of dollars have been "burned up" in the work done under this law, for not only does the money paid to the wood fireproofing cconcerns have to be reckoned, but also the extra cost of working the wood saturated with the chemicals of the process, and the finishing, to say nothing of the expense of going over the work after completion, in the vain effort to keep it in presentable shape.

The life of the law requiring this process in the buildings of New York has been more remarkable when the influences for and against it are considered. On the one side we have three companies organized by men having absolutely no knowledge of the building business nor its requirements, whose interests (naturally) were wholly their own pockets. Not so on the other hand. The Architects who unanimously condemn it, lose a commission on the cost of the process. The Builders, more notably in commission work, are similarly affected.

A point worth considering in this connection is this: Is there any reason for developing further the fireproof qualities of the modern office building constructed on up-to-date principles? I believe such structures are for their purpose perfectly fireproof. I have known of fully a dozen instances in my personal experience where fires have occurred in fireproof buildings, none of which did more than the most trivial damage, and were all extinguished with the regular fire apparatus with which every fireproof building is equipped. There has never been a life lost from fire originating in one of these buildings, nor has there ever been a serious fire in one of them. If a building is subjected to immense heat from outside sources, such as was the case in the Baltimore fire, or the Home Life Insurance Co. Building, which was damaged by the heat from an adjoining building packed full of inflammable material, fireproof wood is ridiculous.

The permanence of any process or measure adopted for use in the great building industry which Architects, Owners and Builders are all constantly studying to improve will depend on merit alone, and as such merit is established no laws will be required to secure prompt adoption.

# TITLE INSURANCE

**By WALTER LINDNER, Esq.**

**Solicitor of the Title Guarantee & Trust Co.**

I WILL undertake to explain to you this evening* what title insurance is and what the title insurance policy means. You are, of course, familiar with the essential difference between real and personal property and with the fact that personal property is, in its nature, alienable; that it can be bought, sold and transferred from one to another.

While real property is alienable now, yet, as you learned in the lecture which I believe you had on the feudal tenures that there was a time when property could not pass from hand to hand by conveyance or by sale, but when the ownership or occupation, the tenure, really was a personal relation between the lord of the fee and the holder of the fief. By statute, after feudal tenures had developed to the place where real property was practically inalienable, it became possible for a free man to sell, at his pleasure, his lands or a part of them, so that the feoffee, that is, the holder of the tenement, should hold the same land of the chief lord of the fee. This statute of 1290 is the foundation of the real estate business.

The right to buy and sell real property, being in our law not a natural one, is hedged about with technical laws and rules, some of which take their origin in the original character of feudal tenures, and some of which are statutory attempts to get away from the rigor of these tenures. So that now the question, "Who is the owner of a piece of real property?" is not so easily answered as "Who is the owner of a piece of personal property?" And, in a very recent case (Empire Realty Co. vs. Sayre) the court takes occasion to say that "in the complicated and highly artificial state of our law, relating to real property, an owner of real estate, having contracted to sell, is too frequently placed, from not being able to make out a title such as a purchaser would be bound or willing to take, in such a position as to be unable to perform his bargain." Now, when an Appellate Court certifies in this manner to the difficulty of determining who is the owner of real property, you will see that it is a highly technical subject of the law.

From these difficulties arose the custom of having examined the title of a person who proposed to sell real property. The art of examining titles and the science of ascertaining what was a marketable title became, and is now, a highly technical and difficult department of the law. And then there arose a custom of distinguishing titles into good and bad titles. A title which was good was a title which was safe against adverse claims, while a bad title was one which could not successfully withstand such claims. With a marketable title it might be possible that the purchaser would be compelled to take a title which would cause trouble after he owned it; that is, he would find that he might be attacked in and be required to defend his ownership; still, the presumptions were that he would not be, and those presumptions were of so high a character and the probability that he would be deprived of his title, or troubled in his possession, were so remote that a title which might possibly not be good was still held to be marketable.

Now, as business men, you know that the employment of an individual to perform a professional service for you, requires of him only the ordinary degree of professional skill; and, if he has performed that service with ordinary professional skill, he is absolved from the consequences which may flow to his employer from matters which professional skill would not ordinarily discover, and the employer carries the rest of the risk. In the case of the examination of a title the purchaser carries for himself the risk of those things which an examiner

*From a lecture delivered before the Real Estate Class of the West Side Y. M. C. A.

of title would not be charged to discover by the exercise of the professional skill which he undertakes to sell for his fee. Moreover, your experience will lead you to know that if you own a piece of property it may be many years before you discover that there is a flaw in your title, even if it be one which your attorney when you purchased the property would have been charged to discover. When that time comes, you may find that the attorney is dead, that if he was solvent when you employed him he may now be insolvent.

And so the American business man discovered the expedient of getting a person who won't die and won't become insolvent to take the risk of the examination of title, and then in perfecting this system the insurer was placed in the position of guaranteeing not only professional skill in the examination of titles, but of insuring against those contingencies and possibilities which ordinary professional skill would not discover and those as to which an attorney would be absolved from responsibility.

I say that title insurance was first perfected in America; I think it exists only in America. There is a system of state registration in Australia, but there is no system of title insurance, except in the United States.

Title insurance is conducted by corporations which are under the supervision of the State, subject to examination as to solvency by the State authorities and required to report their condition from time to time to the Superintendent of Insurance or Banking of the State in which they are organized, and required to publish those reports.

These companies, having examined a title and approved the taking of the risk, issue a written instrument to the purchaser, or a mortgagee, or holder of the interest as to which application is made for insurance, which is called a policy of title insurance; this is an undertaking in writing by a corporation authorized by law to enter into such agreement, whereby it agrees to hold harmless the insured against all loss or damage which the insured may sustain, not exceeding an amount specified in the policy, by reason of the following things:

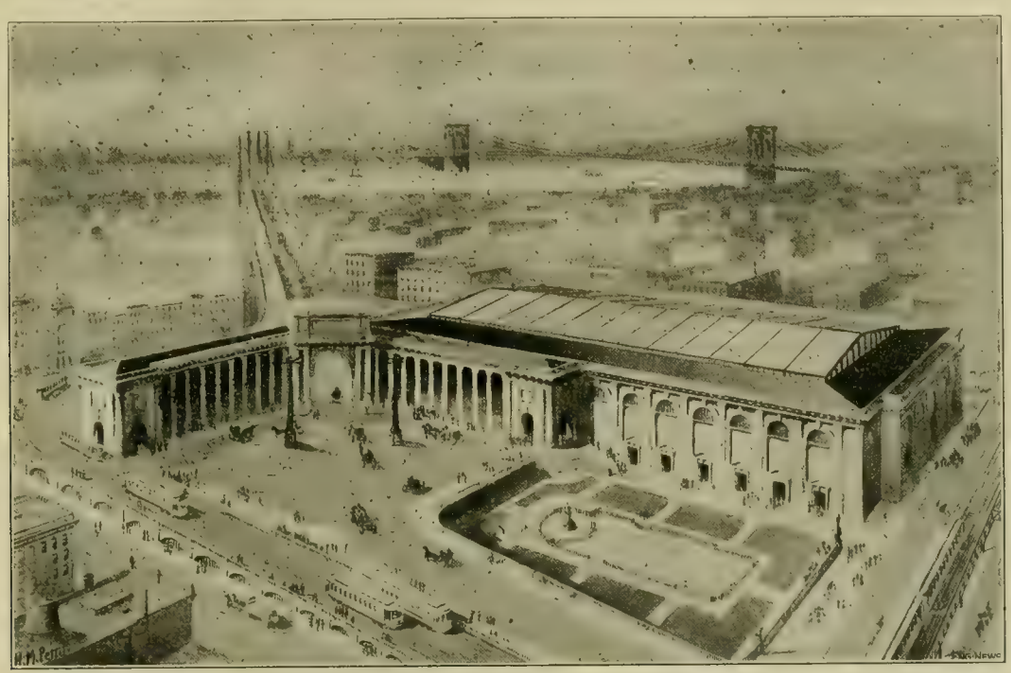
1st. Defects of title affecting the premises described or the insured interest.

2d. Unmarketability of the title of the insured.

3d. Liens or encumbrances charging the premises at the time the insurance is issued.

The policy saves and excepts, usually, certain matters specifically, which we will discuss later, and there are attached to it conditions amplifying the contract between the insured and the insurer, which we will analyze in the course of the evening.

The policy is issued for a money consideration which is termed the premium, and the risks which are insured against, as I have enumerated them, include things which cannot be discovered by an examination of matters which an attorney, in examining the title, no matter how skillful or how profound or how much time he would spend upon it, could not discover. For instance, instruments through which the title may be derived may be forgeries; records may have been falsified; records upon which reliance has been placed in examining the title may be lost or destroyed—and this latter contingency is not a fanciful one. There have been several cases, in my experience, in which judgment rolls under which title is derived have been unaccountably lost from the offices of clerks in counties of this State; and, unless they could be replaced, the title was rendered unmarketable and, possibly, liable to attack, without the ability to defend by the production of the judgment which precluded the persons who might possibly thus attack.



These matters, which could not be discovered by any examination, no matter how skillful, are taken by the insurance companies purely as insurance risk; and is risk just as fire insurance or life insurance are risks.

The insurer beyond that insures against matters which might be discovered by a skilful and searching examination, but which it is impracticable to inquire into, and which an attorney, certifying the title for a client, would be excused from inquiring into, because the law attaches to these matters presumptions of regularity. Instances of those things are these:

The maker of a deed may be incompetent in law. You may find a deed upon the record apparently between proper persons, conveying the property from A to B and A may be a lunatic or an imbecile. It might be possible to discover this if, in examining the title, you read not only the record but went beyond that in each case and ascertained whether or not the grantor was competent; but no attorney is charged with this duty and he is excused from going to this extreme in examination. It is a thing into which an attorney exercising ordinary professional skill would not inquire. The insurer takes the risk of these matters, while when you rely upon examination by an attorney the client carries the risk of them.

Other examples of risk of this sort, which the insurer carries and which an attorney is excused from carrying are whether grantors are of full age; whether instruments which have come upon the record were delivered according to law; whether the consideration stated in deeds was paid; whether matters recited in the record are true; whether matters stated in ancient instruments are true; whether matters stated in solemn judgments of the courts are founded on true statements. For instance, if an affidavit of service in an action were found to be false and it were established that a necessary party was never served with process, the judgment

## Manhattan Bridge Terminals.

The Department of Bridges has prepared architectural plans for the New York end of Manhattan Bridge. It is a handsome building flanking the bridge entrance, and in no way obstructing it. It is balanced by a colonnade on the opposite side of the entrance, while the roadway itself is spanned by an arch. To carry out this plan it will be necessary to change the grade of Division st and lower the tracks of the Manhattan Elevated Railroad Company. All of the two blocks bounded by the Bowery, Canal st, Forsyth and Bayard sts, will be taken for the terminal, which will furnish on the ground floor an assembly room for persons about to take trains over the bridge; on the second floor, ten terminal loops for Brooklyn trolley cars; and on the third floor, at least four tracks and five platforms for the elevated trains from Brooklyn.

The terminal building on the Brooklyn side, with its end on Bridge st and its side on Sands st, will furnish five terminal loops for trolley cars from Manhattan.

### A Unique Operation in Architecture.

Age brings to choice woods as to other offsprings of nature a beauty and charm which new wood cannot claim; a beauty only in part definable by the cultivated, but which affects and charms even the least observing, without their knowing why perhaps, or being able to tell where the difference lies between very old and well seasoned mahogany, oak and chestnut, and other pieces of the same discent when new and merely kiln-dried. The term Beauty in Art is little else than a synonyn for perfection; and as in nature certain elements, decorative and constructive, come only with age, so even in art—with architectural ornament no exception—age is depended on to contribute in its own way the autumnal tones and finishing touches; and so desirable are these, Art often seeks to snatch them by a swift mechanical stroke. In the Wetzel Building (in East 44th st) the chestnut wainscoting of the principal room has been made to appear three centuries old by painstaking imitation with the aid of a new contrivance. The Wetzel Building is the one famed for its pure Venetian facade. In the beautifully carved panels is the prized color tones of the good old wood, the time-softened outlines, wrinkled surfaces, and worn edges, as if Father Time, sythe in hand, had gone over the work when the modern artisan had laid down his tools. In this case the transformation from newness and rawness to maturity and perfection was worked by the unique Sand Blast. Infinite are thy possibilities, O Sand Blast! Life and death are in thy nostrils. When it breathes upon ancient walls, behold they become new; when it breathes upon new ones, lo they become old! Would you have your begrimed architectural forms rejuvenated?—turn on the Sand Blast; would you have them mellowed and matured?—consult the Sand Blast. The architect of the building personally directed the unique operation in the Wetzel Building, which put, so to speak, three hundred years into a day's time. The National Waterproofing and Cleaning Company's Sand Blast was used.

### Farewell to the Boreel Building.

In the process of demolition, the Boreel Building (115 Broadway) is down to the foundations, and in a few days the last of the debris will have been carted away. The Boreel was one of the first of the type of really large fireproof office buildings in the city, and one of the first of those whose construction was influenced by the perfecting of passenger elevators. It belonged to a type of which the Western Union and the Tribune buildings, erected five years previously, were the first representatives. These two were erected in the midst of a prolonged financial depression; and the construction of buildings influenced by the improved elevators did not begin in earnest until the resumption of investments in real estate, in 1879. Then came in the order here named, the Boreel, the Morse and the original Temple Court, these three being all under construction at one time; the United Bank Building in 1880, the Mills and Potter buildings in 1881-2, the Welles in 1881, the Produce Exchange in 1881-4, the Standard Oil and the Washington buildings in 1884, Aldrich Court in 1886, the U. S. Army building (Whitehall st) in 1886-8, and the Consolidated Exchange in 1887.

These buildings were all of the fireproof type of office building, with solid masonry walls, iron and steel beams and girders, and iron or masonry interior supports. The floors and partitions and the material of construction partook in each instance of the very great improvements that characterized this period. The architect of the Boreel was S. D. Hatch. Occupying the block bounded by Broadway, Cedar, Thames and Temple sts, the site covered 16,000 sq. ft., and the building was seven stories high—massive, solid, and of thorough workmanship. Sarah, wife of Robert Boreel, received the site in the year 1842 as a dowry from her father, John Jacob Astor I., who himself had purchased it in 1828 for $121,000. This site then contained the City Hotel, whose predecessor was Burns's coffee house. From Mrs. Boreel's descendants the Central Realty Bond and Trust Company bought it in the spring of 1901, selling in the fall of the same year to the George A. Fuller Company, which the following year turned the building over to a newly formed corporation, the Thames Court Realty Company, at a valuation of $3,000,000. The present owner is the One Hundred and Eleven Broadway Company, which, from plans of Francis Kimball will erect a companion Gothic structure to the Trinity Building, and this may possibly be called "the Second Trinity." It will cover not only the Boreel site but also the city square on the west, and in all respects will be a most handsome and substantial building, as well as a gigantic one. Plans and design are as yet incomplete, but it is understood that both the architectural picture and the interior arrangement and finish will be comparable to the first Trinity.

### Personal Mention.

Mr. Robert E. Simon, the well known auctioneer, has severed his connection with L. J. Phillips & Co., and will leave on the Kaiser Willhelm II. next Tuesday for a six weeks' trip through Europe. On his return Mr. Simon will become the vice-president and treasurer of the Morganthau Realty Company of 20 Nassau st, of which Henry Morganthau is president.

William Haight Cheney, secretary of the Home Fire Insurance Company of New York, died suddenly at his home, 107 Glenwood av, East Orange, December 5. He was born in Glens Falls, N. Y.

### Regarding Window Frames.

To the Editor of the Record and Guide:

As a subscriber to your paper I would like to have you decide a certain question for me: If contract is awarded to a party to furnish kalameined (metal covered wood) frames and sashes of the Box Frame type, plain top and bottom lifting sashes, with cast iron weights, steel chains of approved make, and all other necessary hardware complete, would those frames be considered complete without Stop Beads, as there is no carpenter work at all?

Answer.—Kalameined window frames—wood covered with thin iron—would not be complete without stop beads, these latter to be also covered with metal. One might as well say that the parting strip was not part of the window frame as to omit the metal covered stop beads.

# THE REALM OF BUILDING

## Building Operations.

### Five New Flats for Manhattan Av. Block Front.

MANHATTAN AV.—Moore & Landsiedel, 3d av and 148th st, have plans under way for the erection of five high-class 6-sty flat buildings, 40x88, and 40x90, to cover the block front on the west side of Manhattan av, between 107th and 108th sts, at a total cost of about $250,000. Falk & Fine, of No. 230 East 10th st, will be the owners.

### High Office Building for Liberty and Temple Sts.

LIBERTY ST.—The Fidelity and Casualty Company, of No. 97 Cedar st, will erect at the southwest corner of Liberty and Temple sts, on a plot 52.6x54.5, a 15 or 18-sty steel, frame, office building, upon which there now stands a 7-sty structure, which will be demolished. The company also owns the abutting property at the northwest corner of Cedar and Temple sts. Mr. C. L. W. Eidlitz, of No. 1123 Broadway, will prepare the plans. No contract has yet been made for the construction.

### New Office Building for Fifth Av.

5TH AV.—Messrs. Maynicke & Franke, of No. 298 5th av, have been commissioned to prepare plans for a new 11-sty office building, to be erected on a plot 29x150, at the southeast corner of 5th av and 32d st, for Matthew Rock (merchant tailor), of 315 5th av. Plans will be ready for figures in about a month or six weeks time, all contracts will be made through the architects. Limestone, brick, terra cotta, plate glass, tile roof, electric elevator, steam heat, electric lights, concrete arch floors, etc.

### Architects for Isaac N. Seligman's Bank.

SOUTH WILLIAM ST.—Isaac N. Seligman, of the banking firm of J. & W. Seligman & Co., with offices on the second floor of the Mills Building, 21 Broad st, informs the Record and Guide that he has commissioned Messrs. Francis H. Kimball, of 71 Broadway, and Julian Clarence Levi, of 24 East 23d st, associate architects, to prepare plans for his new banking house and office building to be erected on the south side of William st, between South William and Stone sts, opposite the Cotton Exchange, on a plot 70x94x50 feet. The building will contain beside the bank, fine offices; it will be a 12-sty building of granite and marble, of handsome design. No contract has yet been awarded.

### Eighteen-Story Building May be Erected on Custom House Site.

WALL ST.—It was officially announced in the Record and Guide of Nov. 4, 1905, that Messrs. McKim, Mead & White, of No. 160 5th av, would prepare plans for extensive alterations and improvements to the old Custom House Building, at Wall, Hanover, William sts and Exchange pl, for banking purposes, to be used by the National City Bank, of No. 52 Wall st. It is now learned that two sets of plans are being prepared, one for the alteration and another set for an entirely new building, to cover the entire plot. If the new structure is built it will be from eighteen to twenty stories high and 180x220 feet in size. James Stillman, 52 Wall st, is president of the bank. (See also issue Nov. 4, 1905.)

### Hotel Seville to be Enlarged.

29TH ST.—Mr. Louis C. Raegener, 141 Broadway, owner of the Hotel Seville, at the northwest corner of 29th st and Madison av, will build on the plot front of 50 ft. adjoining the hotel, west of 29th st, running through to 28th st, on plot 50x197.6, a 10-sty fireproof hotel annex to connect with the present structure. The new part in design will harmonize in exterior and interior with the old part; there will be twenty-one sleeping rooms and nineteen bathrooms on each floor, and best hotel fire protection outfits. Mr. Raegener will not obtain possession to the site until May 1, when operations will be pushed rapidly. He has commissioned Mr. Charles P. Mott, 35 West 31st st, as architect. No contract has yet been made for the improvement.

### Wall Street and Broadway Corner.

At Wall st and Broadway, the southeast corner, the old 4-sty red brick structure which occupies a plot of 29.6 feet on Broadway and 40 feet on Wall st, has been lowered to the height of one sty, and here the remaining portion of this historic building is being roofed over. Several months ago the Building Department condemned the upper three stories as unsafe, and notice was served. The United States Cigar Stores Company has a three-years' lease yet to run on the Wall st half of the first story, and it is learned that the company stood the expense of lowering the structure. The other half facing Broadway is occupied by the Wilson drug store, which has a lease until May 1, 1906. The property was bought last June by the United Mercantile and Trust Company, of St. Louis, at the rate of $4 a square inch, or $700,000.

### Apartments, Flats and Tenements.

SUMMIT AV.—Joseph H. Jones, owner and architect, 950 Ogden av, will build at Nos. 969 to 977 Summit av, Bronx, five 4-sty 8-family flats, to cost $80,000.

99TH ST.—Sockin & Riccardi, 301 East 107th st, will build at 205-209 East 99th st, two 6-sty 28-family flats, 37.6x87.11, to cost $70,000. Samuel Sass, 23 Park Row, is architect.

158TH ST.—Samuel Sass, 23 Park Row, is making plans for two 6-sty 29-family flats, 50x86.11, for A. Horowitz & Son, 17 West 115th st, to be erected at 524-530 West 158th st, to cost $100,000.

55TH ST.—The Hauben Realty Co., 192 Bowery, will build three 6-sty 28-family flats, 41.8x87.5, at Nos. 333-345 East 55th st, to cost $120,000. Bernstein & Bernstein, 24 East 23d st, are the architects.

180TH ST.—Joseph W. Cedar, 640 West 131st st, will erect at the southeast corner of 180th st and Audubon av, two 6-sty, 38x85.6 ft. flats, to cost $80,000. J. C. Cocker, 103 East 125th st, is making plans.

DAWSON ST.—On the northeast corner of Dawson st and Westchester av, Nathan Marcus, 121 Canal st, will erect a 6-sty flat, 110x147x irregular, to cost $100,000. Moore & Landsiedel are preparing the plans.

PROSPECT AV.—The Prospect Av Realty Co., 94 Greene st, will build at the northeast corner of Prospect av and Beck st a 5-sty flat, 94.10x126.6x irregular, to cost $75,000. Moore & Landsiedel are making plans.

HOME ST.—Samuel Finkelstein, 152d st and Union av, Bronx, will build at the northeast corner of Home st and Stebbins av, a 6-sty flat, 116x116x irregular, to cost $75,000. Moore & Landsiedel are preparing the plans.

135TH ST.—Edwin Wilbur, 120 Liberty st, is preparing plans for a 5-sty flat, 25x87, for Bernard Trepton, 964 Southern Boulevard, to be erected on the north side of 135th st, 175 ft. west of Willow av, Bronx, to cost $20,000.

109TH ST.—On the north side of 109th st, 300 ft west of Amsterdam av, the Lester Realty Co., 2790 Broadway, will build a 6-sty 25-family flat, 44.4x87.11, to cost $46,000. Geo. Fred Pelham, 503 5th av, is making plans.

OAK TERRACE.—Moore & Landsiedel, 3d av and 148th st, are planning for a 5-sty flat, 61x100, for Amdur Bros., 430 Broome st, to be erected at the northeast corner of Oak Terrace and Crimmins av, to cost $75,000.

182D ST.—Moore & Landsiedel, 3d av and 148th st, are planning for a 5-sty 19-family flat, 50x90, for Donald Robertson, 246 West 108th st, to be erected at the southeast corner of 182d st and St. Nicholas av, to cost $60,000.

173D ST.—Isaac and Henry Mayer, 100 West 119th st, will build on the south side of 173d st, 100 ft. west of Amsterdam av, two 5-sty flats, 50x88, to cost $150,000. Neville & Bagge, 217 West 125th st, are making plans.

## Success in Steel Beam Reinforcement.

During the last year Guy B. Waite Co. has been erecting in the Guardian Building at Peekskill, N. Y., steel and fireproof construction, in which the concrete floors form a reinforcement to the steel beams.

To demonstrate the construction and make it admissible in large cities a severe fire, water and load test was conducted by the Bureaus of Buildings of the Boroughs of New York under the direction of Prof. Woolson, of Columbia University, on Nov. 11, 13 and 14, 1905, which tests were a complete success.

The construction is indispensable to those who desire to construct in the OLD, SAFE WAY with steel beams, with RAPIDITY, ECONOMY and SAFETY.

A saving in the steel floor beams of about 50% is made with the same strength and stiffness of floors as now constructed with steel beams carrying the entire floor load.

This construction is protected and exclusive rights granted to Standard Concrete Steel Co., No. 100 Broadway, reinforced concrete engineers and contractors, and Guy B. Waite Co., 31st Street, East River, fireproof engineers and contractors, who have approvals from the Bureaus of Buildings on reinforced concrete structures of all kinds, fireproofing of every description, and the best facilities with most convenient location of any concern.

are the general contractors, and Messrs. Hale & Rogers, 92 William st, the architects.

40TH ST.—Wells Bros. Co., 160 5th av, has obtained the general contract to build the new 9-sty club house, for the New York Club, at Nos. 18 to 22 West 40th st. The building will be 54 ft. front and 38.9 ft. deep, and will have a front of brick trimmed with limestone and terra cotta. It is to cost $300,000. The first story will contain the club offices and cafe, and the second and third stories the library and card, billiard and committee rooms. The dining hall will be on the eighth floor and private dining-rooms on the seventh. There will be three floors of sleeping rooms. Henry J. Hardenbergh, of No. 1 West 34th st, is the architect.

### Bids Opened.

Bids were opened Dec. 4 for the completion of the electric lighting system in the Criminal Court Building, corner Franklin and Centre sts. HOBOKEN, N. J.—Bids for the construction of public school No. 9 at Monroe and Second sts, Hoboken, N. J., were in excess of the appropriation and all were rejected. Contract will be refigured. Eugene Ciccarelli, Second National Bank Building, Hoboken, is architect.

## BUILDING NOTES

'Tis not so bad for building—the weather.

Lath have risen to $5.75 per M., with no indications of a recession.

"Al" Adams's 40-sty hotel has gone into the category of vast works that are not to be.

C. B. J. Snyder, architect for the Board of Education, advocates placing shower baths in all crowded school districts.

The annual banquet of the New York Lumber Trade Association will be held in the Astor Gallery of the Waldorf-Astoria on Tuesday, Jan. 23, 1906. Subscriptions for tickets should be sent to J. D. Crary, 18 Broadway.

The Board of Estimate and Apportionment on Friday appropriated $1,000,000 for the preliminary work of the new Hendrik Hudson memorial bridge, to be erected at Spuyten Duyvil. The estimated total cost of the bridge is $2,025,000. It is to be 80 feet in width, and conform to the Claremont viaduct.

The Davis Acetylene Company, of Elkhart, Ind., which manufactures Acetylene Gas Generators, is now represented by Mr. Union Adams, whose office is in the Park Row Building, N. Y. City. Ex-Senator W. H. Lynn has just purchased one of these generators for supplying light and heat for his handsome residence at New Rochelle, N. Y.

George A. O'Rourke, general contractor and consulting engineer, has removed his offices from the Smith Building, at 3d av, corner 148th st, to larger quarters in the new office building at the northwest corner of Bergen av and 148th st. Mr. O'Rourke has recently secured the contract to erect the 4-sty brick factory, 50x100, corner of Gerard av and Cheever pl, for the Edwards Electric Company, Arthur Arctander, architect.

The New York Safe & Lock Co., of York, Pa., has recently succeeded to the business formerly conducted by J. M. Mossman in New York City, of the sale of safes, vaults, vault doors, safe deposit boxes, fireproof and burglar proof safes and safes for storage of household silver. They carry on the business at the old established headquarters of J. M. Mossman, Nos. 70-74 Maiden lane and 5-9 Liberty st, and have recently secured the contract for building the burglar-proof vault work in the Title Guarantee and Trust Co.'s new building at No. 176 Broadway.

"Plans for the new Hudson and Manhattan Tunnel terminal building to be erected on the two blocks in the west side of Church st, between Cortlandt and Fulton sts, for the Hudson and Manhattan Railroad Company, W. G. McAdoo, president, 15 Wall st, are still in a very preliminary state," said Mr. Post, of Messrs. Clinton & Russell, 32 Nassau st, the architects, this week. "Nothing positive has yet been settled with a view to the erection or the design of the structure, as changes are met with constantly." At the office of Mr. McAdoo, a Record & Guide representative was assured that nothing definite would be decided upon until after the first of the new year. It was stated, however, that in all probability the building would cover the entire plot in one structure, and not in two separate 20-sty buildings.

### Blessings (?)

(From the Lumber Trade Journal.)

Brick are $11 a thousand at retail, lath $6 a thousand at retail. There is every indication that there will be a great scarcity of brick this winter, and that this famine, as it might almost be called, will extend well into next spring or summer. There is a great scarcity of cars, and many millions of feet of lumber will probably be delayed in coming forward on this account. We are not sure but that these conditions are blessings in disguise.

### Large Hotel for the Connecticut Shore.

R. W. Gibson is the architect for a large hotel which is being erected at Eastern Point, opposite New London, Conn. This hotel, The Shennecossett Inn, is one of the largest on the Connecticut shore. McGuire & Penniman, Providence, R. I., are the contractors. Six hundred thousand shingles will be used in the construction of this building. They will be stained a pearl grey and a moss green. Two thousand gallons of odorless stain will be supplied for this purpose by Parker, Preston, Inc.

—Poor's Manual of Railroads for year 1905 (the 38th annual number) contains all the important facts required by investors, bond experts and bankers relative to bonded indebtedness, interest charges and other elements of the leading railroad systems in the United States, together with tables of annual meetings, a list of transfer agencies and registrars of stock, and a table showing rates and dates of all dividends paid by steam railroad companies, street railroad companies and industrial corporations, with the time and place of payment. There is also a diary showing by months and days where and when annual meetings are held or dividends paid and when stock transfer books close. The statements presented in this number of the manual are arranged in four sections—the first comprising of the statements of all of the steam railroads in the United States and Canada, the second comprising the statements of all of the street railway and traction companies in the United States, the third containing statements of the leading industrial corporations and organizations auxiliary to the railroad interests, and the fourth containing statements showing the finances and resources of the United States, the several States, and the chief counties, cities and towns in the country. Not the least valuable of the contents is a list of railroads which have been merged in other lines.

## Building Operations.

### New Jersey.

ELIZABETH, N. J.—The Young Men's Father Mathew Temperance Society of this city has just purchased for $3,000 a plot of land, 50x100, located at 3d and Livingston sts, on which it is the intention in the near future to erect a clubhouse at a cost not to exceed $30,000.

HACKENSACK, N. J.—Salvator De Lorenzo, of Amos pl, is building a house on the Conklin property, near Railroad av and Clay st.

JERSEY CITY, N. J.—The West Side Development Co., of Boulevard and Manhattan avs, incorporated last March with a capital of $100,000, will shortly begin the erection of four 2-sty frame houses on Tonnele av, near Manhattan av, each 18x 26. The plans, which have been made by Emil Guhl, call for five rooms and bath with all improvements. Cost about $7,500.

NEWARK, N. J.—St. Barnabas Hospital, High st, near Montgomery, will erect a new administration building for nurses.

JERSEY CITY, N. J.—George A. Flagg, 534 Summit av, Jersey City, is making plans for the Sons of Israel for the erection of a synagogue on Cottage st, between Summit av and the Boulevard. The building will be of frame, 25x72, and equipped with all the latest improvements.

### Other Cities.

LOUISVILLE.—Grainger & Co., Louisville, Ky., have been awarded contract for the structural iron work on the Paul Jones Building, which is to be erected in this city. The contract will exceed $100,000.

CATSKILL, N. Y.—E. H. Davis of Hudson has secured the contract to put 20,000 ft. of metal ceiling in the Catskill Mountain House, and expects to start the work very soon.

WATERBURY, Conn.—A. J. Patton, Waterbury, is making surveys of property of Truman S. Lewis on Woodlawn Terrace. Local architects have drawn sketches for a new residence which Mr. Lewis will build on the site, but details have not been decided upon as yet. It is expected that over $60,000 will be expended on the improvements. Architect C. J. Bailey, Waterbury, has been commissioned to draw plans for the erection of five new houses on Walnut av for D. T. Farrington. The plans have just been started.

WATERBURY, Conn.—Estimates are being made on plans by Joseph T. Smith, Odd Fellows bldg, Waterbury, for a new block to be erected on Vine st by Dr. F. F. Cook. S. E. Cann will soon have plans drawn for the erection of a new block on Scoville st. The building will be of brick, arranged for stores and tenements. No architect has been selected as yet.

## CONVEYANCES

Whenever the letters Q. C., C. a. G. and B. & S. occur, preceded by the name of the grantee, they mean as follows:

1st.—Q. C. is an abbreviation for Quit Claim deed, i. e., a deed wherein all the right, title and interest of the grantor is conveyed, omitting all covenants and warranty.

2d.—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or encumbered.

3d.—B. & S. is an abbreviation for Baragain and Sale deed, wherein, although the seller makes no expressed consideration, and thus impliedly claims to be the owner of it. The street or avenue numbers given in these lists are, in all cases, taken from the insurance maps when they are not mentioned in the deeds. The numbers, it will occasionally be found, do not correspond with the existing ones, owing to there having been no official designation made of them by the Department of Public Works.

4th.—The first date is the date the deed was drawn. The second date is the date of filing same. When both dates are the same, only one is given.

5th.—The figures in each conveyance, thus, 2:482—10, denote that the property mentioned is in section 2, block 482, lot 10.

6th.—It should also be noted in section and block numbers that the instrument as filed is strictly followed

7th.—A $20,000—$30,000 indicates the assessed value of the property, the first figures being for the lot only, and the second figures representing both lot and building. Letter P before 2d figure indicates that the property is assessed as in course of construction.

## MORTGAGES

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given and the amount. The general dates used as headlines are the dates when the mortgage was handed into the Register's office to be recorded.

Whenever the letters "P. M." occur, preceded by the name of a street, in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date.

The first date is the date the mortgage was drawn, the second the date of filing; when both dates are the same, only one is given.

Subscribers will find mortgages in this list with the wrong block number attached. The block number we give is taken from the instrument as filed.

Mortgages against Bronx property will be found altogether at the foot of this list.

December 1, 2, 4, 5, 6 and 7.

YOUR SYSTEM OF RECORDS?

BETTER USE OURS

It costs a dollar a mile to go to Chicago in a Special Train, but only a few cents a mile on the Empire State Express. The same is true of the RECORD AND GUIDE QUARTERLY. Each subscriber receives for Twenty Dollars a year a service that would cost him thousands of dollars.

A system of records is as necessary to a real estate broker as the "ticker" to a stock broker. Conceivably a man might get along without either, but he would suffer immensely both in person and estate.

By means of the RECORD AND GUIDE QUARTERLY, which occupies only a few square inches on a shelf or a desk, the real estate man is put in possession of a system of records in which he could find any particular transaction, be it conveyance, mortgage, auction sale or lease, as easily as he can find the name of one of his clients in the telephone book. It is permanent in form, ever ready and available. It does not go "out" like the office boy, or make mistakes like the stenographer.

The annual number of the RECORD AND GUIDE QUARTERLY contains ALL the legal records for the past year concerning real estate and projected buildings, arranged alphabetically and numerically, with invaluable annotations.

These are supplemented by tables of important transactions, with typical prices, covering the past quarter of a century or more, accompanied by expert comments.

THE action of the stock market has continued to show the mixed effect of reckless speculation and conservative restraint. There has been no general and sustained rise in values. On one day a group of railway stocks is forced up by tne powerful speculative pools, who are operating on the bull side. On the next day a similar feat is accomplished with certain industrial stocks. But in the meantime the general market fails to respond to this heroic treatment, and there are indications that other stocks are being sold under cover of the advances. But flagrant as are the evidences of manipulation, the course of the market during the week shows very clearly that moderating influences remain substantially in control, and that the speculation will not be allowed to go too far. It has, however, gone far enough for the present, and a moderate amount of weakness from now until after the holidays would be distinctly a wholesome thing. No general or sustained advance can be expected as long as existing conditions prevail, and current methods are necessary to bring it about.

THE real estate transactions during the past week have been, if anything, even more numerous and various than during any previous week of the current season. The chief center of speculative activity remains in the district affected by the Pennsylvania and trolley terminals, and tnis district will undoubtedly remain in a ferment for a long time to come. It is different from other speculative districts, because, in case a higher level of values is permanently established, it will not only have to be transformed, but reformed; and a process of reformation from dubiousness to respectability is a slower process than a process of transformation from one kind of respectability to another. Most of the recent buying has taken place either on Sixth avenue and in the immediate vicinity of the terminal, and the only improvement yet announced for this vicinity is the erection of a sky-scraper on the southeast corner of 33d street and Greeley square. An excellent demand for high-priced residence property continues to be indicated, and it looks as if a renewal of speculative buying in the section east of the Central Park would be justified during the coming spring. This is likely particularly to be the case, provided the prices of securities in Wall Street continue on the whole to advance. If they do continue to advance, the new-rich-man may become as conspicuous in New York in 1906 as he was in 1901 and 1902. Another noteworthy incident is the announcement of the first building operation in the Dyckman tract. Inasmuch as Subway trains will be running to Kingsbridge within a few weeks, this announcement is only natural, and a renewal of speculative buying in that vicinity will take place during the winter and spring. Vacant property in this district continues to be the cheapest property in Manhattan or the Bronx, considering its accessibility, and it offers a fair field for exploitation. It will probably be improved throughout with the class of tenements which prevail in Harlem; and in the vicinity of the water front arrangements will have to be made for the transaction of a good deal of business. The great obstacle to the early improvement of the district is the backward condition of street-opening proceedings, and other similar inconveniences; but much can be accomplished in this respect during the summer, provided the work is vigorously prosecuted. The Dyckman tract is entitled to an earlier development than are portions of the Bronx, where improvements are already under way.

THERE has been a very excellent sale for apartment houses situated on the West Side during the past week, which calls attention to the fact that, even if renting is somewhat slack in the newer districts, it remains extremely good on the West Side. Neither is it likely to be very much unsettled hereafter, even if there is over-building elsewhere in Manhattan and in the Bronx. The Subway has accomplished all that it was expected to accomplish for the West Side, and in the future that district will continue to have such an advantage in point of convenience over districts further north that the owners of apartment houses in that section of the city can count upon keeping their buildings well filled. They will not have local over-building to fear, because the opportunity for it does not exist. The vacant property remaining on the West Side is mostly situated on Broadway and Riverside Drive, and is so expensive that it can be handled by only a few well-to-do and conservative builders. There can be no doubt that future improvements will take the form chiefly of large fireproofed apartment houses. Indeed, just as the East Side is being dedicated to expensive private residences, so the West Side will be dedicated to twelve-story flats. Plans have been filed during the past year for four buildings of this class, whose total cost will be about $3,500,000, and this list does not include either the new Astor apartment house or a half a dozen smaller buildings which will cost on the average about $250,000 each. This is the class of improvement which will prevail hereafter on the West Side, and as soon as such buildings have been erected on the vacant frontages on Broadway and elsewhere, they will be substituted, wherever possible, for existing private dwellings. This substitution has already been commenced in the vicinity of Broadway and 72d street. The old Colonial Club property, sold during the past week, is likely to become the site of a twelve-story apartment house, and other similar operations will follow, particularly in the vicinity of Subway express stations. The movement will be hampered by the large number of restrictions which have been placed upon West Side property; but it is bound to prevail in the long run. There seems to be no tendency in the development of New York City to open new expensive residential districts, either for private dwellings or apartment houses. The newer districts are all being given up to a cheap class of improvements.

AFTER the election New York citizens of ordinary intelligence seemed to be almost unanimously making two assertions respecting its results. One was that with a fair vote and a fair count William R. Hearst would have been elected Mayor of the metropolis. The other was that, whether elected or not, he never would be seated. The second of these assertions seems to be in fair way of fulfilment, while the investigation, so far as it was allowed to go, seemed to render the first extremely probable. It remains to be seen whether Mr. Hearst can secure the assistance of the Legislature in pushing the investigation further. In all probability he will be able to do so, because the Republicans are not likely to miss so good an opportunity of worrying the local Democratic machine; but in this event the investigation would assume a partisan character, which, under the circumstances, is to be very much regretted. Another unfortunate consequence would be the difficulty under which the business of the city would be conducted, as long as there was any question about the Mayor's title to his office; and if by any chance Mr. Hearst should be eventually seated instead of Mr. McClellan a still further disorganization would take place. The actual installment of Mr. Hearst would mean, for instance, nothing less than the abandonment of all Subway extensions during his term, because the city has not the money to build the new subways, and it is improbable that an administration headed by Mr. Hearst could reach any agreement with the traction companies. The consequence is, of course, that many people who believe that Mr. Hearst has been in some way deprived of an office to which he is entitled will look with equanimity upon the continued occupation by Mr. McClellan of his position. But it is very much to be hoped that Mr. McClellan, in case he retains the office, will do his best to disarm the criticism of the Municipal Ownership party. Of course, he cannot succeed entirely in avoiding their condemnation, but he should succeed in obtaining very much better terms for the leases of the new subways than were obtained for those already constructed. Public opinion will not be satisfied with any worse terms than those which were obtained for the right to construct and operative the so-called McAdoo tunnel on Sixth avenue.

## More Fireproofed Wood.

THE unexpected has happened. Mayor McClellan has vetoed the ordinance of the Board of Aldermen providing for the repeal of that section of the Building Code requiring the use of fireproof wood in all buildings over 150 feet in height. The action comes as a complete surprise to the people who have worked for the abolition of the clause requiring the use of fireproofed wood, because they had been assured that the Mayor would sign the ordinance, and they are naturally speculating somewhat sharply upon the Mayor's reasons for his veto. But the message which accompanies it does not offer any very satisfactory explanation of his decision. He undoubtedly makes a fair and a shrewd criticism of the Board of Aldermen when he points out the inconsistency of passing two ordinances within a few months of each other, one of them making the use of fireproofed wood in buildings over 100 feet high compulsory, and the other doing away with the required use of fireproofed wood in buildings over 150 feet high. This, as we have said, is both a fair and a shrewd criticism of the Aldermen, and undoubtedly proves that the Board is as unfit to legislate in respect to building regulations as it is in respect to franchises.

But the inconsistency of the Board of Aldermen has nothing to do with the merits of fireproofed wood as a necessary component of a building 150 feet in height; and when he comes to justify his own action in insisting that fireproofed wood shall be retained, the Mayor becomes very much less convincing. He complains that the Board acted without instituting any tests as to the real value of fireproofed wood, and that pending a fuller investigation of the matter it is better not to disturb the existing law. "I know of no good reason at present," he says, "for wholly condemning the use of fireproofed wood. While I am aware that it has been pronounced a failure by some, yet there are many who contend that its use safeguards life and property to a very considerable extent." Surely this is an extremely unfair and disingenuous statement of the case, as it exists to-day, for and against fireproofed wood. The "some" who have pronounced it a failure are the great body of architects, underwriters, builders and experts who are personally and financially interested in erecting the highest class of fireproofed building. The "many" who approve its use consists, with one or two exceptions, of the manufacturers of fireproofed wood. The Mayor's expressed desire for conservatism in the matter and for refusing to act until after specific investigation would be justified, in case fireproofed wood were a time-honored material, which had long been recognized as constituting a valuable help to thoroughly fireproofed construction, and which had been given a place in the building regulations only after careful consideration. But it is well known that such is not the case. Mr. William J. Fryer has stated that the clause was adopted without any sufficient test of value of the material, and during the past six years a consensus of expert opinion unfavorable to fireproofed wood has been reached. No other city in the world has come around to its required use, the United States Government has abandoned it, and the Board of Underwriters did not incorporate the provision in its model building code. Yet in the face of such testimony the Mayor "knows of no reason for condemning it"! The burden of proof rests with those who favor it, not with those who condemn it.

The Mayor's message leaves only one loophole for the people who are opposed to the compulsory use of fireproofed wood. He suggests that a commission be appointed by the Board of Aldermen for the purpose of framing a complete revision of the Building Code. This is an excellent suggestion, quite apart from the desirable abandonment of the fireproofed wood clause. During the six years since the present code was adopted a vast amount of building has been achieved in New York, and a great deal of experience has been accumulated. On the whole, the existing code has worked very well; but every builder knows that changes of phraseology in some important sections would conduce both to a better enforcement of the law and to a higher average of building construction. Then there are many contradictions between the code and the tenement house law, which should be corrected, and, finally, changes have been made in the methods of building construction, such, for instance, as the use of reinforced concrete, for which allowance should be made in a revised code. For all these reasons the Mayor's recommendation is an excellent one, and it is to be hoped both that the Board of Aldermen will act upon it, and that a commission will be appointed which will command the entire confidence of the building community—men who know the subject thoroughly and have no special axes to grind. There can be no doubt that such a commission would find a good many more reasons than the Mayor can for abolishing in the revised code the compulsory use of fireproofed wood in this city.

# "APPRAISALS"

By JOHN M. THOMPSON

PART ONE.

I BELIEVE that there is no more important branch of real estate than that of appraisals.* A full knowledge of values is the prime requisite of a successful broker. In order to keep in touch with the market a broker should keep posted as to the trend of values. A good broker should be a good judge of the value of real property though he may never make an official appraisal. The definition of market value should always be borne in mind. It is surprising to know how many appraisers do not know the definition of market value, or if they do know it, they do not know how to apply it. One of the best definitions that I have seen of market value is that of Mr. Rumsey, in his book on "Taxation." He defines it as follows:

"The term 'full value' has been variously described. It was originally called the sum for which the property would be appraised in payment of a just debt due from a solvent debtor. . ." The Charter uses the phrase 'the sum for which said property under ordinary circumstances would sell.' All these phrases mean the same thing. They contemplate that the appraisal shall be upon the basis of a disposition of the property. They mean the commercial value; the fair market price. This is the rule. . . . In no case can the individual relation of the owner to the property be considered. The assessable value cannot be increased because of the owner's sentiment, or fancy, or prejudice, or personal taste, which renders the property more valuable to him than it would be to others. Neither prospective nor speculative value can be considered except in so far as the prospects of the vicinity are reflected upon the present condition, and increase the sum for which the property is presently salable."

A definition generally used by appraisers is: Property owned by a person who wishes to sell, but does not have to sell; and a person who wishes to purchase, but does not have to purchase. Only a few days ago we had an instance where the New York and New Jersey Tunnel Company purchased a plot on 32d st at five times its value of a few years ago. But this purchase does not establish market value. While undoubtedly there has been an enormous increase in values in this section it must be borne in mind that the Tunnel Company had to have this piece and desired it as soon as possible, and therefore undoubtedly paid a large price for it rather than enter into long and expensive condemnation proceedings. In the case of some of the purchases made by Mr. Carnegie to acquire his plot on 5th av, 90th and 91st sts, he paid what were extremely large prices, but what mattered it to Mr. Carnegie if he paid ten to fifteen thousand dollars more than a property was worth if by doing so he acquired the plot that he wished? I could go on and cite instances of this kind ad infinitum. These are instances which do not constitute market value.

In appraising great care should be given to the surroundings, such as the width of the streets or avenues, the length of the blocks, proximity or distance from the corners, transportation facilities, character of buildings and tenants, whether residential or business. Too great care can not be bestowed upon the study of the neighborhood and the likelihood of increase or decrease in value.

OFF-HAND VALUATIONS.

While on the subject of careful consideration of property before making an appraisement, I would add that a thing to be guarded against in appraising is that of giving off-hand opinions as to values. This you will be often importuned to do, but my advice is never give off-hand opinions. No matter how competent an appraiser may be, he is not qualified to express an opinion without a thorough examination of the property and its surroundings. Lawyers are especially prone to ask for these off-hand appraisements. As an instance, last winter during the early part of the movement on Washington Heights I received a telephone message from a prominent firm of lawyers asking my opinion as to the value of a large plot of lots in that section. I told them that I was unable to give an opinion without an examination of the property, as I did not know whether there was any rock or not on the lots, whether the streets were paved, sewered, guttered or even opened. But under dint of persuasion I did say that if the lots were on grade, streets opened, etc., that they were worth $7,500 each.

Judge, therefore, of my surprise a few days later to get a call from one of my clients who informed me that I had been the means of breaking up a purchase of a large property by him. Upon inquiry I learned that this firm of lawyers had advised their clients not to sell their lots for the price offered—a very good one, by the way—on the grounds that I had appraised the lots at $7,500 each.

Of course I immediately explained my position to this client and subsequently investigated the lots. I found rock several

*From a lecture before the Real Estate Class of the West Side Branch of the Young Men's Christian Association, December 12, 1905.

feet high in some places, some of the streets not paved, nor sewered and some of them not opened, and some of the lots almost inaccessible on account of a steep declivity at one end of the property. Five thousand dollars per lot would have been full value. As it was a very large tract the difference in the total amount was very great. This is only one of many instances to show the evils of expressing an off-hand opinion.

But to return to ascertaining market value. Never allow future prospects to bias your judgment. Established facts, such as a well known improvement in a neighborhood like the building of a subway, when it is an established fact, or a large number of new buildings being erected or some large advantageous public improvement, should be given due weight, but even then bear in mind that the future is often discounted, and that prices realized in anticipation of an improvement do not increase for many years after the improvement has materialized.

A few months ago a prominent appraiser received a letter from a client asking him to let the writer know, first, the value of a certain piece of property at the present time; second, the value of this property ten years hence. In reply to this letter the appraiser wrote: "I have examined the property and find the value at the present time is so many dollars." To which he tersely added: "If I knew the value ten years hence I would retire from business."

CARNEGIE HILL.

You will be confronted at all times by sudden rises in value, some stable and some evanescent. For instance, there was the Carnegie boom. Following the first Carnegie purchase in February, 1899, there was a rush to buy on 5th av on Carnegie Hill. This continued far into 1902. To-day I know of many instances where the owners are trying to sell at a great discount or are holding on to their vacant property, paying large interest and charges, hoping that the figures at which they purchased will be reached again. Since 1902 I do not believe that there have been a dozen sales on Carnegie Hill proper. The appraiser who was carried away by this boom must feel conscience stricken when he recalls that his client is now carrying at great expense property in this section bought on the advice of the appraiser based on sales made at the height of a boom.

Then, again take the case of such stable rises as that of the Pennsylvania Railroad section and Longacre Square section where the prices jumped by leaps and bounds until an appraiser was put to his best to keep in touch with the ever increasing values. These values have continued to increase and will continue to increase by reason of such substantial improvements as the Pennsylvania Railroad station, the New York and New Jersey Tunnel terminal and the establishing of the subway and tunnels at this point. I admit that it is often difficult to discriminate between such stable and evanescent values, but a thorough study of the cause and effect of these sudden rises will enable a competent appraiser to decide whether these values will increase or decrease or remain stationary.

Corners and lots adjoining corners are more valuable than inside lots in the same block but it is impossible to give any fixed ratio. In business and high-class neighborhoods the ratio is of course very much greater. I would say that the value of a corner varies from 25% to 100% over that of an inside lot. The smaller ratio would apply to cheap tenement or factory districts and the larger to high-class business or residential sections.

I have recently known of an appraiser who was called upon to testify as to the value of a prominent corner. His testimony was substanially as follows: "A full sized lot in the middle of the block on the south side of the street is worth $40,000; near the corner lots would be worth more. For a lot 90 ft. west of the corner an additional 10% over the adjoining lot, or $44,000. An additional 15% over the adjoining lot for a lot 65 ft. west of the corner, or $50,600; an additional 20% over the adjoining lot for a lot 40 ft. west of the corner, or $60,720; an additional 25% over the adjoining lot for a lot 15 ft. west of the corner, or $75,900."

This process is so out of reason as to need no comment, were it not that one not accustomed to appraising might momentarily be misled. Take the first lot furthest west, $40,000. Next lot, $44,000, an increase of 10%. Net lot, $50,600, an increase of 35.% Next lot, $60,720, an increase of 55%. Finally, the lot next to the corner, $75,900, an increase of 80%.

The absurdity of this whole proposition is too apparent. Can you tell me any block in New York City where a lot 90 ft. from a corner is worth a certain figure, the next lot toward the corner 10% more, the next lot 35% more, the next lot 55% more and the next lot 80% more. I will admit that you will find great difference in values in certain blocks; for instance a lot on 34th st contiguous to Broadway is many times more valuable than a lot on the same street located in the same relation to 7th av, but it will be found instead of this process of evolution that the lots shortly after leaving Broadway will all have a certain fixed value, not a difference of 10, 35, 55 or 80%. When you leave Broadway values will decrease but adjoining lots will remain of the same exact value or approximately so. As I have stated, inside lots in a block are worth a certain figure and corners and lots adjoining corners are worth more, varying from 10% for lots adjoining corners to 25 to 100% for corners; but not by any process of evolution.

An element of value in plots is known as plottage. Where two or more adjoining lots are in one ownership the plot had an additional value of "plottage" by reason of the following facts, first, a large plot is suitable for a large improvement which can be produced at a less cost in proportion than several separate buildings; second, the larger building will produce more rent and can be more economically managed than several smaller ones. This theory I adopted when I testified in the case of the 69th Regiment Armory site, and the commissioners upheld me. It was reversed in the Supreme Court, but was upheld unanimously by the Appellate Division.

For the last dozen years I have made a specialty of expert appraising—a lucrative business, but a most difficult one—for the reason that the appraiser in testifying is very often confronted by an array of lawyers, all of whom are prepared to hurl questions at him, some that are most unexpected. In a case of this kind it requires even a more careful preparation, a thorough knowledge of the neighborhood and a study of the surroundings, than any other class of appraisals. In this way only will the appraiser be forearmed for the merciless cross examination which he will have to undergo. My experience has been that if an appraiser has thoroughly prepared his case that he can withstand the onslaught of the lawyers, as his experience gives him a thorough practical knowledge of the matter, while that of the lawyer must necessarily be theoretical.

In testifying, an appraiser is confronted by many so-called rules for appraising property. I have never found any rule that will apply to any great number of cases. The Tax Department has certain rules for appraising a lot of greater depth than the standard lot 100 ft. deep. Then there is another rule for appraising a short lot known as the Hoffman rule. This rule is impracticable at this time. I doubt even its practicability at the time that Judge Hoffman established the rule, which was, I think, in 1866, but of one thing I am thoroughly sure, it is not practical at this time. A short lot must be valued according to the conditions that surround it. The Hoffman rule seeks to give a greater value in proportion to a short lot than a standard lot. As an illustration it gives a value to a part of a lot 25x50 of $6,700 when a full lot is worth but $10,000. In a tenement house district, it is scarcely necessary for me to say, that a part of a lot 25x50 cannot be adequately improved under the new Tenement House Law. In such a case I really believe that a part of a lot of this kind instead of being worth 60% of the full lot I doubt if it is worth even 50% of a full lot. There are a number of instances throughout the city where I could point out its utter impracticability. It is based on no scientific principles and is merely an arbitrary rule. However, there has recently been an amplification of this rule by Henry Harmon Neill, Esq., the real estate editor of the Mail and Express, which is based on scientific principles and in cases where such a rule is applicable I would unhesitatingly recommend it instead of the Hoffman rule.

There is, however, a rule for appraising leaseholds which I think is pretty well established. This rule is: Capitalize the value of the leasehold property at the time of the execution of the lease on the basis of the rental at four, five or six per cent., as the case may be; ascertain the fee value of the property at the present time, the difference between the two signifying the difference in fee value.

Calculate on a four, five or six per cent. per annum basis as the case may be on the difference in the fee values for the unexpired term of the lease and the result will be the value of the unexpired term of the lease.

## Rapid Transit for Queens.

Public disclosures of plans are probably not remote for two more rapid transit contemplations, for crosstown routes, and, of course, underground. Representatives of the Rapid Transit Commission, it is said, are obtaining consents from property owners along Jackson and Borden avs, in Long Island City for a subway construction.

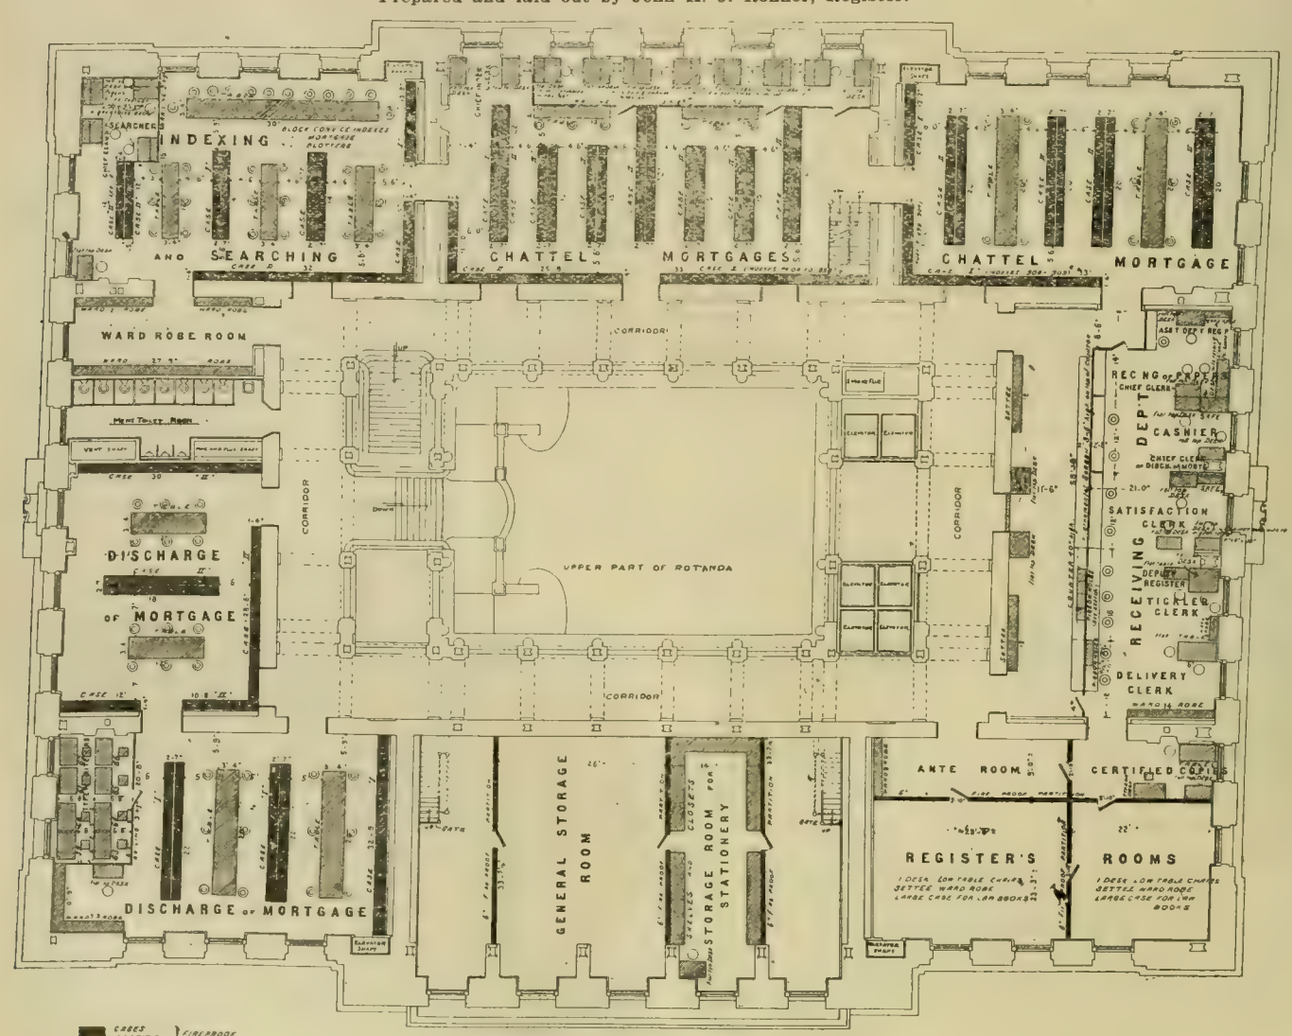
Evidently it is the intention to give Long Island City an underground route to Manhattan earlier than was generally supposed. One tunnel and subway route, which has been officially established, provides for a subway through Jackson av, crossing Newtown creek and connecting with a subway in Williamsburgh, which enters a tunnel to go under the East river at 14th st, New York.

There is also on the records of the Rapid Transit Commission a plan for a Manhattan crosstown subway through 34th st from (1) 1st av to 9th av; and (2) from 9th av to the Hudson river; and (3) from 1st av, and running thence easterly under private property and the East river to the Borough of Queens and under private property along Borden and Jackson avs to a connection with a future subway on Jackson av.

From the statement of those who are obtaining the consents of the property owners to this latest subway scheme, it will be directly under municipal control and is to form another direct communication between Queens and Manhattan, but the parties interested do not discuss, with any great degree of freedom, the general details of the scheme.

# THE COUNTY'S REAL ESTATE RECORDS

## Immensity and Difficulties of the Work in the Register's Office



By J. H. J. RONNER, the Register of New York County

SOME criticism has been made lately of the Register's Office and its administration. As to the office itself it has been said that it is inadequate and unfit and that the records are not as accessible as they should be. This criticism, as far as the office room and facilities are concerned, is only a repetition of what has been said without effect at intervals for years past. It was to provide a proper place for recording real estate transactions and for the custody of the records that the new Hall of Records—so called—was authorized. Whether this building, now under years of construction and reconstruction, will fulfill its avowed purpose, is not a question for me to pass on. More than two years ago I had plans prepared under my personal direction for the office in the new building, that is, for the space that it was proposed to assign for the Register in the Hall of Records. This plan was in detail. It might perhaps as well never have been made—certainly not so far as the administration of the office during my time was concerned. I have no information as to when the Hall of Records will be completed.

When the old Hall of Records, totally unfit for the office of Register, was abandoned, the local authorities provided the present quarters at 116 Nassau st. They are lacking in almost every essential accommodation for the convenient and orderly transaction of business; yet criticism is made because there has not been expedition recently in the return of recorded papers. While the present accommodations seemed, when they were obtained, reasonably satisfactory in a temporary sense, yet the business of the office has increased to such an extent, through legislation and natural evolution, that the floor space occupied is not half large enough for the proper performance of the duties of the Register. No matter how the business increases it has to be performed, and under, of course, more and more disadvantageous circumstances, with the present surroundings, as it increases.

The question has been asked recently, "Why doesn't the Register provide himself with a larger force when he needs it?" This can be answered by saying that the Register has little or no control over the number of persons he can employ, which matter is dealt with by the Board of Estimate and Apportionment in the annual appropriations. The Register can only employ as many persons as an appropriation provides for. Just at present it would be next to impossible to employ an increased force, for the reason that there is no room. It is said to be historical that register succeeded register in the old City and County of New York and followed blindly in the footsteps of his predecessor, taking up the reins just where they were laid down, letting the office practically run itself, regarding it as automatic in operation and that it needed only his presence occasionally to keep it in perpetual motion. That this impression is a mistaken one, as far as the present administration is concerned, is shown by what has been accomplished during the past four years. It was not, for instance, automatic action that enabled me to effect a saving to the city of $47,187.21 in 1902, and of a substantial amount every year since, to the amount of $125,000 in lopping off sinecures alone. To this can be added another saving, estimated at $125,000, representing additional work performed without any corresponding increase of appropriation. When the

present administration is analyzed it will be found that the city has been saved $250,000, regardless entirely of increase of receipts, for which increase I of course take no credit.

IMMENSITY OF THE WORK.

Here are some figures taken from the Record and Guide, showing how the business of the office has increased in conveyances alone:

| Year. | Number of Conveyances. |
|---|---|
| 1898 | 14,097 |
| 1899 | 15,263 |
| 1900 | 14,587 |
| 1901 | 15,919 |
| 1902 | 17,268 |
| 1903 | 18,649 |
| 1904 | 24,641 |

These figures do not represent leases, contracts and miscellaneous papers generally.

Here follow some official figures, including conveyances and all papers recorded other than mortgages:

| Year. | Mtges. | Cons. | Total. | Folios. | Cash. |
|---|---|---|---|---|---|
| 1900 | 20,984 | 20,694 | 41,678 | 514,028 | $25,701.40 |
| 1901 | 20,804 | 22,172 | 42,976 | 528,648 | 26,432.40 |
| 1902 | 21,165 | 23,771 | 44,936 | 568,889 | 28,444.45 |
| 1903 | 23,478 | 26,221 | 49,699 | 616,147 | 30,807.35 |
| 1904 | 33,221 | 33,158 | 66,379 | 834,905 | 41,745.25 |
| 1905, 11 mos. | 42,210 | 40,084 | 82,294 | | |
| Dec. es'm't'd. | 3,300 | 3,500 | 6,800 | | |
| Total, 1905. | 45,510 | 43,584 | 89,094 | | |

A folio includes one hundred words. It will be seen that the number of folios recorded in 1904 was much more than fifty per cent. above the number recorded in 1901, and in that year more were recorded than in the previous year.

The appropriations made for the past five years are as follows:

| | 1901. | 1902. | 1903. | 1904. | 1905. |
|---|---|---|---|---|---|
| Register | $12,000 | $12,000 | $12,000 | $12,000 | $12,000 |
| Salaries, general administration | 164,840 | 144,900 | 148,840 | 148,840 | 158,840 |
| | $176,840 | $146,900 | $160,840 | $160,840 | $170,840 |
| Contingencies | 500 | 700 | 1,510 | 1,510 | 6,510 |
| Pres. pub. records, salaries | 19,300 | 12,600 | 12,600 | 12,260 | 20,620 |
| Libers | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |
| D'ftsmen's materials | 500 | 500 | 500 | 500 | 500 |

In 1902 I turned over to the City Chamberlain the sum of $111,972.73, an increase of $5,538.56 over the previous year, representing the receipts of the office. To this has of course to be added the sum of $47,187.21 previously spoken of as turned back to the city from the saving of salaries of employees rendering little or no service and who were dismissed by me when I took office.

The increase in the number of mortgages recorded during the first year of my administration was relatively as large of course as conveyances. There was a substantial increase, it will be noticed, in the matter of recorded conveyances in 1903, and any increase in this respect reflects an increase in every other branch of the office. Yet as a matter of fact the appropriation made for the office for that year was less than the appropriation made for the office for the year 1901.

The appropriation to the salary account in 1901 was $159,850; and for 1903 it was $156,900. The appropriation to salary account for the year 1904 was $160,840, just one thousand dollars more than it was in 1901. Yet the business of the office in 1904, taking the recorded conveyances item alone, not speaking of mortgages, releases, satisfactions and other miscellaneous papers recorded, SHOWED AN INCREASE OF MORE THAN SIXTY PER CENT. I naturally found it impossible to provide for this business within the limits of my appropriation, and after persistent effort secured a transfer of $5,000 towards the close of the year. If I had not got this, the recording of instruments affecting real estate would have been brought to a practical standstill. As it was, I was compelled to suspend temporarily the whole force of typewriters who do the actual recording. These men known officially as folio writers (being paid by the folio) are charged against the salary appropriation. They receive five cents per one hundred words, and the city (or rather the county in a bookkeeping sense) receives five cents also, the charge being regulated by law at ten cents a folio.

Taking the conveyance item alone in 1904, it meant, apart from the folio writers, that there were just so many more papers handled than in 1901. These had to be examined on presentation, had to be entered in the book of accounts, had to be verified for block and section numbers, had to be noted on the grantee book and the "tickler," and, in addition to being recorded, they had to be read, indexed and delivered to their owners. All this was done without one extra cent charged to the taxpayers, the small extra appropriation or transfer spoken of having been applied solely to the compensation of the typewriters, who are not salaried and are paid simply for the quantity of work they do.

It will be noticed by reference to previous figures that the conveyances in 1899 recorded in the Register's Office were 15,263, against 24,641 in 1904. As a matter of fact the total appropriation for 1899 was $143,575. YET, WHILE THERE WAS AN INCREASE OF BUSINESS OF OVER SIXTY-ONE PER CENT. IN 1904 OVER 1899, THE INCREASED COST OF ADMINISTRATION WAS LESS THAN SEVENTEEN PER CENT.

ABUSES CORRECTED.

Several abuses I found in connection with the office I corrected. For instance, it was almost a daily occurrence to have libers taken on subpoena, to court, before referees and elsewhere, for ostensible use in evidence. They were often removed by the cart load, with the result that in the first place a great deal of time of certain employees was used without compensation, and searchers were of course deprived of the use of these books while they were out of the office. I had an act passed requiring a court order before producing a liber. Strange to say, the court orders are few and far between, and libers seldom go out of the office now. Certified copies seem to be sufficient for all purposes.

An impartial and fair person can readily perceive that there must have been some noticeable changes in the office to bring about the results indicated, so far as these results are attributable to the register's control and supervision. It has been unnoticed in criticism that the register's duties have been added to by an act of last year, providing for the copying of the records at White Plains affecting the annexed district, and depositing them in the office of this county. They have to be handled and examined here at much inconvenience, but no extra compensation is provided for the register, nor is any more room provided for their custody.

Nowhere through this presentation of facts has mention been made of the papers filed and indexed in the register's office, including bills of sale, conditional bills of sale, chattel mortgages, etc. They average about 75,000 per year. Extra work in the matter of indexing has been given by legislation in the filing of certain papers, but no provision has been made for the increased labor. The act providing for the filing of the original real estate mortgage on satisfaction thereof is additional labor which has not been provided for.

And last but not least, as a burden to the present register, was the passage of the Mortgage Tax Law. This act required the establishment of a new bureau, which upset the general routine of administration in many respects. I was allowed only a limited force by the State Board of Tax Commissioners to carry out the provisions of the Mortgage Tax Law, and I cannot be held responsible for delays caused by the smallness of the force. It was absolutely necessary to secure additional room on the second floor of the building for the chattel mortgage branch and transfer it there. The third and fourth floors are used by the office proper. Additional room cannot be had very well, and even if it could, the office would be so scattered over the building as to cause much more inconvenience.

There has been some censure on the ground that the indexing was very much behind. It is true that the general block index and the alphabetical index fell somewhat behind because of the extraordinary and unprecedented amount of business with no added force to cope with it. Nevertheless, it is a fact that every instrument could be found indexed immediately in the "tickler," or day book, and the block blotter and the alphabetical blotter, and that the indexing now of every character is up to date.

The day before the Mortgage Tax Law took effect nearly three thousand papers affecting real estate were recorded. This was the largest number of papers in the history of the office recorded in one day. These papers had to be examined on presentation, to see that they were properly acknowledged, the time of recording and the charges had to be marked thereon, and collected; bookkeeping entries attended to, the block and section of each instrument verified, entries made in the grantee book and in the "tickler." The last detail was not completed on that day's papers until four o'clock the following morning, the clerk's voluntarily working until that hour so as to have no aftermath on the next day.

In conclusion I may be permitted to say that I leave office satisfied with my own efforts to give a good administration, and believing also that it has the approval of every fair minded person competent to pass judgment upon it.

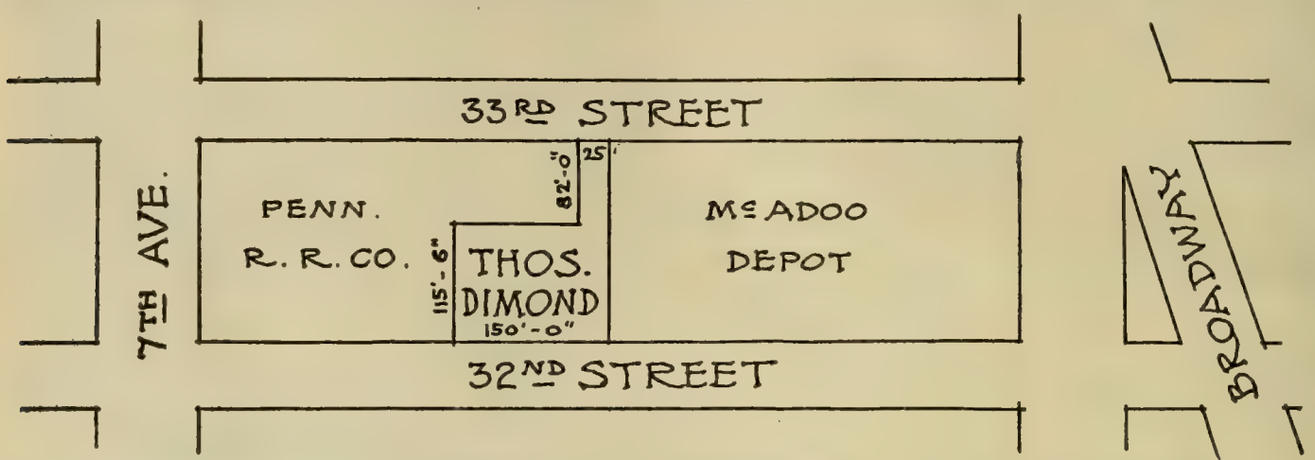
Some one who has counted avers that over a hundred new-law tenements are in course of construction in the East Side district between 59th and 72d sts. and east of 3d av. They will provide shelter for ten thousand more people, as living is in that quarter, and will confirm the local political opinion that there must be at once a rearrangement of Assembly district boundaries. Vacancies are few in the neighborhood.

## A Remarkably Valuable Location.

Within the last two weeks there has been created a noteworthy addition to the city's list of peculiarly shaped and peculiarly situated properties—that owned by Thomas Dimond in the block bounded by Broadway and 7th av, 32d st and 33d st.

Mr. Dimond, moreover, has to a very large extent had "greatness thrust upon him" as he now finds himself, through force of circumstances, sandwiched in between the terminal sites of the Pennsylvania and the New York and Jersey Railroad companies. With no great activity on his part, he has come to occupy the position of being the only private owner left in the block mentioned, at least, this is his prospective position.



The Pennsylvania has bought and holds title to all that part of the block west of his holdings, while W. G. McAdoo's Company has either bought or begun condemnation proceedings against all the property to the east, including the Broadway frontage. Mr. Dimond's plot now includes No. 128 West 33d st and Nos. 137 to 149 West 32d st, with frontage 25 ft. on the former and 150 ft. on the latter. The 32d st lots, however, are 115.6 ft. in depth, so that the area of the entire plot is very nearly 20,000 sq. ft., or eight lots.

That the holdings of this one owner were not covered by the condemnation proceedings of the New York & Jersey Company caused not a little scratching of heads, until some observer pointed out that the westerly line of the properties affected by these proceedings is exactly 400 ft. west of Broadway, or from east to west, the middle of the block. Hence it must be that the other. Real estate opinion is also shaping itself along new lines in giving to 32d st perhaps a greater degree of importance than 33d st. The main entrance to the Pennsylvania station, on its easterly side, will be opposite 32d st, and the latter is likely to attract, for this reason, a larger amount of crosstown traffic than 33d st. It is also looked upon as possible, owing to the great volume of this traffic, that the blocks between Broadway and 7th av will reach a higher scale of value than the corresponding blocks between Broadway and 5th av.

## The Fashionable Residential District.

NO. 1.

There have been many evidences of late of a revived interest in property situated in the fashionable residential district on the East Side. Everybody who follows the New York real estate market will recollect that during 1901 and 1902 the activity in the whole private residential section as far north as 92d st and as far south as the fifties was tremendous. Owing to a combination of favorable circumstances large advances took place in the price of real estate in this vicinity, and these advances were helped by a lively speculative demand both on the part of the operators and on the part of builders. The demand was so excellent that builders erected many houses costing from $200,000 to $500,000 each and found little difficulty in disposing of them to men whom the current prosperity had enriched. In both of these years plans were filed for over 100 dwellings which cost on the average of almost $65,000 each, and

two corporations, which are known to be closely allied, had reached an agreement to divide the block equally and that the Dimond property would soon be gobbled up by the Pennsylvania as part of its share. The Pennsylvania representatives, however, have assured Mr. Dimond that they are "all through," and on its face it seems impossible that, had they wanted these lots, they would not have waited until the public announcement of the McAdoo Company's plans at the other end of the block had added probably 33 1-3 per cent. to the value of his property.

Mr. Dimond, it may be added, is perfectly willing to be left alone, and to enjoy the unique position of owning the only property in this city and probably in the world that is flanked on either side by a railroad terminal, so that by "going next door" in one direction he can take a train for Chicago, and in the other have at his disposal, ultimately, a large part of the city's subway system.

So little of reliable character has become public concerning prices in connection with the railroad buying in this block, that it has been difficult to form any adequate idea of the advances which have taken place within the last five years or of its present level of values. "Al" Adams is said to have received $750,000 from the New York and Jersey Railroad for his property running through from Nos. 110 to 114 West 33d st to Nos. 117 to 123 West 32d st, in all six lots, at the rate of $125,000 per lot; and it is a matter of some interest to know that the purchase last March by the Pennsylvania of the Smith properties at Nos 130 to 134½ West 33d st was made at the rate of $112,000 a lot. This plot, which measures 75 by 82 ft., or about 2½ lots, was sold for $278,500. Speculative interest in these blocks between Broadway and 7th av has already afforded some idea of what professional operators regard as their ultimate importance.

The Pennsylvania project alone was sufficient to stimulate values greatly, but since that undertaking was put forward there have been other developments which, in the aggregate, promises to have an almost equal degree of influence. The 6th av subway and those proposed for 7th av and 34th st, the trolley lines on these three thoroughfares and on Broadway, and the 6th av elevated road—these will combine to make Greeley sq one of the greatest local transportation centres. Furthermore, this will be the great distributing point for hundreds of thousands of people brought to the city daily from Long Island in one direction, by the Pennsylvania Railroad and from the whole of North Jersey by the McAdoo tunnels in the the majority of these were planned and constructed as speculations by enterprising builders.

During 1903, however, there came a lull. There was no reaction in property values and the level of prices established during the previous years was not only maintained, but in some instances raised; nevertheless the "rich man's panic" which took place in that year and lasted through part of 1904 diminished the demand for expensive residences. The natural consequence was that builders no longer dared erect many additional structures of this kind, and if there was any building at all during 1903 and 1904 it was for the most part undertaken by people who bought and built for their own occupancy. In this way the situation was gradually improved. The existing supply of expensive residences on the market was absorbed little by little, and the way was prepared for additional building as soon as general conditions should warrant. It looks now as if general conditions would very soon justify a renewal of this class of speculative construction. There can be no doubt that the average man of means has much more money in his pocket than he had a year ago, and this fact has already had its effect. Every week sales are being made of expensive houses on the East Side which still further reduce the available supply of these dwellings, and by the time the spring comes this demand will undoubtedly become still more active and urgent. Under such circumstances there can be no doubt that property values will begin again to increase, and the few new houses which have remained unsold will be readily absorbed. Such is bound to be the case, because the area within which the fashionable residence district is contained is actually decreasing. It is constantly being diminished on the south by the encroachments of business, while on the east and on the north it is shut in by tenement house neighborhoods. Moreover, there is not the slightest tendency to create another similar district elsewhere in the city. People with social aspirations or position who want a well-situated private house convenient to their friends must buy upon the East Side; and there is no section of the city which can count more securely upon a prosperous future.

A representative of the Record and Guide called upon Mr. Collins, of the firm of Collins & Collins, of 718 5th av, in order to obtain his views upon existing conditions. He said:

"With few exceptions there are no business houses on 5th av above 47th st. The section from that thoroughfare up to 90th st is now and will always be, at least for years to come, the cen-

tre of fashion. There is very little property for sale, and consequently prices will advance as the supply is much less than the demand to-day. Business of course likes to get near a wealthy residential section, but the area I have spoken of will not, if ever, in my opinion, be invaded by commerce, owing to the peculiar advantages of the vicinity and its proximity to the park. The residence now being constructed by Mr. Kane at the northwest corner of 5th av and 49th st, and those of Morton F. Plant, William K. Vanderbilt, Jr., and Frederick G. Bourne, which are building at 52d st and 5th av, go towards bearing out this statement and confirming my views. Fifth av, opposite the park, from 60th st to 90th st, I reiterate will remain the same in the future as it is now as the highest class residential district. The only change will be that the few vacant lots remaining will be improved by handsome mansions, and prices will even advance above the high figures at which the property is held to-day. There are some who say," continued Mr. Collins, "that 57th st, east and west of 5th av, will one day be devoted to business, but so long as its four corners are in the hands of strong men like Whitney I consider such a transformation doubtful."

## Cement and Concrete Interests.

The annual business meeting of the National Cement Manufacturers' Association was held at the Hotel Astor on December 11, 12 and 13. Seventy-eight members were present, with President J. B. Lober, of Philadelphia, in the chair. A dinner on Tuesday evening and a smoker on Wednesday morning were features of the occasion. At the election, the principal officers were re-elected for the coming year, including President Lober and Treasurer Ackerman. The secretary is C. Earle Bottomley, Land Title Building, Philadelphia.

Reports from the field concerning the course of trade were to the effect that during the year there has been a gradual recovery from the extremely unsatisfactory conditions of the previous two years.

A recommendation was adopted in regard to the charge for cotton bags, which it is expected will be generally followed in the trade. Heretofore the price of cement has been quoted by manufacturers to dealers in bulk, with a separate charge for the cotton bags. In actual practice it has been found that the dealing divided itself into two accounts—the account for cement and the account for the package in which it was shipped. (Four-fifths of the material is now delivered in this city in cotton bags.) The dealer paid for his cement, but let his bag account accumulate, as bags are returnable, though wood is not. It was decided, because of the trouble and inconvenience to which the separate charges have given rise, to hereafter include the cost of the package in the charge for the cement, whether it be for cement in cotton or cement in wood, and of course in each case the charge will be by the barrel.

It is known that the leading companies will follow this recommendation, and it is expected that all will do so. For example, one of the big houses is sending out a notice to this effect: "Cotton sacks bearing our brand returned to our mill will be purchased at 7½ cents each, subject to mill count and inspection."

The new Concrete Association of New York has adopted a constitution, with by-laws, in which it appears that the object of the association shall be to encourage and to develop the intelligent and scientific use of cement, concrete and steel reinforcement, concrete machinery, to standardize methods of construction with a view to obtaining best results, to promote social intercourse and to secure an exchange of views upon subjects of interest; to reform abuses relating to the various industries represented by the membership of the association, to obtain and diffuse accurate and reliable information relating to all matters affecting the concrete industry and to establish and maintain a permanent exhibition of its various productions and manufactures.

The executive committee met on Thursday evening of this week and appointed standing committees, particularly the committee on membership, which will proceed to put the association in thorough working order. Two classes of membership have been provided. First, the active membership, which consists of all individuals or firms which have their capital invested directly or indirectly in the cement or concrete industry. Second, the associate membership, which will permit of the admission of professional men, such as architects and engineers and those who have no capital directly invested in the concrete industry but whose work is allied with it or who are particularly interested in the subject. There will also be enrolled in the associate membership firms outside of the immediate jurisdiction of the Concrete Association, it being the intention to have as large an outside membership as possible, so that those engaged in the industry in various parts of the country may make the Concrete Association of New York their headquarters and have all the privileges thereof.

The committee on exhibition will proceed in due course to arrange for a permanent exhibition where there will be gathered together the representative products of the cement and concrete industry, including machinery and reinforcing material. There will also be a library of photographs and a collection of data where those interested may find drawings, photographs and all necessary information, so as to enable the inquirer to become thoroughly posted as to any particular phase of the industry in any part of the world.

The present officers of the association are as follows: Ross F. Tucker, of Tucker & Vinton, president; H. C. Turner, of Turner Construction Co., first vice-president and chairman of the Committee on Building and Insurance Regulations; H. C. Miller, of H. C. Miller & Co., second vice-president and chairman of the Committee on Membership; W. W. Benson, of the Standard Stone Co., third vice-president and chairman of the Committee on Permanent Exhibit; T. G. Barr, of the Vulcanite Portland Cement Co., secretary; Ronald Taylor, of Ronald Taylor & Co., treasurer.

## Waiting for Builders.

INTERESTING SITUATION AT NORTHERN END OF THE ISLAND—DEVELOPMENTS WAITING UPON COMPLETION OF MUNICIPAL AND CORPORATE IMPROVEMENTS.

KINGSBRIDGE sits amid her historic hills complacently waiting for the home-builders, somewhat disappointed that they have not yet appeared, but certain that the future will bring them in large numbers. Two years have passed since the attention of the real estate public was generally directed toward Kingsbridge by the unfolding of the surprising plans of the New York Central for the electrification of its railroad lines; for when these plans were studied in connection with the intentions of the Subway system it was perceived that the village and surrounding section would be most distinctly benefited, would be made a most important junction and transfer point—the veritable northern gate to Manhattan Island—and would be brought into intimate traffic communication with the rest of New York, instead of remaining beyond the limits of daily accessibility. It then became apparent that the residential advantages of Kingsbridge would be so improved as to eventually attract a large population.

A consequence of the revelation was a speculative movement in lots which has temporarily subsided, but which was very pronounced for a time on Fort Washington and in the Dyckman tract. Though much milder in Kingsbridge proper, still it was formidable to local ideas. Lots in great number have been sold, but nearly all for professional speculation. In Kingsbridge village no house has been erected in five or six years, and scarcely any in the district round.

Locally two reasons can be heard for the postponement of building operations; and one is the delay in finishing the Subway. Not until the new rapid transit is in operation will there be tangible development, many believe, and they support their assertions by a reference to recent history in the East Bronx. Others assert that values are already too high for the class of improvements which might have been expected as the first fruits of the Subway.

"No doubt in due time all values will be justified," said one authority, "but in my opinion quotations for sites are too high for the sort of improvement that naturally would have been the first. We were looking for the home-builder, and he has not come, and it is too early to expect the multi-family house. I think there will either be a lowering of prices, or a considerable interval of time before the innumerable lots now in the market will be wanted for use. Prices for sites have about doubled in a year, and it will take some time to educate builders up to their new level, I'm thinking."

Plans were filed last week by the New York Central Railroad Company for a small temporary building to be erected in 225th (Muscoota) st, near Broadway, a building which is to answer for a passenger station until the union depot is completed, as the present Kingsbridge station is soon to be abandoned with that part of the main line sweeping around Marble Hill, in favor of a short cut which will straighten the line, relieve Kingsbridge village of seven dangerous grade crossings and establish a joint depot in connection with the Subway on the north side of the Ship Canal. Being anxious to use the short cut as soon as possible, the Central is erecting this temporary shelter in advance of the completing of the Subway and of the consummation of arrangements with the Rapid Transit Commission. Sometime next spring the Subway trains will be speeding to Kingsbridge, though the line may not then be fully complete, but sufficiently so for beginning operations. The two approaches to the bridge over the Ship Canal are already finished, and are paved; and the draw span, which is being erected on false work at the foot of 215th st, will be in position probably before the Fort George section of the Underground is ready for trains.

### GREAT CROSSTOWN HIGHWAY.

Two Hundred and Twenty-fifth st (heretofore locally know as "Muscoota st") has been made the subject of proceedings in the Local Board and the Board of Estimate with the object of widening and continuing it eastward across the head of the Harlem River (on the line of the former Farmers', or Hudley's Bridge), to a junction with the Kingsbridge road on the east

shore; and as the road unites with Pelham av in Fordham sq, there will thus be formed a straight and continuous highway from the Sound to the New York Central and Subway depot at Marble Hill, and possibly in the future to the Hudson River at the Hendrik Hudson Memorial Bridge. Other important changes in the map will follow, and citizens have already outlined a general plan which includes a proposal for the city to buy from the New York Central its rights to the abandoned section of Spuyten Duyvil Creek and fill it in for an athletic field, similar to the one at McComb's Dam Bridge.

Population will centre, it is believed, around the new railroad depot, and accordingly the apex of values is there. Broadway at that stragetical point will therefore be the business centre of the territory that is known generally as Kingsbridge, and the population will be dense enough to support permanent brick and stone apartments. It would be difficult to induce any owner along Broadway to part with his holdings, and one is reported to have refused $50,000 for four lots, while another turned from an offer of $60,000 for a plot covering five lots. Marble Hill's streets are in part paved with asphalt blocks, some are in course of paving; all are in good condition, ready for building operations on a large scale. Lots on Broadway are said to be worth on an average $10,000, and on other streets in the Marble Hill section, $4,000 is given as a typical quotation. Values diminish from the centre of interest at Broadway and 225th st to the circumference of the circle, where they are still in the realm of possibility for cottage builders. Kingsbridge village, which is in the Bronx, while less prepared for expansion than Marble Hill, which is in Manhattan, is yet central for a neighborhood which has many desirable qualities for a place of residence.

THE ORACLE OF MARBLE HILL.

"It must be borne in mind," commented Mr. Richard Alexander this week, "that the upper end of Manhattan has so far been in the suburbs, and has always required a change of cars and two fares in order to reach it. But the Rapid Transit will give it a thirty-five minute trip to the Battery—so Engineer Parsons has assured me—for a small fare of five cents; and instead of being suburban it becomes uptown property. Now we must consult time tables, but soon we shall cast these aside and board the first train coming along. I believe, as to the nature of the building to be expected, that the Marble Hill section will be built up largely with stores, flats and apartments, while across the Spuyten Duyvil, in the Bronx, when street improvements are sufficiently completed, there will be a building movement for one and two family frame cottages, except on Broadway, where brick construction will be resumed.

"The easterly part of the Dyckman tract is valuable owing to its water front. At Harlem River and 201st st I have sold to the Edison people an entire block of land for a future large plant to supply light and power for the Dyckman tract and the country around. Naturally, the territory between 9th av and the Harlem will be occupied by manufacturing plants requiring water-front facilities, and these works will cause the building of 9th and 10th avs and the cross streets with stores, flats and tenements. The Dyckman tract is the only level land left north of the Harlem on the Island of Manhattan, and virtually another 'Harlem' it will be.

"The west side of the city, I have noticed, is always slow in developing compared with the east side, but the improvements are generally better," was Mr. Alexander's concluding comment.

Immediately east of the new railroad station at Marble Hill is a section known as the Bailey estate which is now being developed; a number of private residences are in course of erection. While in Kingsbridge village there is yet no building, Mr. A. O. Whaley, the local real estate agent and broker, has figured personally during the year in the sale of twenty parcels, aggregating sixty lots. Every house and apartment in the place at all desirable is rented; indeed the inquiry greatly exceeds the supply. At 230th st and Bailey av, in Kingsbridge, a rapid transit station is planned, and property for it there has been condemned. The site is close to the present station of the Putnam division of the New York Central and Hudson River Railroad. Kingsbridge will benefit by the abolition of numerous grade crossings which will follow from the diverting of the New York Central tracks to the north shore of the Harlem Ship Canal.

From fifteen hundred to two thousand dollars would include the individual cost of construction for most of the houses in and around Kingsbridge, they being of the detached frame type and built in times when materials and wages were lower. There are many fine sites for private residences, which have the first place in the hopes of land owners. On Sedgwick avenue, which is likely to be the one most preferred for residences on the east side of the village, lots are held as high as $3,500 for inside positions, and $4,500 for corners.

Kingsbridge road sites rank equally in value with those in Sedgwick av. Lots on Bailey av could have been bought for $1,200 each two years ago, but are now held at $2,500 to $2,800. Lots in Boston av and Albany av—which run into each other and form a horseshoe—are worth from $2,000 to $4,000 each. Two years ago the same lots were obtainable for 50 per cent. less.

## Delayed Rapid Transit Hurting the Heights.

A meeting was held at the office of E. Osborne Smith & Co., 181st st and Amsterdam av, on Wednesday night, to form an association of property owners to insist upon the opening of the Subway stations at 168th and 181st sts. On the strength of the reports given out by the Rapid Transit officials a great many property owners have spent hundreds of thousands of dollars in buildings and land in that section, with the expectation that these two Subway stations would be opened not later than this fall, as was promised; consequently there are several fine flats awaiting tenants. If the Subway were running there would be no question but these houses would be filled. Tenants that moved up there on the first of May with the expectation that the Subway would be running this fall, are moving back below 157th st, as they know the inconvenience the property owners are put to in the winter time by the blocking of the 6th and Amsterdam av and the 3d av cars. There is no other way of reaching north of 157th st on Washington Heights, except by these surface cars and the Subway, which is not running.

The name of the new association is "The Washington Heights Property Owners' Association." E. Osborne Smith, the temporary chairman, says: "We expect to have an enrollment of over 100 members within the next week. The object of the Association is for the betterment of transit facilities on the upper end of Manhattan Island, and especially to urge the opening of the Subway stations at 168th and 181st sts, the opening of which is the salvation of the property owners in this section."

Delegations from the Washington Heights and also from the North Manhattan Taxpayers' Associations waited upon the Rapid Transit Commission this week, appealing for an immediate opening of the road north of 157th st. Speakers declared that the Subway was completed to King's Bridge and that tracks were being used for switching and car storage purposes. The stations at 168th st and 181st st are not yet completed, and this, it is declared, is the only reason the entire line is not working.

Chief Engineer Rice was instructed to have the line opened at the earliest possible moment.

## Banquet for Bronx Brokers.

The Association of Bronx Real Estate Brokers, which was organized in December, 1904, will celebrate the anniversary at a dinner at the Schnorer Club, in 163d st and Eagle av, on Thursday evening, December 28th, at 7:30 o'clock. The headquarters of the association, together with the Bronx Auction Room, is in the Morris Building, corner 149th st and 3d av, where a large number of very successful sales have already been held. Among the speakers and guests of honor invited will be Hon. George B. McClellan, Hon. Louis F. Haffen, James L. Wells, William R. Hearst, Ernest Hall, Hon. Wm. M. Ivins, William McAdoo, R. H. Mitchell, Hon. William T. Jerome, J. Homer Hildreth, Hon. Julius Mayer, Olin J. Stephens, Esq., Charles J. Hughes, Esq., J. S. de Selding, Esq., Simeon Ford, Esq., Samuel M. Clemens, Esq., Rev. Gibson W. Harris.

The officers of the Assocation are: J. Clarence Davies, President; Gen. Geo. Chappell, Vice-President; Benjamin F. McQuay, Secretary; Matthew Anderson, Treasurer.

## Personal Mention.

Architect Harry T. Howell, 3d av and 149th st, the Bronx, left on Friday, Dec. 15th, for Covington, Ky., on a brief business trip.

Ex-Register Thomas J. Kenna, who was for many years a figure in Democratic politics in Brooklyn, died on Sunday night at his home, 240 Madison st, Brooklyn. Mr. Kenna was born in Manhattan in 1844.

Edward Atkinson, LL. D., Ph. D., a man of high aims and purposes, and of many scientific activities, died at his native place (Brookline, Mass.), December 11, 1905, aged 78. He was renowned as a statistician, as a sociologist, and as a great writer in the realm of political economy. Locally he was at the time of his death the head of a fire insurance company and the director of the insurance engineering experiment station at Boston.

James Franklin McKinney, who will become a member of the law firm to be established by Controller Grout on the expiration of his term of office, is a Flatbush man, living at 660 East 21st st. Mr. McKinney is a member of All Souls' Universalist Church, is married, and has one child. The new law firm, of which Edward M. Grout, Paul Grout and Mr. McKinney will be the members, will have offices at 111 Broadway, Manhattan, and 189 Montague st, Brooklyn.

# THE REALM OF BUILDING

## Prospective Building.

(To be continued.)

The following is a list of building enterprises for New York City that may be expected within the year 1906. For some, plans are now under way; for others, no architects have yet been selected; and in some cases the sites have not been secured. The first name is the owner's; the second, that of the architect; the third, the contractor's; the date is the date of announcement in the Record and Guide.

OFFICE AND LOFT BUILDINGS.

Trinity pl, Nos 56-66 Greenwich st, Nos 91-101 Rector st, Nos 8-12 (over 7 lots) | 20-sty office building; United States Express Co, 49 Broadway; Thomas C Platt, president; Clinton & Russell, 32 Nassau st; The Thompson-Starrett Co, 49-51 Wall st; foundation started April 9, 1904.

Church st, w s, between Cortlandt and Fulton sts | number of stories not decided; Hudson and Manhattan Tunnel Terminal Building; Hudson and Manhattan Railroad Co, 111 Broadway; W G McAdoo, president; Clinton & Russell, 32 Nassau st. Contract not let; plans unsettled. Sept 30, 1905.

West st Cedar st Albany st | 28-sty office building; Railroad and Iron Exchange; West Street Improvement Co, 277 Broadway; General Howard Carroll, president; Cass Gilbert, 79 Wall st; The John Peirce Co, 277 Broadway; April 22, 1905.

### Churches.

8TH AV.—St. Savior's Catholic Church will build on plot, 100x247 ft., on 8th av, near 6th st, Brooklyn. The Rev. C. E. McDonnell, D.D., is Bishop of Brooklyn.

Thomas Brennan, Poughkeepsie, N. Y., general contractor for church to be erected at Poughkeepsie, N. Y., for the St. Andrew's Novitiate, is taking figures on all sub-contracts.

FULTON ST.—The Protestant Episcopal Church of New York has commissioned Messrs. Bosworth & Holden, of No. 1170 Broadway, to prepare plans for an 8-sty parish house, 80x115 feet, to be erected at the northwest corner of Fulton av and 171st st.

### Factories.

B. T. Babbitt (Inc.), manufacturer of Babbitt's Soap, is building the largest soap works in the world on the Hackensack River and the Erie R. R., at Granton Station, N. J., now called "Babbitt, N. J." These works are being constructed on a plan which will give them unsurpassed facilities for the handling of the raw material in and the manufactured product out. The tracks to this plant, decided upon after the officials of the Babbitt company and of Erie Company had been on the ground, are such as to give facilities hardly equalled by any works in the East. The tracks lead off with a 10° curve so that the largest locomotive can operate on them. The plant covers a very large acreage, and concrete, laid on piling, is being used in the foundations to a large degree. There will be fourteen large buildings, of various heights and ground dimensions. Architect, Charles W. Aiken; general contractor, John W. Ferguson & Co., of Paterson. Soap will be boiling there in six or eight months.

BEGINNINGS OF BABBITT'S NEW SOAP WORKS AT GRANTON, N. J.

### Mercantile.

BROADWAY.—Building operations will not be commenced for some fifteen months yet for the new 25-sty office structure which Mr. Felix Isman, of No. 604 Chestnut st, Philadelphia, Pa., will erect on a plot 118.6 ft. on Broadway and 98.6 ft. on 33d st, in Herald sq. No plans have yet been prepared or architect commissioned. William Steel & Sons, of 1600 Arch st, Philadelphia, Pa., have been Mr. Isman's architects in previous building operations.

### Alterations.

MOTT ST.—Pietro Pelnso, 161 Mott st, will make alterations to 161 Mott st, to cost $5,000. Louis Faresin, 193 Bleecker st, is making plans.

3D AV.—B. W. Berger & Son, 121 Bible House, are making plans for alterations to No. 2140 3d av, for W. R. Baar, 13 West 56th st, to cost $5,000.

5TH ST.—Edward A. Meyers, 1 Union sq, is making plans for alterations to No. 327 East 5th st, for Albert E. Lone, 230 Grand st, to cost $5,000.

70TH ST.—No contracts have been awarded for $15,000 worth of alterations to the 4-sty residence, 128 East 70th st, for T. J. McLoughlin, 1123 Broadway, for which C. B. Brun, 1 Madison av, is architect; 4-sty rear extension, 11x20x26, new front, partitions, etc.

### Miscellaneous.

The trustees of Barnard College contemplate the erection of a new $300,000 dormitory building.

Messrs. Fay & Dryer, 62 East av, Rochester, N. Y., want bids on a 4-sty fireproof hospital building, 46x158, for the Rochester Hospital Association, to be erected in that city.

It is stated that the Dreamland Amusement Co. will spend $125,000 in erection of buildings at Atlantic City, N. J. G. Neagley, E. Kern and A. Neurnburg, of Trenton, are interested.

N. Serracino, 1133 Broadway, New York, is preparing plans for a new school building in Boston, Mass., on North Bennett st, for the Franciscan Fathers, owners. The school will be fitted up with all modern sanitary arrangements.

BROADWAY.—Archibald D. Russell, 52 Wall st, and P. R. Pyne, 36 East 36th st, inform the Record and Guide that no definite plans have been settled upon for the improvement of the old Colonial Club property, southwest corner of Broadway and 72d st.

Messrs. Mowbray & Uffinger, 92 Liberty st, Manhattan, are architects for the following building projects in the Borough of Brooklyn: Association for the Improvement of the Condition of the Poor. Nos. 104-106 Livingston st, extensive alterations and moving building back 30 ft. on account of Livingston st widening. Church Charity Foundation, Albany and Atlantic avs, new porches, sun parlor and stairways.

### Estimates Receivable.

Estimates are wanted by Martin W. Littleton, President Borough of Brooklyn, until 11 a. m. Dec. 20, for the construction of public bath at 4th av and President st, Brooklyn.

25TH ST.—No contract has yet been awarded for the 4-sty loft building, 125x55, which the Warner Realty Co., 516 West 25th st, will erect at Nos. 516-520 West 25th st, to cost about $10,000. Geo. M. McCabe, 2 West 14th st, is the architect. Brick, terra cotta coping, tin roof, steam heat, etc.

### Contracts Awarded.

Milliken Bros., No. 11 Broadway, have received the steel contract for the Pennsylvania Railroad Terminal Station and power house.

21ST ST.—C. Dunne, 330 West 26th st, has awarded to J. A. Lacey, the iron work for the new 11-sty loft building, 50x82.10, which Mrs. Josephine D. Robinson, 34 West 9th st, will erect at Nos. 18-20 West 21st st, at a cost of $100,000. No other contracts have been given out.

110TH ST.—The Hennebique Construction Co., 1123 Broadway, has obtained the reinforced concrete contract for the 9-sty fireproof apartment house, 75x90, on the north side of 110th st, 100 feet west of Broadway, for the 110th Street Company, of which Messrs. Snelling & Potter, 1170 Broadway, are architects.

### Bids Opened.

John Kenny, Jr., 39 Cortlandt st, was low bidder ($22,070) for widening the bridge over the New York & Harlem Railroad at 177th st.

Bids were opened Dec. 11 at the office of the Fire Commissioner for the construction of a building for hook and ladder company on 135th st, near Lenox av, New York. P. Gallagher, 1181 Broadway, submitted the lowest bid, at $40,896. All bids for the extension of the 13th Regiment Armory, Brooklyn, were rejected by the Armory Board. The architect's estimate was $92,500, while the lowest bid was $119,800, this bid being $11,000

lower than the next lowest. Owing to the fact that the low bid was based on an error, all were rejected.

Bids were opened by the Board of Education on Monday, Dec. 11th, for the general construction, etc., of additions to and alterations in Public School 34, the Bronx; Patrick Sullivan, at $129,600, low bidder. ## BUILDING NOTES

W. & J. Sloane have the sole contract for decorating and furnishing the Belmont Hotel. Joseph H. Bromley has the order for every lace curtain in the house.

The annual meeting and dinner of the Electrical Trade Society, of New York, was held at the Imperial Hotel, Broadway and 31st st, New York City, at 5.30 p. m., Dec. 12.

The Frank Hagny Co., contractors steam, hot water heating and ventilating, removed from Sullivan, Ill., to this city, offer their services from their office in the St. James Building, 1133 Broadway.

At the New York Furniture Exchange the furniture exposition will open on January 16 and close February 3, and for that time over two hundred leading furniture manufacturers will display their lines.

The National Blue Print Co. has removed its offices from 13 West 22d st to larger and more commodious offices in the Century Building, 33 East 17th st, on the north side of Union Sq, where the firm will be glad to see old friends.

Property owners in the Bronx and Brooklyn, feeling that there is need of a radical reform in the legal routine and excessive expenses connected with street openings, are organizing associations with the object of introducing a bill in the next Legislature.

Louis F. Haffen, the Bronx Borough president, having resigned as the Democratic political leader in the Thirty-fifth Assembly District, a member of the architectural profession, Michael J. Garvin, has been chosen as his successor. Mr. Garvin is the architect of the new Bronx Court House to be built at 161st st and 3d av.

After an occupancy of over twenty-three years at the foot of East 107th st, the old-established firm of J. Reeber's Sons, dealers in second-hand building materials, moved their offices and show rooms to what was formerly a branch yard at 3d av, 139th and 140th sts, Bronx. At the new yard will be found a large stock of doors, windows, timber, bluestone, store and office fixtures, gas fixtures, desks, etc., in great variety. Communications and telephone messages will receive prompt attention. Telephone 1999 Melrose.

The York Safe & Lock Co., of York, Pa., has recently succeeded to the business formerly conducted by J. M. Mossman in New York City, of the sale of safes, vaults, vault doors, safe deposit boxes, fireproof and burglar proof safes and safes for storage of household silver. They carry on the business at the old established headquarters of J. M. Mossman, Nos. 70-74 Maiden lane and 5-9 Liberty st, and have recently secured the contract for building the burglar-proof vault work in the Title Guarantee and Trust Co.'s new building at No. 176 Broadway.

—It is a frequent practice nowadays for manufacturers to offer prizes for various competitions in design and color work of different kinds, in order to obtain suggestions and different viewpoints from students in art and design schools, which can be made use of in various ways by the manufacturers. Recently, for instance, the Alabastine Company, of Grand Rapids, Michigan, manufacturers of the sanitary wall coating, offered $250 in prizes for the best designs in color for interior wall decorating. The competition proved to be interesting and helpful to the students, who find that time in off hours devoted to work of this sort is well worth while for the practice it affords, even if all do not succeed in winning one of the numerous prizes offered. School directors are inclined to encourage the prize competition idea, because it interests and stimulates the students.

The fact that there is always room for high grade building material is well illustrated in the success of the imported enamel paint called Ripolin. Notwithstanding the higher price, its practical use has proved economical and the results appear to be highly satisfactory to the architects and builders who use it. Certainly there is nothing more beautiful than either the flat or gloss surface it gives to woodwork or plaster. We find it well represented, not only on the better class of buildings, but equally well distributed amongst the more moderate class of apartment buildings and speculative work. The paint line is not the only one which offers plenty of room for improvement. Ripolin has been used in the following well-known buildings. The Tiffany Building, Mt. Sinai Hospital, new Hall of Records, Brooklyn, National Park Bank, new Hotel Gotham, Sloane Maternity Hospital. J. A. & W. Bird & Co., 31 Union Sq., are the New York agents.

### The Electrical Show.

There are great possibilities in the idea of an electrical exhibition annually in this city, and no doubt in time the idea will be developed in a manner to adequately represent every interest of importance in the field of electricity. It can scarcely be said that the exhibition now open in Madison Square Garden is the best possible product of the electrical manufacturers of America, or that we are willing to have it compared, in bulk, in organization, in variety or in scope, with the great exhibition recently held in London. It must be regarded rather as a more or less accidental collection of things electrical, even though each entry may be the best of its kind.

No one would say on the opening night that the display measured up to even the local importance of the electrical trade, but still it was a very pleasant attraction to a great many people. The signal for the opening came from the President's hand at the White House. One of the handsomest exhibits was contributed by the New York Telephone Company, and one of the most practical and most observed was a switchboard in the booth of Waterbury & Co., manufactured for the Harlem Hospital to the order of the E.-J. Co., of 13 East 30th st. Several manufacturers displayed electric cooking and heating apparatus, which claimed much attention from women; W. Green & Co.'s noiseless new dental laboratory and household motor lathe was judged a useful machine, principally because it is so easily portable. It can be used for polishing, buffing, drilling, grinding, turning and sawing. Other prominent exhibitors were the Philadelphia Electrical and Manufacturing Co., Roger Williams, the New York Novelty and Manufacturing Co., the Moore Electrical Co., the National Meter Co., the Electrical Construction and Manufacturing Co., the Safety Elevator Co., and the Kursman Block System Co.

### Supt. Hopper on the Proposed Revision.

While disappointed that the Mayor vetoed the fireproof wood amendment, architects and builders are agreed that a revision of the whole Building Code is necessary, as the Mayor proposes, but great care should be taken in selecting the committee of revision.

Isaac A. Hopper, Superintendent of Buildings, said that under date of July 15, 1904, he had written to Mayor McClellan urging changes in the Building Code and that he had continuously advocated revision since that time.

"I am very glad the Mayor has taken the matter up," said Mr. Hopper. "As matters now stand our building laws are confusing. We have sections in our published code which have been amended and are no longer in force, but they remain in the published code.

"I have found it necessary to issue a separate pamphlet on signs and billboards, for instance, as the provisions now are entirely different to those in force when the code was adopted.

"The fireproof wood requirement should be modified. Fireproof wood is not entirely satisfactory, as it is not actually fireproof; but it is a good retardant."

"Revision is needed," said Richard M. Hunt, president of the Architectural League. "Many provisions of the present Building Code are obsolete. There are contradictory clauses and many sections that are unsatisfactory. The laws should be revised and brought down to date."

### American Plans in Canada.

The Ontario Association of Architects and the Toronto Architectural Club have presented a memorial to the Government asking that a duty be levied on foreign plans. Foreign plans of course means plans from the United States; and the reason why Canadian architects want a duty placed upon them is that the United States is virtually closed to Canadian architects, while practitioners on the border are in the position of being exposed by their own Government to the attacks of a foreigner whose Government effectually protects him from retaliation. In the large cities it is the prestige of New York that is the trouble; the promoters of anything larger than usual are not satisfied unless they have a New York or Chicago architect; and the architects of Montreal and Toronto think that this process ought to be made to cost something.

The Canadian tariff schedule now suggested is as follows:

"Each set of original drawings or single set of copies or blue prints of same, if brought into Canada as a substitute for the original drawings 40% of the architect's fee—the architect's fee

THIS illustrates the Power House of the Metropolitan Railway Company, at 96th Street and East River, New York City. It is considered, both from architectural and mechanical standpoints, one of the best examples of its class of building in this country. Among the several highly commendable features of this structure, the Architectural Iron Work, including window frames and sashes, stairs, railings, etc., all manufactured and installed by the **Hecla Iron Works,** stand out boldly as master specimens of mechanical handiwork.

**The Hecla Iron Works are recognized as the first and foremost concern in the manufacture of Architectural Metal Work in the World. The plant is the largest and most complete, and the quality of its work is considered the standard, the world over.**

North 10th, 11th and 12th Sts., from Wythe Ave. to Berry St., Brooklyn, N. Y.

being 2½% on the estimated cost of the building—for working drawings and specifications. The same if accompanied by full details or for full details afterwards furnished 40% of an additional fee of 1% on the estimated cost of the building. When additional sets of copies or blue prints of the same set of drawings are imported, such additional sets of copies or blue prints are to be valued for duty at $5.00 per set in addition to the value of the original drawings, copies or blue prints. A declaration to be taken that such sets are merely duplicates of drawings or copies or blue prints already imported."

It is conceded that the result arrived at is not revenue for the Government but protection for the Canadian architect, and the alternative for the superior American architect, should the tariff be replaced, is to double his fee for Canadian commissions, assured that his Canadian clients will willingly pay the difference for the better work.

### The Limit in Wages.

The high cost of building and the effect it will ultimately produce is a subject upon which there are two opposing opinions, one which foresees no diminution of building until the congestion in Manhattan is counteracted by the full completion and operation of the system of corporate and municipal railroad extensions and improvements now in course of construction, and another opinion which apprehends a reaction owing to sheer inability of the tenantry to justify and support costs by paying the higher rents required. The Brooklyn Times quotes a borough builder's interesting views in these words:

"Wages have about reached the limit and the sooner this fact is realized the better. In recent years the cost of building has gone up at an appalling rate and the builders have been blamed. As a matter of fact, the blame should be laid on the shoulders of the material men and the labor unions. It costs as much to build one house to-day as it used to build two in the palmy olden days. Ten or fifteen years ago it did not take an immense amount of capital to go into the building industry. Where it requires hundreds of thousands of dollars to-day it used to require only a few thousands. Now all is changed. The prices of building materials have advanced anywhere from 25 to 50 per cent. and wages have gone up to an even greater extent. There are unskilled laborers to-day who are getting as much as many skilled artisans used to receive not so long ago. The builders have decided to fight any further demands on the part of organized labor and they are in a better position to do it to-day than they ever were before. There are strong employers' leagues in both Manhattan and Brooklyn which are in splendid fighting trim just now. Of course, a strike anywhere in Greater New York would be more or less of a hardship now, as there is a lively boom in progress and even greater things are promised. But it is better not alone for the builders, but for the world in general to put up with temporary financial losses than to enter into any contracts that would increase the cost of building to a greater extent than it has already been increased."

### High Water Mark for Kings County Acreage.

Howard C. Pyle & Co., 199 Montague st, report the sale of a farm of about twelve acres, having a frontage of about 500 ft. on Coney Island av running through to the Brighton Beach Railroad, between Avs K and L for Henry J. Pain to an investor, having frontage also on each side of East 12th, East 13th, East 14th and East 15th sts and both sides of Av K. This farm contains about 190 lots. While the actual price is not divulged, it is said to be about $12,500 an acre. This is unquestionably the highest price ever paid for acreage in Kings county, and it is considered one of the most important sales of the season. Mr. Henry J. Pain, representing Pain's Fire Works Company, purchased this property ten years ago at the price of about $2,000 per acre. This is a potent illustration of the wonderful enhancement of land values in Kings county.

# REAL ESTATE NOTES

Frederick Fox & Co., real estate brokers and agents, have removed their offices to 793 Broadway, opposite Grace Church.

gate rental of about $230,000. The lessee is the Childs Unique Dairy Co. and was represented by the Willard S. Burrow Co. in the negotiations. The lessee already occupies 1485 Broadway, adjoining the Victoria Theatre, and the acquisition of the additional parcel will give them a frontage of 40 ft.

Chas. E. Duross has leased the new building now being erected at the southeast corner of Gansevoort and West sts for the Cincinnati Cold Storage Co. to the Manhattan Refrigerating Co. for a term of sixty-three years. The Cincinnati Abattoir Co. are erecting a 6-sty fireproof building with a ground area of 92,000 sq. ft., the lower floor to be used as a beef salesroom and the upper floors to be used by the Manhattan Refrigerating Co. for cold storage purposes. The new tenants expect to take possession of the building on April 1, 1907; also has leased the 5-sty tenement, with store, 640 West 55th st, for Greenstein & Mayer to H. Howell for a term of years.

At a dinner to Herman A. Metz, Controller-elect, at the City Club, among the speakers were Controller Grout, Edgar J. Levey, former Deputy Controller and chairman to the Mayor's advisory commission on finance, and now president of the Title Insurance Co., President Austen G. Fox, and Dr. E. R. L. Gould. The prevailing sentiment in the speeches was "Repeal the Mortgage Tax Law." Mr. Levey said that the fact that the city was no longer able to sell its bonds at an advantage was due largely to the passage of the Mortgage Tax Law. The dis-

Tuxedo, N. Y. HOUSE OF MR. RICHARD MORTIMER. Hunt & Hunt, Architects.

Well-equipped, with large experience and excellent prospects, Mr. H. Taylor Sherman, formerly with the Greene & Taylor Co., has opened a real estate office and begun business under his own name at 542 5th av, southwest corner of 45th st.

### Bath Beach and Bensonhurst Ask for Subway.

About 250 persons attended a meeting held last Friday evening at Supper's Hotel, Cropsey av and Bay 22d st, Bath Beach, under the auspices of the newly organized Bensonhurst and Bath Beach Subway Association. F. A. Hutson was in the chair, and T. E. Clark recorded.

The object of the association is the extension of the proposed 4th av subway from Fort Hamilton, through Dyker Heights, Bath Beach and Bensonhurst to Coney Island. Many took part in the discussion. It was decided to have a committee appointed to wait on the Rapid Transit Commissioners and ask for the subway on the New Utrecht av route.

Among the members of the organization are: W. G. Perfect, Charles McLaughlin, John H. Bade, Miles McNamara, Charles P. Strakosch, Charles E. Teale, A. V. B. Voorhees, Cornelius Furgueson, J. Lott Nostrand, Charles E. Conrady, Alderman Linde, Rev. Alfred H. Brush, Rev. William Gardiner, Rev. Charles E. Benedict, Rev. Alfred Hodgetts, Rev. Louis Happ, Rev. Joseph McInnes, Dr. James W. Malone, Dr. Robert F. Ives, Dr. Earl Mayne, Dr. J. A. Voorhees, Dr. J. E. De Mund, Dr. Frank A. Duffy, Cromwell G. Macy, William J. Brown, Walter L. Ryan, James P. Connell, J. V. Van Pelt, James E. Bale, Charles E. Popp, W. H. Woods, Herbert Reeves.

### Will Develop Hollis Tracts.

Incorporated under the name of the Queens Borough Development Company, a number of well-known men have bought 470 acres of land along the line of the Long Island Railroad, between the Hollis station and Queens village. The property comprises all the land along the line of the railroad for a distance of three miles. It is the purpose of the company to develop the tract in a manner similar to that pursued at Prospect Park South, which is highly restricted.

Among those interested are former Governor Black, W. M. Griffith, Frank Squires, Otto Kelsey, Representative James S. Sherman, Judge John Woodward, Frederick D. Kilburn, Ralph Peters, Timothy S. Williams and H. C. Duval.

The Grenoble Realty Company, of Brooklyn, of which Dodd & Greene are the principals, are also planning extensive improvements at Hollis, where they own a large tract of vacant land.

### Company Buys at Winfield, L. I.

The Hudson Realty Company has purchased from Lydia L. Rappelye eighteen acres at Winfield, L. I., fronting on Maurice and Fisk avs.

Whitehouse & Porter have sold for George Gould to John Cheney the Gould homestead at Huntington Bay, L. I., comprising thirty-two acres of high ground overlooking the bay.

Burrill Brothers have sold the following houses: 216 8th av, corner 2d st, for Harry Kennedy for $20,000; 98 Windsor pl, for Andrew Peters for $6,000; 180 Garfield pl, for E. Wilson for $8,000; 499 13th st, for James Hurley for $9,000.

Frederick Morgenthaler sold to George E. Payne thirty-six lots in Long Island City, with frontage in Fitting, Helser and Stone sts. The property is situated between Skillman and Middleburg avs, near Woodside. A lumber yard will be located on the ground.

HEMPSTEAD, L. I.—A new $50,000 school building will be erected at Hempstead, L. I. The village authorities will receive bids for the erection on or before January 15, and work on the structure will be commenced as soon as possible after contracts are awarded.

WOODMERE, L. I.—At a meeting of the Union Free School District, it was decided to build a $7,500 addition to the schoolhouse. A special election will be held on Friday evening, January 12, to decide the question.

### Queens Asking for Parks.

President Andrews, of the Citizens' Public Improvement Association of Long Island City, in advocating the immediate laying out of public parks in Queens, contends that there should be a public park in the vicinity of every public school. "The grand public parks north of the Harlem River made the Borough of the Bronx," says Mr. Andrews. "Millions of visitors journeyed to those sections on Sundays and holidays, and soon became familiar with the Bronx. As a result a great percentage of these strangers became residents of that Borough, and they brought their friends and their friends' friends. Public parks are a necessity in a great city. The population of Queens is bound to advance in great jumps. In the building of a city parks are an absolute necessity. In Queens now there is to be found a beginning of a great building operation which means a housing of thousands of families and the development of a section that will within a short time outclass in population any other city in the State of New York."

At the last meeting of the East Flatbush Taxpayers' Association, Dr. George W. Brush, chairman of the Subway Committee, presented a very satisfactory report on the subway extension. "At the hearing before the commission," he said, "it was proposed by the Comptroller, with the approval of the Mayor, that the city acquire the strip of land on the east side of Ocean av, from Malbone st to Parkside av, extending back to the tracks of the Brighton Beach Railroad, so that the plans be altered so as to shift the tracks to this point instead of going under the park. This would save the trees, and give the strip, after the completion of the subway, for park purposes. The plan met with the favor of the committee, and the chief engineer was instructed to prepare the map as speedily as possible. As soon as this is done, the matter will be acted upon by the commission, and before January the whole matter will be settled." Dr. Brush said that the Comptroller had promised him that he would do all he could do to further the work. Mr. Bassett and Mr. Wilson made remarks favoring a change in street opening proceedings, and the hope was generally expressed that all civic organizations in the different boroughs would join in a reform movement in this respect.

### THE GOTHAM'S MACHINERY PLANT.

In the new Hotel Gotham, on Fifth avenue, opposite the St. Regis, five 200 h. p. boilers generate the steam supply. From the header which connects all the boilers, a 12-in. main runs to the engine-room, but from there continues as a six-inch main for feeding the auxiliary apparatus. Four generating sets, of which three are 160 k. w. capacity and one of 75 k. w., are driven by direct connected, non-condensing engines. Direct current is generated at 240 volts potential, and the light and power service is operated on a 2-wire 225 volt system.

The white marble switchboard (built by the Crouse-Hinds Co. of Syracuse), is set in a bronze frame and made up of five panels laid out as follows: panel No. 1, distributing switches; panel No. 2 and panel No. 3, generator panels; panel No. 4 and panel No. 5, service switches. The wiring system is divided into three divisions for "public," "service" and "bedroom," and there are somewhere near six thousand lamps. Motors run washing machines, meat choppers, freezers, silver buffing machine, dishwasher, various laundry machines, pumps, twenty ventilating fans and vacuum cleaning apparatus. There are five Plunger passenger elevators and four service lifts. Six elevator pressure tanks, are 18x4x6 ft., and the intermediate house-pressure tank is 10 ft. high, and 6 ft. in diameter.

The General Building and Construction Co., which is part owner of the hotel, is the general contractor.

The Ontario Clayworkers' Association held its yearly meeting at Hamilton, Ont., Dec. 13th and 14th. President, G. W. Moody, Highgate, Ont.; secretary, C. H. Bechtel, Waterloo, Ont.

# CONVEYANCES

Whenever the letters Q. C., C. a. G. and B. & S. occur, preceded by the name of the grantee, they mean as follows:

1st.—Q. C. is an abbreviation for Quit Claim deed, i. e., a deed wherein all the right, title and interest of the grantor is conveyed, omitting all covenants and warranty.

2d.—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or encumbered.

3d.—B. & S. is an abbreviation for Baragain and Sale deed, wherein, although the seller makes no expressed consideration, and thus impliedly claims to be the owner of it. The street or avenue numbers given in these lists are, in all cases, taken from the insurance maps when they are not mentioned in the deeds. The numbers, it will occasionally be found, do not correspond with the existing ones, owing to there having been no official designation made of them by the Department of Public Works.

4th.—The first date is the date the deed was drawn. The second date is the date of filing same. When both dates are the same, only one is given.

5th.—The figures in each conveyance, thus, 2:482—10, denote that the property mentioned is in section 2, block 482, lot 10.

6th.—It should also be noted in section and block numbers that the instrument as filed is strictly followed.

7th.—A $20,000—$30,000 indicates the assessed value of the property, the first figures being for the lot only, and the second figures representing both lot and building. Letter P before 2d figure indicates that the property is assessed as in course of construction.

## MORTGAGES

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given and the amount. The general dates used as headlines are the dates when the mortgage was handed into the Register's office to be recorded.

Whenever the letters "P. M." occur, preceded by the name of a street, in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date.

The first date is the date the mortgage was drawn, the second the date of filing; when both dates are the same, only one is given.

Subscribers will find mortgages in this list with the wrong block number attached. The block number we give is taken from the instrument as filed.

Mortgages against Bronx property will be found altogether at the foot of this list.

Dec. 8, 9, 11, 12, 13 and 14.

THE real estate market has not been quite as active during the past week as it was during the week before; but, considering the approach of the holidays, such a diminution is only natural. The business transacted has, however, preserved the same varied and wholesome character. The chief centers of activity continue to be the fashionable residential section on the East Side, and the area affected by the Pennsylvania Terminal. According to the Sun, speculators are directing their attention more than formerly to Seventh avenue and the streets adjacent to it, because they believe that more money is to be made on Seventh avenue at present prices than on Sixth avenue. Such may be the case; but what property on Seventh avenue in this vicinity needs is some incontestable evidence that it will abandon its present rather disreputable uses and will become an active and respectable business thoroughfare. Once it becomes evident that the avenue is available for improvement with a good class of business building, values will advance rapidly, and a large realty company could effect such an advance merely by announcing its intention of improving a large parcel purchased on the avenue. Improvement of this kind is bound to come eventually, because the Seventh avenue is too central to be passed by in the business growth of that part of the city; but the process could be very much accelerated by enterprising operators. There continues to be a steady absorption by builders of property on Washington Heights, and another improvement has been announced for the Dyckman tract. Once the ball is started in this vicinity, it will roll rapidly and increase as it rolls. The syndicates who are holding large amounts of property thereabouts cannot do better than to encourage a building movement at the present time. The result would soon justify some temporary sacrifice of money in order to make both builders and residents accustomed to the vicinity.

IT is announced that the site proposed for the new Brunswick Hotel will be improved at an early date with a twelve-story loft building, and that is probably the most sensible disposition which can be made of the property. The changes of the last few years have diminished the value of the block front as the site for a hotel. It is doubtful whether even New York could provide profitable patronage for such hotel any time during the first five years after its construction, because the Knickerbocker, the Belmont and the Plaza will all be opened in the meantime, and will take care of any increase of hotel business. Then, inasmuch as the tendency is all in the direction of situating every kind of popular and fashionable residence further up town, the proposed Brunswick would have suffered in competition with the new Plaza. The time has gone by for building anything but business buildings on Fifth avenue and Broadway south of 34th street. It might have been supposed that the Brunswick property would have been bought as the site for a retail dry goods store of high grade; but here again the location lies somewhat south of the best district for such improvements. The decision to build a loft building is in line with the current development of that part of Fifth avenue. The area south of 23d street on which such buildings can be erected has become very much restricted, and we believe that hereafter such buildings will gradually be built on all available sites between 23d and 34th streets on Fifth avenue, Broadway and Madison avenue, and perhaps on Fourth avenue and Seventh avenue as well. Of course the high price of land on Fifth avenue and Broadway will tend to send many builders farther west and east; but certain sites on both of these thoroughfares will be available for loft buildings.

THE tribute which Controller Grout received from his official associates during the past week was well deserved. During the four years in which he has been at the head of the Finance Department of the City of New York Mr. Grout has made a record for himself which has not been equalled by any man who has held the office during the past thirty years. The duties of this office are peculiarly exacting. Its incumbent is primarily responsible for the economical and honest disbursement of the city's money according to the prevailing laws and ordinances, and Mr. Grout has performed this duty with careful vigilance and with uncompromising devotion to the public interest. In addition, however, the office requires a man to be something more than the city's financial policeman. As a member of the Board of Estimate and of the Rapid Transit Commission, Mr. Grout has stood throughout for a wise method of expenditure and for a sound municipal policy. It is during his term of office that a method was found to diminish the strain upon the revenues of the city caused by an overgrown sinking fund, and in this way to save over $8,000,000 per annum. It was also during his administration that funds were provided for absolutely necessary city improvements by a general levelling up of the assessed valuation of the real estate in New York. It is safe to say that, without these two financial reforms, the business of the city would have been terribly, almost fatally, hampered. Mr. Grout's work on the Rapid Transit Commission has been equally valuable. As a member of the Plan and Scope Committee, he played an important part in laying out the comprehensive scheme of subways which will be constructed hereafter, and he had much to do in determining the wise policy of the Commission in respect to the claims of the several interests which expect to bid for these transit extensions. In short, he has shown throughout his career an admirable mixture of conservative and progressive ideas. He has given to New York a competent business administration of the city's financial department, and his retirement will be received with the utmost regret by the taxpayers of the city.

COMMISSIONER McADOO is right in insisting that the temporary ropes which have been placed upon the squares of Manhattan in order to regulate the street traffic, should be replaced by permanent posts. The existing police regulations in this respect have been entirely justified during the past year, and arrangements should be made to keep them permanently in force. Such regulations are always annoying to a few people, but they undoubtedly serve to make the flow of traffic at these congested points smoother. They are rendered absolutely necessary by the stupid planning of our public squares. When these squares were laid out, the streets were allowed to run into each other without the slightest prevision of the congestion which would be eventually caused by such a lay-out, and the whole purpose of the regulations is to divert the traffic away from points of intersection, and to make it take its course around rather than across the squares. This is just what an intelligent plan would have done; and as an intelligent plan could only be substituted now at an enormous expense, these traffic regulations are the next best thing. They should be permanent and effective by means of stone monuments.

PRESIDENT TATLOCK, of the Washington Life Insurance Co., has extraordinary ideas about the comparative safety of different investments. He believes it good financial policy to allow insurance companies to speculate in stocks; but he thinks that real estate investments for insurance funds are unwise because real estate was about the "most speculative form of investment known." But if this is so, is it not strange that the savings banks lock up such a large fraction of their assets in real estate mortgages? The obvious answer is, of course, that, although money can be invested rashly in real estate, as it can be in any form of security, real estate in the central districts of such a city as New York is the safest form of investment in the world. When an insurance company lends, as the Washington Life did under its former management, over 100 per cent. of the value of a piece of property on that property, it is, of course, making a very dubious investment; but it is hardly fair to confuse loans of that kind with any kind of safe and conservative investment. The truth is, that urban land values are the most stable conceivable form of property. To buy unimproved real estate in a large city and on a large scale

is about as much of a gamble as betting upon a royal flush. If ten years ago a large life insurance company had been allowed to invest $100,000,000 in improved real estate in "live" districts in New York, it is safe to say that, provided these investments had been wisely made, the property would now be worth at least $75,000,000 more. During the past fifteen years there have been certain declines in real estate prices on streets such as 125th street, Grand street and the Bowery, but, with these and one or two similar exceptions, all New York real estate is more valuable than it was, and some of it is immensely more valuable. The investment of a certain share of the assets of permanent corporations such as a life insurance company in income-producing urban real estate would be, in the long run, of enormous benefit to the policy-holders.

## The Merger of the Century Realty Company.

SINCE 1902 there has been no tendency to increase the number of corporations with large capital making a business of speculative and building operations in New York real estate. The only new corporations of any importance organized during the last few years are the City Investing Company, of which Mr. Robert E. Dowling is president, and the Bankers' Investing Co.; and the first of these companies represents certain interests which formerly operated under another name. To balance this addition to the number of real estate corporations, the Century Realty Company has been bought out by the United States Realty Company, so that the number of large realty corporations remains much the same as it was in 1901. Of course many companies with small capital are organized for the purpose either of holding certain important parcels of real estate or for smaller speculative operations; but the big corporation as a factor in New York real estate operations is less of a factor than it was a few years ago.

Neither is it hard to find a good reason for the lack of growth in the number of such corporations. They are, after all, only a convenient machinery, whereby the operations of certain skilful and shrewd buyers of real estate are financed; and the number of large corporations is consequently restricted by the number of big operators who can be trusted to manage them. Operators of this class are not numerous, and they never will be; and apart from their skill and good judgment, there is no special virtue in the holding and buying of real estate by corporations. Certain corporations mean simply particular groups of men. The old New York Realty Corporation had behind it practically the same group of men as those who are now interested in the City Investing Company. And the purchase of the stock of the Century Realty Company by the United States Realty & Construction Company means that the group of men, headed by Mr. Chesebrough, who have been so successful in the management of the Century Company have now allied themselves with the group of men interested in the United States Realty Company.

It is an open secret that the operations of the Century Company have been, during the past few years, peculiarly successful. Mr. Chesebrough and his associates have shown and are showing good judgment in selecting sections in which to operate, and in making their purchases before prices had advanced so high that the chance of immediate profit was reduced to a minimum. They have made a great deal of money in the district west of Broadway and south of Cortlandt street and in the district including the business part of Fifth avenue, 34th street and Long Acre square, and finally in vacant land made more accessible by the Subway. In every one of these cases they bought at the right time, and as often as not they sold at the right time. The consequence is, both that the stock of the company paid exceedingly good dividends, and that its book value became very much greater than the amount of cash which was originally subscribed. It sells out at a handsome profit for all who were fortunate enough to invest in its stock, and the wisdom of its refusal to join the original merger of the large real estate corporations is made manifest.

The acceptance by Mr. Chesebrough of the vice-presidency of the United States Realty Company doubtless means that hereafter the bigger corporation will play a more important part in the New York real estate market. For some years past it has not been actively engaged either in buying or selling. It has been using its resources in improving valuable parcels of real estate, such as the Plaza Hotel and the Boreel Building, which it already owned. These improvements are still far from completed, and another year or more must elapse before the company will be deriving its full income from these investments. But, after they are completed, the United States Realty Co. will have either improved to advantage or sold all the real estate accumulated under its former management; and it must now provide opportunities for future operations. It looks, consequently, as if, during the winter and the spring, this company would again become one of the most important buyers of large parcels of real estate. Whether in making these purchases the corporation will stick to its present policy of buying only for improvement or whether it will pursue the more speculative programme which the Century Company has pursued in the past remains to be seen; but, in any event, its purchase of the stock and the holdings of the Century Co., and the new element which has been added to its management will increase the public confidence in the strength of the organization.

# "APPRAISALS"

By JOHN M. THOMPSON

PART TWO.

The appraisal of water front property is so different from ordinary appraisals as to be in a class almost entirely by itself.* To value the upland lots is not difficult due weight being given to its contiguity to the water front. The land under water is more difficult to appraise and it necessitates a study of the grant under which the riparian rights were acquired. It depends very much upon the amount of improvement necessary by the grantee before he can avail himself of the privileges of the grant. The value of a bulkhead is not so difficult to establish. The Charter of the City of New York (see Section 859) provides for the amount of wharfage and dockage which shall be received and also provides for the number of boats that can lie at any wharf at any time, so that these facts being given it is merely a question of how much the bulkhead can earn. However, the grant itself, as I have stated, is the governing factor in cases where riparian rights are involved.

It is always a difficult matter to appraise interior property. By interior property I mean property in the center of a block that has no ingress or egress.

There was a recent case tried in this city in which no decision has been reached where a man owned a triangular piece of property in the rear of the centre line of the block; he also owned two lots fronting on a street; these lots connected with the triangular portion. The owner claimed that by reason of this connection with the street which was the most prominent of the two streets that the value given to the interior plot should be of the same value as that of the value on the prominent street. To illustrate more clearly, let us suppose the owner owned two lots on 23d st each 100 ft. deep and a triangular plot in the rear, the point of which reached nearly but not quite to 22d st. The contention of the owner was that this triangular portion should be given the value of the 23d st property by reason of its connection with it. I took the other side of the question and claimed that the triangular portion should only receive the value of the 22d st lots. Had this triangular portion no ingress or egress whatsoever I would have appraised it as interior property and would probably have deducted one-third of the 22d st value had it not been for this connection on 23d st. While I was not willing to value the property as 23d st property, still having in mind its connection with the 23d st property I allowed full value on 22d st, although it had no frontage on that street.

Another difficult problem is that of consequential damage Consequential damage arises where a man may own, say, ten lots, five on each street, and for some purpose eight of these lots are taken, leaving him with two lots, one on each street. Manifestly the value of these two lots remaining is not nearly so great as the value when in a plot, as they are not so susceptible of improvement. The same case, of course, would apply to property that is improved where a part of a building is taken; the remaining part of the building often is not so valuable in proportion as it was before part of it was destroyed.

One of the most interesting cases that I have had confront me was that of where a man owned some inside lots and by the widening of a street a portion of the inside lots remaining became a corner. The question then arose as to the measure of damage sustained by reason of the taking of this property. The owner's experts claimed that he was entitled to the full value of the property taken while on the other hand I first fixed the value of the property at the time of the commencement of the condemnation proceedings. I had maps drawn showing that while the condemnation proceedings would take part of the inside property it would leave the owner with a prominent corner, thus obtaining by condemnation what he could not obtain by purchase, as he had been unable to purchase the corner plot. In addition he gained a very wide avenue in front of his property and where the neighborhood had been dead the improvement greatly enhanced the property for business. In view of

*From a lecture before the Real Estate Class of the West Side Branch of the Young Men's Christian Association, December 12, 1905.

this change of situation, I valued the remainder of the property at a great deal more in proportion than I had the original property. I then deducted this value of the remainder of the property from the original value which I had given to the entire property, the difference in my opinion being the measure of damage sustained by the owner. I am sorry to say that this case is still undecided. My theory is somewhat supported, however, by the Charter of the City of New York as the Charter provides for this process of condemnation in acquiring wharfage property and why it should not apply to other properties I cannot see. A part of Section 822 of the Charter is as follows:

"The just compensation to which the owner of property taken under the foregoing provisions is entitled shall be ascertained and determined upon the following principles. If all the property of such owner is taken the compensation awarded shall be the fair and just value of the said property. If the property of the riprarian proprietor has been built upon or improved and if such buildings or improvements are upon a single tract contiguous to or adjoining lands under water or which were originally under water and used in connection therewith and part only of such property is proposed to be taken the fair and just value of the entire premises shall first be ascertained and then there shall be ascertained the like value of the premises in the condition in which they will be after the part is taken and the difference in value be it more or less than the separate value o the part taken shall constitute the measure of compensation."

Capitalization is the basic principle of valuing real property. If the land be unimproved, it is a question of the value of the land, the character of building that the neighborhood justifies, the cost of production and the income the property will produce when adequately improved. If the property be improved, the first thing to be done in arriving at the value is to fix the value of the land and then capitalize the property on the basis of its rental value, the difference between the value of the land and the gross amount as capitalized from the rental will give you the value of the building. Assuming the land to be worth $25,000 and the building—a tenement—rents for $6,500, I would capitalize the property on a basis of 10% or $65,000, and deducting $25,000 as the value of the land leave the value of the building $35,000. Of course when I denominate 10% I do not mean that this holds in all cases. It would depend on the character, kind and condition of the building, whether it were new or old, whether it were a loft building, a residence, office building or apartment house, its location and surroundings, and as to whether it was an adequate improvement or not. While I have said that capitalization is the basic principle of valuing real property, I do not wish to be understood as saying that it is the only means of ascertaining values, but in my opinion it is the most accurate way. It is seldom that the cost of construction or the cost to reproduce a building is what it adds to the value of the land. In other words, the land value being fixed, what will a purchaser pay for the property? As an illustration that the cost of construction will not add that amount to the value of the land, let us assume that the Waldorf-Astoria be erected at the corner of 2d av and 34th st, instead of 5th av and 34th st. It does not admit of discussion but that the market value of the building would be very greatly reduced, no matter what may have been the cost of construction.

The average ratio of rental to fee value differs; generally in an office building it is 8% gross, in an elevator apartment house 12%, in a flat or tenement 10%, in a residence 7%. Of course these ratios may vary. There are many cases where there is no revenue, as in the case of residences occupied by the owner, or business buildings occupied by the owner. It is then the duty of the appraiser to ascertain the rental of similar buildings in the same location. After long experience as an appraiser it is not difficult to appraise the value of a building or buildings from general knowledge, even if the rental value be unattainable. Sometimes the value can be arrived at by a certain cost per cubic foot on different classes of buildings, but I do not consider this a good method of appraising and would only advise its use when it cannot be avoided, for it is a return to a structural value and I think should only be adopted where the building is used for a specific purpose and the rental value is unattainable.

In conclusion, I would say that in order to keep posted on values I would suggest the adoption of a card index. It is expensive to install, difficult to keep in order, but invaluable in results. The best system I know of is the one adopted by many appraisers of clipping the record of sales from the Record and Guide and pasting them on cards. As each sale is pasted on a separate card they can be arranged by streets and therefore easily found. I think the clipping itself is a better plan than to make a copy of the transfer, for it has the advantage of being taken directly from the Record and Guide, thereby avoiding any chance of error in transcribing. While these records are not accepted by the courts as evidence, I can say that in my experience I have never known them to be refused in cases before referees, commissioners, etc., as evidence of a correct transcript of the deed.

I have with me a number of maps and diagrams that I have used in testifying. I think that they may be of interest to the class and I shall be pleased to show them to any one who desires to see them.

# Building Superintendent Estopped

## Appellate Division Decides Against Him in Wanamaker Fireproofing Case on Appeal—Trade Fixtures Not to Be Considered as Part of Permanent Construction

Upon appeal to the Appellate Division of the Supreme Court, First Department, the order of Special Term granting motion restraining and enjoining the A. T. Stewart Realty Co., its contractors and servants "from maintaining or placing, or erecting, or suffering to exist" in the new John Wanamaker building any dwarf partitions, shelves, platforms, cases and counters made of wood not covered with metal or not treated by some process approved by the Superintendent of Buildings to render the same fireproof, has been reversed, on the ground that the provision in the Building Code which the Superintendent sought to enforce does not refer to "store fixtures," such as these have by this court of appeal been adjudged to be. Section 105 is declared by the court to refer only to the permanent construction of a building. All five judges of the court concurred in the decision, which is here reproduced in full. It is not deemed probable that the case will be carried farther. The written opinion of the court follows:

The action is brought to restrain alleged violations of the Building Code. The defendant has nearly finished the construction of a building 217 ft. 6 ins. in height, consisting of fourteen stories covering the entire block bounded by Broadway, 4th av, 8th and 9th sts. It is to be used by the firm of John Wanamaker for a retail department store business. Following close on the heels of the construction work it appears that the building is being fitted up for the purposes of said retail business. It does not appear whether that is a lease or if so what are its terms. Nor does it appear whether the defendant is doing any of the work incident to putting in the trade fixtures or contributing thereto. It does appear, however, that the firm of John Wanamaker has already expended upwards of $100,000 in fitting the building up with the trade fixtures of which complaint is made. The provisions of section 105 of the Building Code defining a fireproof building and prescribing the material and method of construction are as follows:

(Here Section 105 is quoted).

The complaint is confined to alleged violations of this statute regulating the material and construction of "interior finish" other than the inside windows, window frames, sash, doors and trim. The learned counsel for the appellant contends that the dwarf partitions, shelves, platforms, cases and counters, of which complaint is made, are not part of the permanent structure, but are merely moveable trade fixtures and do not constitute "interior finish" within the purview of the statute. We are of opinion that this section of the Building Code only applies to the permanent structure. It was neither designed to regulate the use of buildings nor temporary changes and alterations, not materially affecting the permanent outside or partition walls, floors or ceilings, made for the purpose of conducting a particular business therein nor to prevent the use of moveable trade fixtures necessary or appropriate to such business. It was evidently intended to insure the construction of fireproof walls, ceilings, floors and all finish, exterior and interior, forming a permanent part thereof.

It is manifest that the object was to guard against the weakening of the walls, floors and ceilings, the combustibility of any part of the material or their construction. The sentence containing the words "other interior finish" clearly shows that they relate only to interior finish bearing the same relation to the permanent structure as that specifically designated. The interior finish specifically named in the same sentence forms part of the permanent structure. The operation of the words "other interior finish" must therefore be confined to interior finish in the strict sense of the words which limits them to those parts of the permanent structure known as interior finish.

The construction of which complaint is made is all store or moveable trade fixtures specially designed to facilitate the conducting of the retail department store business in the building conveniently and economically. None of it was included in

the plans and specifications filed and approved by the Building Department under which the building was constructed.

It is also alleged and contended by the respondent that Section 411 of the Charter conferred on the Superintendent of Buildings authority to control the moveable trade fixtures to be used in buildings; that pursuant to such authority he declined to approve of these fixtures unless they are covered with metal or are first treated by some process approved by the Board of Buildings to render them fireproof; and that the injunction order can be sustained on this ground, even though we decide adversely to his contention as to interior finish. That section is so long that we refrain from quoting it. It is true it does confer authority on the Superintendent of Buildings "to pass upon any question relative to the mode, manner of construction or materials to be used in the erection or alteration of any building or other structures . . . and to require that such mode, manner of construction or materials shall conform to the true intent and meaning of the several provisions of this chapter of the laws and ordinances aforesaid, and the rules and regulations established by the President of this Borough."

It is not essential that we should now decide whether the Superintendent could be given authority over moveable trade fixtures. It is quite clear that the authority intended to be conferred by this section mainly relates to the exercise of his judgment on questions of fact as to whether materials sought to be used is of the description and quality required. He is not vested with authority to decide, as he has attempted to do in this case, that trade fixtures are part of the permanent construction of a building and must conform to the requirements of law applicable thereto. If there be any statute, ordinance or regulation giving him jurisdiction over moveable trade fixtures, it has not been brought to our attention and it is evident that he did not assume to act thereunder.

It follows that the order should be reversed with ten dollars costs and disbursements and motion denied with ten dollars costs. (All concur.)

# FREE-RENT IN THE BRONX

## Concessions Necessary Oftentimes in Order to Fill High-Priced Apartments—Over-production of That Kind—Other Opportunities for Builders

TO what extent the practice of giving a measure of "free rent" for the sake of securing a tenant has been resumed in the Bronx, has been the subject of some inquiry, and it has been learned that the necessity of resorting to this old expedient has been laid upon a larger number of builders and owners of new houses than has been very generally supposed. Though the fruits of this year's construction work will not be fully ready for the rental market until next spring, a sufficient number of houses have been finished this fall and early winter to test in some degree the question if there has been any considerable change in the requirement for housing. That there is a decided difference is plain, but how much of it is only momentary and ascribable to the winter season, when ordinarily families do not change their places of abode, is a problem.

Among builders who have finished their houses since the first of October, and have apartments, flats and tenements to fill, a willingness very general has been developed to grant the privilege of a full month's rent or even more without charge. This willingness has been increasing for two months or more, and at this present time is confined to no particular district in which there are new houses ready for occupancy, but is more particularly true of the larger apartments and flats and those which for other reasons than size command the higher rentals. Old-law houses are not affected; all are reasonably well occupied, and no free-rent bonus is given in their case.

It is not admitted that there has been any real over-production of buildings, but some authorities, alleging that the builders have not accurately gauged the ability of the public to pay the higher rentals now demanded, perceive as a consequence that families are trying to live in smaller apartments than they have hitherto been accustomed to; and hence it is much easier to rent three or four rooms for housekeeping than five or six. Neither is it admitted officially that there has been any reduction in rent schedules, but in actual business a recession is noticed, and there are houses officially scheduled at from $26 to $28, which would be glad to fill up at an average of $22.

The schedule of rents that is being actually paid in the lower part of the Bronx is as follows: For three rooms, $14 to $16; four, $16 to $18; five, $17 to $20. Five-room flats and apartments for which $18 to $21 is asked, and six-room apartments for which $25 to $28 is asked, "don't rent very well," to quote an agent's remark.

### RENTS TOO HIGH.

Said a broker: "It is too early to say that there is going to be an over-production; wait until the houses now under construction are completed next spring. My own opinion is that there are people a-plenty to fill all the houses, on a fair apportionment of rent; but whether they can so adjust themselves as to fill all the flats and apartments that will be ready then at the prices the owners expect, is another matter. Though a real estate agent, I am free to say that rents in this city are rising above the ability of people to pay, average men and things up as one may. Families are obliged to crowd together more and more in order to pay the higher rents, and as this crowding is repugnant to American ideas, it requires no gift of prophecy to say that just as soon as a way of escape is opened into new outskirts there will be an exodus such as the city has never yet seen. At the present moment our old-law houses are all well rented, and free rent is not being given in these houses, simply because the rates are lower."

### TWO-FAMILY HOUSES.

A class of apartments which have rented exceedingly well in the Bronx is the upper parts of two-family houses. As investments these are exceedingly profitable, both to builders and purchasers, though not so many were erected as was expected. Prices for old two-family houses were marked up very decidedly last summer; in the hope of getting a fabulous profit many were put in brokers' hands to sell, and more transactions would have been recorded had not the high figures been so tenaciously insisted upon. Flatbush proved to be a strong rival to the Bronx in the line of private dwellings, with not only distance but oftentimes style and price in favor of the thriving Brooklyn suburb. That this comparison was made in a great many cases with the final decision in favor of Flatbush was very noticeable to brokers. A large business in building and selling houses of this kind is expected next season, especially if a more reasonable basis of values should obtain.

### OBSERVATIONS OF BROKERS.

In answer to a query relating to the subject of free rent, R. I. Brown's Sons, 3428 Third avenue, said that in most cases where the rents are over twenty dollars per flat Bronx builders are giving free rent from two weeks to a month. "Their object in doing so, as far as we can learn, is to fill up the house so as they can procure a permanent loan and sell same by showing large rental list. We feel that in some sections of the borough there has been an over-production of flats whose rents are higher than $25. Of course at this time of the year there is not quite so many inquiries as there are in the spring."

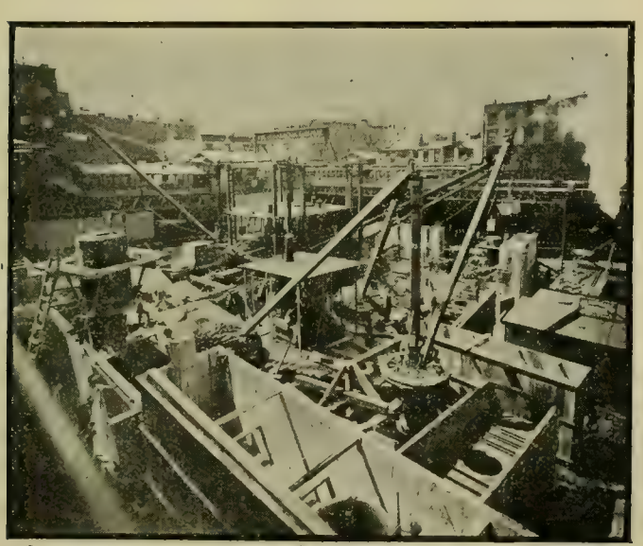
### THE KIND THAT RENTS BEST.

Mr. B. S. McQuay, of McQuay & Company, 148th st and Third av, expressed the opinion that there is no over-production at present, but there is likely to be in high class apartments, erected by builders who have given no thought to the situation, and expect to fill their houses at an average from $5 to $6 per room with steam heat and hot water. "What the majority of tenants want," said Mr. McQuay, "what the speculators and investors want, are flats with rooms that will rent at an average of $4 to $4.50 with hot water and no steam heat. Buildings of this character are quickly filled with tenants and sold at a good profit before completion."

Mr. Charles H. Weber, of East 149th st, said: "Up to the present time I have not been obliged to give a day's rent free; however, I have been informed that several owners of the better class apartment houses have recently offered to give one month free rent as an inducement to obtain tenants. I find that flats from sixteen to twenty-five dollars let more readily than the high price apartments. Builders will find it to their advantage to erect six-story apartment houses, five families on each floor, without steam heat. There is quite a demand for these low-priced flats in this locality, near the Subway and Elevated stations."

Charles F. Mehltretter, of 1962 Clinton avenue, said: "Up here we find no difficulty in renting whatever flats and apartments we have, as we are short on them as it is. Waters & O'Connel, of 103 East 125th st, have just completed two modern apartment houses on the northwest corner of 175th st and Crotona av. These houses are high class in every respect, and contain every modern improvement. The rents are: 6 rooms and bath, $33 to $38; 5 rooms and bath, $26 to $30; 7 rooms and bath, $30 to $40. The houses are just completed and ready for occupancy. As you see there will be very little difficulty in renting them. But as I said before in this section we have no

larger buildings coming up, and we have a greater demand for rooms and apartments than in any other part of the city, and the builders are neglecting us.



"What we need in this locality is not so much the high class apartment houses, but houses with about 5 rooms and bath, with rents from $20 to $25. The thing is the mechanics, clerks and men of less means find it hard to get anything suitable to their means. If we had this class of flats up here I could rent twenty-five houses in a week. The builders who put up high-grade apartments along Prospect av, Jenning st and Union av, and in that section, and are complaining of not being able to rent, made the error of building the houses too costly. If some of the construction companies or builders would come up in this section, say from 175th st up to 180th st, from Crotona av down as far as Southern Boulevard, as fast as they would build the right kind of flats they would be rented and sold.

"What has often surprised me is that builders have neglected Tremont av. This avenue must become a business centre. There are not half enough stores in this section. I don't care who the builder is, it would be impossible for him to satisfy the demand for flats and apartment houses; and if he thinks he could do it he would be surprised at the difficulty of the task. I have people waiting on my list to get rooms, and cannot supply the demand. One and two-family houses are all rented, bringing rentals from $25 to $30, and in the lower grade houses from $20 to $25.

"The lots up here can be bought very reasonably as yet, and if some builders would make a start they would get a good return on their investment. This is a field which would repay the investor. There is the assurance of an increase in value, and building loans are easily obtained. I am positive we would never have the complaint of not being able to rent. As I said before, and I am sure the other brokers in this neighborhood will bear me out, it is impossible to supply the demand for flats."

## Foundations of the U. S. Express Co. Building.

There is now being erected on the west side of Trinity Churchyard another skyscraper—the U. S. Express Co. Building. When this building is completed Old Trinity will be almost completely surrounded on all four sides by buildings which overreach the topmost point of the old spire, which until a few years ago was one of the pinacles highest above the ground level and first visible from any position where a skyline view could be obtained of New York. On the north is the new Trinity building, rising twenty-two stories above Broadway; on the east the American

FOUNDATIONS OF THE U. S. EXPRESS BUILDING.

Surety Building, which is of twenty-one stories; on the south the Empire Building, twenty-one stories, and now on the west the U. S. Express Building, which is to be twenty-two stories. It is probably worthy of passing mention that all of these buildings rest on foundations designed and constructed by the same engineers.

In constructing the foundations for the United States Express Building unusual difficulties had to be overcome, due in a measure to the location, the site being bounded on three sides by the structures of the elevated railroad. There are ten columns or posts of the elevated, opposite the site, and all of these columns are inside the curbline, which of course brings them very close to the edge of the excavation. On the north side the caissons had to be sunk within two inches of the side wall of the old building there.

Two inches is not much of a space for shoring purposes. To support this old building with the little room available, six eight-inch pipes were jacked to solid footings. These pipes were filled with concrete and capped with granite. Another granite block was used on top of this cap and wedges were driven between the two blocks, to take the weight of the building. This method proved successful. All the shoring of this building had to be done from the outside, because the tenant would not allow the contractor inside.

To protect and support the ten elevated columns also required skillful handling. All shoring was braced from a frame in the center of the lot, the braces running in all directions from this frame and being supported by it. This was another new departure in shoring and was most efficient. Four of the derricks used to handle most of the materials were supported in the form of a square traveler, on piling driven in the center of the excavation. The shoring frame was built about these piling and the traveler was therefore directly above this frame.

The approximate area covered by the U. S. Express Building is about 17,800 sq. ft.; approximate weight, about 47,000 tons. This is supported by sixty-four columns distributed over forty-nine caisson piers. Twenty-one of these are pneumatic caissons, seventeen forming a continuous cofferdam around the entire four sides of the area. These seventeen caissons are joined by a special joint and thus they form a solid concrete wall 6 ft. 6 in. across and carried down to bed-rock—an average sinking of 55 ft. below curb.

This enclosure gives a deep cellar, the walls of which are being waterproofed with the Winslow system of hydrolithic cement coating by The Foundation Company, which is doing all the foundation work. The result will be a water-tight cellar to a depth of 35 ft. below the curb.

The other twenty-eight caissons are distributed to carry the interior columns inside the exterior wall. These interior caissons are an average of about 7 ft. 6 in. square, and are carried to the same depth as the outer caissons.

The accompanying picture shows the general layout of contract while the work was in progress, how the work was carried on at all possible points at the same time and gives some idea of the adequate plant and equipment employed by The Foundation Company.

## The Fashionable Residential Section.

FIFTH AV., FROM 72D ST. TO 90TH ST.

NO. 2.

It was pointed out in these columns last week there has been a revived interest in property in the best section of the residential district on upper Fifth av. The fashionable center of all great cities generally changes in the course of time. The encroachments of business, the construction of new thoroughfares, the deterioration of a neighborhood are often the cause. The busy Strand in London was once the home of fashion and nobility but there are certain quarters in a metropolis that must always permanently remain the habitat of the great world and the home of persons of distinction. The aristocratic and historic Faubourg St. Germain in Paris and Mayfair and Belgravia in London still retain their character for such exclusiveness. But if we are to judge of the future by the past these Old World localities have nothing like the fashionable residential permanence that 5th av has in this city between 72d to 90th sts.

The reasons for this are not far to seek. These blocks have a splendid position facing as they do Central Park and running east into Madison av. They have become a rallying point for the elite, the wealthy families not only of the city but of the nation, because there are restricted limitations to this fashionable area on account of the small amount of property available for newcomers and therefore must always be pre-eminently the choicest residential section of the metropolis.

New York is the mecca for that constantly increasing class of individuals in this country who have amassed huge fortunes in the South and West. They come here for the social, artistic, literary and material advantages that a residence in the metropolis affords. The price they may have to pay for a mansion in this 5th av section suitable for their needs and ambitions may be comparatively high but as an investment it cannot be so considered when the small quantity of this class of property remaining or capable of being acquired is taken into consideration. Moreover such property must inevitably advance in value as the city continues to grow with the development of the country and the increase in numbers of that class from which the owners of such palatial homes are recruited.

Authorities who talk conservatively on the subject of real estate do not hesitate to say "that the select residence section of New York has been fixed for a generation and probably for a century to come in the blocks east of Central Park, and especially from 72d and 90th sts between 5th and Madison avs. The wealth of the country has chosen for its home this strip of territory."

What is known as the Cook block numbers among its residents such families as Converse Kuhn, Dillon Ripley, Fletcher Reginald, Barclay Broughton, Henry H. Rogers, Barnes Cook, Stuyvesant Fish and Payne Whitney.

There are still a few fine residences in the market, but in the nature of things they must soon find purchasers.

As to the little vacant land in this strip of territory there can be no doubt that within a reasonable time these properties will be given over to sumptuous houses vying with the imposing homes of Henry C. Frick and Andrew Carnegie.

Among the numerous advantages of this part of New York

for the residence of wealthy and distinguished people are the social life, the dignified seclusion, the unexcelled surroundings, the splendid architecture and the fact that the close proximity of the park makes that magnificent enclosure practically a private estate for every resident of the section.

### Social Strides of Lenox Hill.

Mr. Reese, of Post & Reese, 16 East 60th st, referring to the section immediately east of 5th av, expressed the opinion that it would continue to advance. This would be especially true of the part between Park and Lexington avs, owing to fashionable people buying and building there, notably in Sixty-fourth, Sixty-fifth, Sixty-ninth, Seventieth and Seventy-first sts. "Park av on the top of Lenox Hill—I mean the high ground on Sixty-seventh, Sixty-eighth and Sixty-ninth sts—is also much sought after," he said. "As Fifth avenue properly is getting more or less prohibitive in price, people who want corners will switch over to Park av, a change which may mean tearing down many apartment houses. Park av must be a very choice locality for residences now that the New York Central road is substituting electricity for steam locomotives and eliminating the smoke nuisance. Indeed, there has been a tremendous change in this whole section, fashionable people having bought to a large extent. What tends to create values is good people with social aspirations buying in a certain district. Solid New Yorkers driven from farther downtown by business have moved up on the East Side. Several good families have thus settled between Park and Lexington avs and many new houses have been built."

Among owners are such men as George P. Post, Paul Tuckerman, James Van Allen, Edgar Auchincloss, Francis J. Lloyd (of Brooks Brothers), Leonard E. Opdycke and W. H. Woodin. Sixty-seventh st between Madison and Park avs is another remarkable street, with fine recently constructed 40-ft. residences belonging to Arthur Scribner, Hugh Auchincloss, J. R. Steers and the Misses Thompson.

### The Andrew H. Green Memorial Association.

The memorial to the late Andrew H. Green, who was known as the Father of Greater New York, is to take the form of an imposing entrance to Central Park, at 7th av and 110th st, costing from $75,000 to $100,000. On June 2, 1905, the Board of Estimate and Apportionment of the City of New York appropriated $50,000 towards this object. The whole amount was not asked for from the city, the Memorial Association believing it proper to reserve to Mr. Green's friends and fellow citizens the privilege of sharing as individuals in this tribute. New York City owes much to Mr. Green's memory. He was President of the Board of Education, trustee of the New York Public Library, Commissioner and President and Comptroller of Central Park during its formative years.

Indeed, there is scarcely a public department in the city with which his name has not been associated officially. Nor can it ever be forgotten that he was the projector and chief instrument in securing municipal consolidation, with its resultant benefits to all the boroughs.

All contributions to this fund should be sent to Isaac N. Seligman, Treasurer, Mills Building, New York City, by whom they will be duly acknowledged.

The Finance Committee consists of Isaac N. Seligman, Chairman and Treasurer; Cornelius N. Bliss, Charles S. Francis, D. O. Mills, J. Pierpont Morgan, Alexander E. Orr, N. Taylor Phillips, Charles A. Schieren, and James Stillman.

### Mr. Hopper's Resignation.

Having arrived at the close of an administrative term, Mr. Hopper, the Superintendent of Buildings for Manhattan, has placed his resignation in the hands of his superior, the Borough President. In giving his reasons for resigning Mr. Hopper said:

"The position of Superintendent of Buildings I consider is second in importance to no other public official's duties in the city. * * * The assumption is that as all the responsibility rests with the Superintendent he should be free to exercise his knowledge for the benefit and successful operation of this office to the best of his ability. As I have been denied this right, I feel that, having served out my term, I do not care to longer continue in the work, with the possibility of being at any time or by anybody interfered with in the intelligent discharge of those duties."

In an interview Mr. Hopper said his decision to resign was reached last April when Mr. Ahearn countermanded certain orders. Mr. Hopper referred to his order which required the use of certain plumbing devices and safety appliances for elevators to the exclusion of others, and which order was countermanded by Mr. Ahearn.

### Personal Mention.

Mrs. Elten R. M. Ackerman, widow of J. Harvey Ackerman and mother of Senator Ernest Ackerman, president of the Lawrence Cement Co. of New York, died on Monday night at Plainfield, N. J. She was the daughter of the Rev. Dr. Richard N. Morgan, an Episcopal clergyman.

### Moving Into Title Company Building.

An exceptionally handsome building is the one which the Lawyers' Title Insurance & Trust Company has raised for its business in Brooklyn, and is moving into to-day, at 188-190 Montague st. Ten stories, 50 ft wide, 80 in depth, measure a very considerable structure, and to an imposing exterior has been added a very substantial, heavy-walled, fireproof construction, and an extremely rich interior finish. Architects Helmle, Huberty & Hudswell have designed the facade in the French Renaissance style, and built it of granite, white brick and terra cotta.

Mahogany, marble and bronze are the three notes of elegance and beauty in the finish of the first floor, and throughout the building mahogany is used for the trim, with marble for all bases. All the window frames are of sheet bronze, the elevator fronts and stairs in electro-plated bronze. On the fifth floor, where the records are to be kept, special fireproof provisions have been made, through the use of wire glass iron shutters; and the use of wood has been reduced to the minimum everywhere. Where so many records of the highest importance are to be stored, for generations it may be, the fireproof construction is extremely necessary.

Seven floors will be occupied by the Lawyers' Title Insurance & Trust Co. for its own business, and three will be leased out. The main floor has been assigned to the bureau of investment and the trust department, as well as the business offices; the closing offices will have a whole floor, with fine accommodations; the loan department two floors, the plant department two, and the survey department one; and altogether a clerical force of nearly 300 persons will work within these walls.

Louis H. Losser will be the general manager of this branch, with George H. Fleury, assistant general manager. E. W. Coggeshall is president of the company, with main office in Manhattan.

### Lackawanna Company Will Improve on Terminal Construction.

The two new ferry-houses and slips of the Delaware, Lackawanna and Western, and the Central Railroad of New Jersey, near the foot of West 23d st, destroyed by fire this week, will be rebuilt at once. The loss will probably reach a total of about $500,000. The two houses occupied a space about 500x150 ft., and were 2-stys, 50 ft. in height. Kenneth M. Murchison, of No. 5 West 31st st, architect for the Lackawanna, has informed the Record and Guide that plans are already under way for the rebuilding. The general construction will be much improved and will possess better fire protection. It will have side walls and a roof of reinforced concrete. The general exterior will be about the same in design, but upon a whole the building will be a more substantial structure. The American Bridge Co., 100 Broadway, held the structural steel contract for the burned building, and Henry Steers, Jr., 1 Broadway, did the dock building and piling. The Jersey Central terminal will be rebuilt by and under the supervision of its own forces.

### A Presentation to Register Ronner.

About two hundred employees in the New York Register's Office met in the parlors of the New York Press Club, 116 Nassau st, Manhattan, on Saturday, Dec. 16, at 1 p. m., and presented to John H. J. Ronner, the retiring Register, a gold watch and chain and locket ornamented with diamonds. Assistant Deputy Register Hennessy presided at the meeting, which was a very enthusiastic one, because Register Ronner is exceedingly popular and has been considerate to his subordinates, although he has been careful to secure from them the full measure of work. The presentation speech was made by Captain James Mitchel, the cashier, who is a son of John Mitchel, the Irish patriot. Other speeches, in heartfelt appreciation of Register Ronner's good qualities were made by Henry H. Sherman, the Deputy Register; William F. Hull, Chief Block Index Clerk; B. J. Douras, Chief Clerk; J. Johannsen, Chief Record Clerk, and J. R. Murphy, a folio writer. Then followed a bountiful luncheon, music and singing. The affair was altogether a most enjoyable one.

This has been the best year for business that title companies ever have had, and some have made substantial acknowledgment of the fact to their employees. The Lawyers' Title Insurance & Trust Co. has, according to current report, given to each one who has been in its employ for more than five years a sum equal to about five per cent. of his annual salary. With each check so sent was a letter of the date of Dec. 20 saying, in effect, that the management had for some time had it in contemplation to recommend to the board that a sum be set apart out of the net profits each year, when the business of the company warranted it, for distribution among those who by the importance of their positions and the length of their service, had merited special recognition. These employees thus become sharers in the company's profits, and every dollar they can make for the company or save for it will enure indirectly to their benefit. Besides giving a share in the profits, the company will grant annually to each man a vacation of three weeks with pay.

# THE REALM OF BUILDING

## Prospective Building.

## Building Operations.

### Mr. Wills Will Build Loft Structure.

55TH ST.—Charles T. Wills, 156th 5th av, has received the general contract to build the 8-sty fireproof building, 25x100, for John F. Kennedy, 31 Nassau st, to be erected at 28 West 55th st, from plans by J. B. Baker, 156 5th av. No sub-contracts have been awarded.

### The New Scribner Printing House.

43D ST.—Ernest Flagg, 35 Wall st, has plans ready for the new 12-sty printing and publishing house, 125x100.5, for Charles and Arthur H. Scribner, 153 5th av, to be erected at 311-319 West 43d st, at a cost of $300,000. No contract has yet been awarded. Mr. Flagg designed the Scribner Building on 5th av.

### The Amateur Comedy Club's Theatre Building Project.

48TH ST.—That new theatre and club building project for the Amateur Comedy Club, which the daily papers expatiated upon the past week, to be erected in West 48th st (location not given), and for which Mr. Howard M. Peck, of No. 160 5th av, was said to be preparing plans, according to the club's president, Mr. H. S. Borden, of No. 34 Thomas st, will not be erected. Mr. Borden states that the report was incorrect.

### Row of Eight New Flats for 1st Avenue.

1ST AV.—Plans are being prepared by Messrs Horenburger & Straub, 122 Bowery, for the erection of a row of eight 6-sty flat buildings, with stores, to be situated at the northwest corner of 1st av and 108th st, at an estimated cost of about $400,000. The buildings will be 50x100.11 ft. each, containing baths, and will be heated by ranges. Raphael Kurzrok, 491 Broadway, will be the owner. Light brick and limestone trim, slate roof, etc.

### Another Riverside Drive Apartment House.

RIVERSIDE DRIVE.—The Cathedral Parkway Realty Co. will soon build on the southeast corner of 138th st and Riverside Drive, one 10-sty, high-class, elevator apartment house, on plot 50x100, at a cost of $160,000. Front of light brick, limestone and terra cotta trimmings, marble, tile, hard wood trim, steam heat, electric lights and open nickel plumbing, plastic slate roof. Louis C. Maurer, 22 East 21st st, is now preparing plans.

### Mills Hotel No. 3 Contracts.

7TH AV.—Messrs. Copeland & Dole, 135 Nassau st, have awarded the contract for the structural steel and iron for the new Mills Hotel No. 3, to be erected at the northeast corner of 7th av and 36th st, to Post & McCord, of No. 44 East 23d st. Working drawings will be ready for bidders on other contracts soon after the first of the new year. No other award has yet been made. D. O. Mills, 634 5th av, is the owner. (See issue Nov. 25, 1905).

### Henry Phipps Not to Build.

22D ST.—A report circulated during the week that Henry Phipps, of No. 6 East 87th st, would erect a large store and office building at Nos. 6 to 14 West 22d st, adjoining James McCutcheon's store and office building, is positively denied by Mr. Phipps. When interrogated for the Record & Guide Mr. Phipps

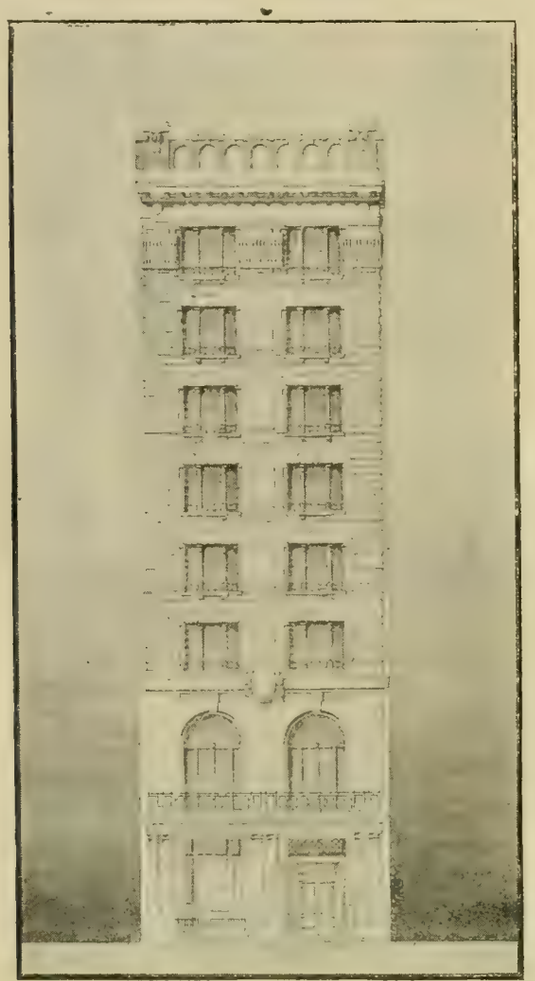
said: "I have purchased the property, it is true, but the rumor that I will build is incorrect." No alterations or improvements to the present building are contemplated.

**Red Cross Hospital Contracts.**

CENTRAL PARK WEST.—R. Napier Anderson, 63 5th av, has awarded to Chas. H. Peckworth, 415 Hudson st, the contract for excavating and foundations for the two new Red Cross Hospital buildings to be erected on Central Park West, about 25 ft. north of 100th st. The buildings will be 4-sty each, so arranged that three additional stories can be added later. The fronts will be of marble and brick, and thoroughly fireproof. No other contracts have been awarded. (See issue Nov. 25, 1905).

**Store and Office Building for 27th St.**



27TH ST.—Plans are now being prepared by Louis C. Maurer, 22 East 21st st, for the erection of a 9½-sty fireproof store and office building, to be erected on a plot 25x98.9 at No. 43 West 27th st. The owner's name is reserved for the present. The structure will have a front of light brick, granite and limestone trim, marble, tile, hard wood trim, steam heat, electric lights, electric elevator, open plumbing, slag roof, concrete arches and cement floors throughout. Cost will be about $85,000. No contract let.

**More Improvements to the Old Wanamaker Store.**

BROADWAY.—Still further extensive improvements are to be made to the old A. T. Stewart Co. building at Broadway, 10th st, 4th av and 9th st, to cost in the neighborhood of $50,000. An iron and glass canopy will be erected, more plate glass show windows installed and interior partitions, iron columns, girders, steel beams, etc. D. H. Burnham & Co., of Chicago, are the architects, and William Lewis, 143 East 8th st, will superintend the work. The award for this has not been made. The owner is John Wanamaker, of Philadelphia.

**To Build a Chicago Skyscraper.**

The Thompson-Starrett Company signed on Saturday, December 16th, the contract for the 20-sty addition to the Fisher Building in Chicago. The original Fisher Building, 18-sty high, was constructed by Mr. Theodore Starrett in 1895-6 and was the original record holder on rapid construction, the skeleton having been erected in exactly one month. The addition is two stories higher than the old building, but is designed to harmonize with it, making of the completed structure a building of the type of the Times Building in New York. P. J. Weber is the architect and E. C. & R. M. Shankland are the engineers. Both the architect and the engineers have their offices in Chicago.

Forty-fourth Street.

**Contracts for Railroad and Iron Exchange.**

WEST ST.—The large steel contract involving about 6,000 tons for the new 23 and 28-sty steel frame Railroad and Iron Exchange office building, to be erected 158.11 ft. on West st, 119.8 ft. on Cedar st, and 102.7 ft. on Albany st, has just been awarded to Milliken Bros., of No. 11 Broadway. The West Street Improvement Co., 277 Broadway, with which John Peirce is connected, are the owners. General Howard Carroll is president, and J. B. McDonald a director. John Peirce, 277 Broadway, is the general contractor, and is now ready for figures on the other sub-contracts for the super-structure. John Monks & Sons, 82 Beaver st, have the contract for foundations. Cass Gilbert, 79 Wall st, is the architect.

**New Plant of Milliken Bros.**

The work of grading and excavating for the new open-hearth steel plant and rolling mill on Staten Island for Milliken Bros., of 11 Broadway, has already progressed to a considerable extent, and some of the material for the new steel plant has already begun to arrive. The contract for the rails for the tracks, amounting to eight hundred tons, has been placed with the Pennsylvania Steel Co. The ties for the tracks have already been delivered. The order for switches has been placed with the Pennsylvania Steel Co.; the order for the yard locomotives, of which there are five, has been placed with the H. K. Porter Co.; the contracts for the 40-in. blooming mill, the 32-in. roughing mill, and the 28-in. finishing mill have been placed with McIntosh, Hemphill & Co., of Pittsburgh.

THIS illustrates the Power House of the Metropolitan Railway Company, at 96th Street and East River, New York City. It is considered, both from architectural and mechanical standpoints, one of the best examples of its class of building in this country. Among the several highly commendable features of this structure, the Architectural Iron Work, including window frames and sashes, stairs, railings, etc., all manufactured and installed by the **Hecla Iron Works**, stand out boldly as master specimens of mechanical handiwork.

**The Hecla Iron Works are recognized as the first and foremost concern in the manufacture of Architectural Metal Work in the World. The plant is the largest and most complete, and the quality of its work is considered the standard, the world over.**

North 10th, 11th and 12th Sts., from Wythe Ave. to Berry St., Brooklyn, N. Y.

contract for the designing and erecting of the new foundry building at Long Island City for the Union Ballast Co., of New York. Building will be built on pile foundations, with concrete block walls, structural steel frame, plank and composition roof. Work to be started at once. The Miller-Collins Co. is in the market for prices on cement, sand, piles, lumber, sash, doors, window frames, roofing, structural steel, etc.

For improving premises of Public School 39, Queens; Edward Stapleton, $2,740, low bidder. For constructing fire-escape at Public School 74, Queens; James I. Newman, $885, low bidder.

## BUILDING NOTES

Have American workmen got down to bomb throwing, and will the Ironworkers' Union stand for that?

Calvin Tomkins, J. G. Phelps Stokes, President Frederick Crowinshield of the Fine Arts Federation and Borough President-Elect Coler were the principal speakers at the dinner of the Municipal Arts Society in the gallery of the National Arts Club on December 19.

The corner-stone of the new Engineers' Club building, under erection on West 40th st (Nos. 32-34), will be laid to-day (Saturday) at about 1 p. m. William L. Crow, of 287 4th av, is the general contractor. Samuel Weiskopf, of 51 Wall st, is structural engineer, and Messrs. Whitefield & King, 160 5th av, architects.

Kitchell & O'Rourke, architects, Scheuer Bldg, Newark, N. J., beg to announce that they have severed their connection with the firm of Jeremiah O'Rourke & Sons, and have opened offices in the Scheuer Bldg, Newark, for the practice of architecture, and would like to receive catalogues from the manufacturing and supply houses.

The little fire in the Trinity Building proved Paul Starrett's words in the Record and Guide of the 9th inst. concerning the fireproof qualities of the modern office building. It was a stern test, but the Trinity Building's construction got all the glory, not being impaired in the slightest degree, except for the burning of the insulation of the wires in the shaft.

The Delaware, Lackawanna & Western Railroad will shortly construct at Kingsland, N. J., a new locomotive shop, to be operated in connection with its coach shop and repair plant, which have been almost completed at that point and will be put in operation on April 1 next. The locomotive shop, which is to be 106x606 ft., will be a concrete and steel structure.

The brass foundry in Bridgeport, Conn., which is offered for sale or to rent elsewhere in this issue, is said to be an especially desirable property, having unusual advantages as regards equipment, location, and shipping facilities. The owner will be pleased to give full particulars on request and invites correspondence from readers of this journal who may be interested.

President Haffen, of the Borough of the Bronx, will readvertise for bids for the new court house to be erected in the Bronx. According to published notice sealed bids were called for at noon Tuesday, Dec. 12. As it was deemed in the public interest not to let the contract under the terms then possible, it was decided to reject all bids. Specifications require that contractors give security in the sum of $300,000, and 300 working days are allowed for the completion of the structure. Allowing for Sundays, holidays, bad weather and strikes, this condition means that the new court house cannot be finished in less than two years from the date of its commencement.

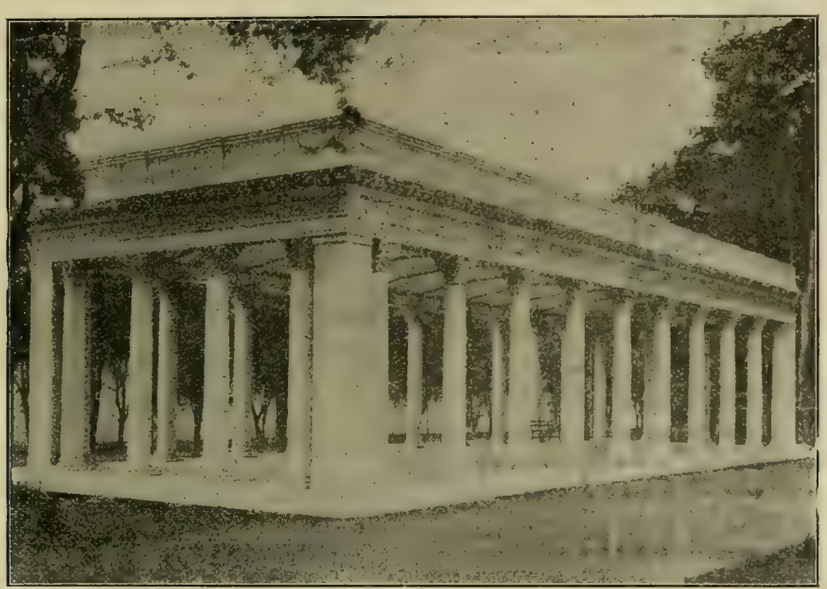
The National Association of Cement Users' Convention will be transferred from Milwaukee, Wis., to Columbus, Ohio, owing to the burning of the Exposition Building at Milwaukee. As 10,000 square feet are required for the exhibits of the association, this fact made it difficult to secure adequate quarters. Columbus, Ohio, was finally selected. As the Governor's Inaugural Ball will be held on the 8th inst., the dates of the convention have been advanced one day, thus making the convention dates as they now stand from the 10th to the 13th of January, inclusive. It was not easy to secure adequate quarters, as the exhibits of machinery, cements, etc., at the convention will be unusually large.

## Flatbush Architecture.

Excessive uniformity will yet be the bane of Flatbush on its western side. Mile upon mile of dwellings, all of a kind, however handsome the individual units, without some change in the material of construction and variation in landscape, will, before the multiplication process proceeds much further than it has here, change admiration into ennui in the beholder.

Pretentious villas when crowded into narrow city lots, without encircling lawns and drives or a frame of foliage, are not in their rightful setting. While their broad verandahs may call to mind summer evenings in the country, and their roofs of many gables, their towers and porte cocheres (and the very classical facades of some), may even suggest outlines of those supremely distinctive and beauteous castles which are only, as George William Curtis said, to be found in Spain, yet when set down on a puny city lot and multiplied thousands of times—and multiplied they may be all the way from Prospect Park down to the very bridges of Coney Island—the aggregate esthetical product will scarcely be superior to a picture of the same number of miles of commonplace brick fronts in some other part of the great city.

A blanket should be large enough to cover the bed and tuck in at the sides, it is said. So should a city villa site plot be large enough to spread out all around the house, and make it quite unnecessary that any part of the architectural anatomy should peep from under the blanket, and encroach on the street. Certainly there should be room for some of the cherry-blossoms of natural adornment which we associate with rural architecture, at least an arbor and a rustic bench, a workshop and playhouse for the boys, and a few vines and trees. Even an occasional change of building materials, at least from shingles and clapboards to stucco and brick, would immensely improve the architectural dress of Miss Flatbush. Sameness must ever be the defect of the "ready-made," in building as in tailoring; and the great defect in the appearance of Flatbush is due to the fact that New York people mostly buy their homes as they buy their clothing, ready made, instead of having them built to order, to represent their own personal choice of materials, designs and surroundings.



But as yet only one section of Flatbush has made itself amenable to this charge. There remain other sections where the lots are deeper, the streets wider, and where already elements of agreeable variation have been inducted; and for these parts it is hoped that individual taste will have reasonably free exercise, and that there may here be reproduced many of the characteristics that have made the suburbs of other cities distinctively handsome.

### House Rent in Paris.

PRICES PAID FOR PLACES OF RESIDENCE.

An article forwarded by Consul Liefeld of Frieburg contains some very interesting figures and facts in regard to the housing of the people of Paris, from which the following is taken:

The total rentable value of all property in Paris in 1791 was $5,255,820; in 1800 it amounted to $11,095,620; in 1850 to $32,702,880; in 1880, $112,902,800; while now it amounts to $166,434,300. Comparing the number of properties existing in 1865 with those of to-day, it will be found that the number of buildings in the centre of the city has considerably decreased, while it has vastly increased in the suburbs. There has been a decrease of 526 buildings in the Louvre quarter, 283 in the Bourse, 207 in the Temple, 254 in the Hotel-de-Ville, 233 in the Pantheon, and 109 in the Luxembourg quarter. At Reuilly and at Batignolles the number of ratable properties has about doubled. Rentable value has about quintupled at Passy, quadrupled at Batignolles, tripled in the Elysee quarter and the Buttes-Chaumont.

MARBLE SHELTER IN PROSPECT PARK, BROOKLYN.

SUB-DIVISION OF PREMISES.

The density of the population of Paris is astounding. In 1878 there were 254 inhabitants per hectare (2½ acres); to-day there are 322 per 2½ acres. It is curious to note the sub-division of habitable premises by their rentable value. There are 697,708 apartments or lodgings of a lower rental value than £20 ($97.33), giving a total of $33,092,200; 114,798 having a rental value of £20 ($97.33) to £40 ($194.66), total, $10,900,960; 30,947 of a value of £40 ($194.66) to £60 ($291.99), total, $6,618,440; 17,680 of a value of £60 ($291.99) to £80 ($389.32), total, $5,645,140; 11,529 of a value of £80 ($389.32) to £100 ($486.65), total, $4,866,500; 16,197 of a value of £100 ($486.65) to £120 ($583.98). total, $9,538,340; and finally, 17,020 apartments of a value of £160 ($778.64) or over, totaling $24,527,160. Thus Parisians pay their landlords yearly $95,188,740.

### Disagreement Over Queens Borough Hall Site.

The Art Commission has rejected the plans prepared under the present administration for a borough hall in Long Island City. Many citizens contend that the borough hall should be at Jamaica. The plans were drawn by Preston B. Seaman. The building was to be of sufficient size to accommodate all the courts of the county, together with the county clerk, surrogate and city officials. This plan was opposed by the residents of Jamaica and it is said they had considerable to do with its rejection at the present time. The principal objection made by the Art Commission is that the building does not seem to be large enough for the purposes intended.

With the growth of population in the Bronx, and the inability of a single cognomen to stand for every part of the wide region, there is a larger use of the old village names when reference is directed to particular localities. Thus, the public hears the names of "Mott Haven," "Morris Heights," "Fordham," "Pelham." and other old names more frequently than has been customary of late, in preference to indicating sections by streets and avenues. Mott Haven is an old one that is being revived to indicate the southwest end of the borough. Mott Haven originally formed all of the territory bounded by 149th st on the north, the Harlem River on the south and west, and 3d av on the east. The father of Jordan L. Mott bought the Mott Haven section from the Morris family in 1840, and the Motts resold large plots of it, although they still own much land along the canal and river front, which they lease. It is understod that the New York Central Railroad contemplates an enlargement of its Mott Haven depot.

## Law Suit Over a Lease.

A case of considerable importance to real estate people in general, and particularly to owners of property, was tried before Justice Smith and a jury in Supreme Court, Kings county, in a suit brought by Israel Stone, plaintiff, by his attorney, Abraham Oberstein, of counsel, against Esther Isenberg, the owner of over forty parcels of real estate in the Borough of Manhattan, City of New York. The suit related to the fact that on the 26th of October, 1903, Max Brettler and Jacob Paulin entered into an agreement with the defendant, Esther Isenberg, whereby she leased to them the premises 330, 334, 336, 338 and 340 W. 17th st, Borough of Manhattan, for a term of five years from November 1st, 1903, at the annual rental of $13,602, and payable in monthly installments of $1,133.50. One of the clauses of this lease provided as follows: "That the tenant shall take good care of the premises and do all inside and outside repairs in and about said premises whenever and wherever the same may be necessary."

Another clause provided as follows: "That if the said premises, or any part thereof, shall become vacant during the said term, the landlord or her representatives may re-enter the same, either by force or otherwise, without being liable for prosecution therefore; and re-let the said premises as the agent of the said tenant and receive the rent thereof, applying the same, first to the payment of such expenses as she may be put to in re-entering and then to the payment of the rent by these presents, the balance, if any, to be paid over to the tenants who shall remain liable for any deficiency."

This lease was subsequently assigned by Brettler & Paulin to various assignees with the consent of the landlord, until in the month of January, 1905, Israel Stone took possession under the lease. As security for the faithful performance on the part of the tenants of the provisions of the lease, the sum of $2,250 was deposited, and in addition to that the sum of $1,125, as additional security when Israel Stone was substituted in place of the lessees under the lease, making a total of $3,375 in the possession of Esther Isenberg, as security for the faithful performances of Israel Stone.

Israel Stone, who was in possession for one month under the lease, found that the buildings required a good deal of repairing and would prove a losing venture. So he refused to pay the rent for the January month, and on or about the 26th day of January, 1905, was dispossessed for non-payment of rent, because under the provisions of the lease he was required to pay the sum of $1,133.50 on the first of every month. He did not contest the dispossess proceedings and subsequently was dispossessed by default. He thereupon commenced an action to recover the sum of $3,375 in the possession of Esther Isenberg, for the faithful performance on his part for the carrying out of the provisions of the lease, admitting, however, that he owed for the rent of the month of January, 1905, which amounted to $1,133.50, and that there was due him the sum of $2,241.50, the balance of such security.

It should be added that there was a provision in the lease which provided that in the event of the failure of the tenants to perform all the terms and conditions of the lease, then the

sum of $2,250 and $1,125 should be applied by the landlord as liquidated damages for the non-performance of the terms and conditions of the lease.

On the trial of this action, the defendant contended that under the provisions of the clause referred to above, namely, that if the premises shall become vacant during the term, the landlord or her representatives may re-enter the same either by force or otherwise—that under the provisions of this clause of the lease, since the premises became vacant by the non-payment of the rent, and since the lease provided that upon the failure of the tenant to comply with the terms the sum of $2,250 and $1,125 should be applied by the defendant as liquidated damages and payable to the landlord, therefore the tenant was not entitled to recover anything, having failed to comply with the terms of the covenants by permitting himself to be dispossessed for non-payment of rent, and having failed in one of the provisions of the lease, namely, to pay the rent on the first of each and every month.

Attorney Abraham Oberstein contended that despite the fact that the clause provided that upon the failure of the tenant to comply with the terms of the lease the sum of $3,375 should be liquidated damages; nevertheless, that provision in the lease was a penalty which the law would not enforce despite the statements contained therein, and therefore the landlord was liable to the tenant and the tenant could maintain the action.

After a long and protracted argument before the court, the court sustained Mr. Oberstein's contention and sent the case to the jury upon the question only as to whether the tenant had made the repairs that were necessary, as provided for in the lease, the landlord having contended that the premises were left in an abominable condition when Stone got out and therefore he was compelled to make repairs that more than off-set the amount of the deposit in her possession. The jury, however, took no stock in this claim and returned a verdict in favor of the plaintiff for the amount sued for.

This decision is of importance to landlords for the reason that the lease in the case being a usual form of lease used by landlords known as the "Gilsey Form Lease." The court held with Mr. Oberstein that if the landlord wished to have the right to retain the amount of security there should have been a provision in the lease that the landlord should have the right to dispossess the tenant, the court holding that under the provisions of the Code of Civil Procedure the moment a dispossess warrant is issued, that terminates the relationship of landlord and tenant and therefore the lease is terminated once for all.

—The War Department authorities who are interested in obtaining bids with a view to making contracts for supplies for the army have been conducting an investigation into the reasons why certain firms do not enter into competition for government contracts. The letters received are of a varied sort, as might be expected. Some of the replies show that the firms do not care to engage in business on account of the trouble exacted of them in making out formal bids and in conforming to the preliminary requirements. Other firms say that they do not have confidence in the inspection methods and do not wish to run the risk of having the material passed upon by people whose ability to exercise judgment is in question. One correspondent said that he did not bid because he did not wish his prices exposed in the more or less publicity attaching to the opening of bids. This is an altogether unique reason.

## CONVEYANCES

Whenever the letters Q. C., C. a. G. and B. & S. occur, preceded by the name of the grantee, they mean as follows:

1st.—Q. C. is an abbreviation for Quit Claim deed, i. e., a deed wherein all the right, title and interest of the grantor is conveyed, omitting all covenants and warranty.

2d.—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or encumbered.

3d.—B. & S. is an abbreviation for Baragain and Sale deed, wherein, although the seller makes no expressed consideration, and thus impliedly claims to be the owner of it. The street or avenue numbers given in these lists are, in all cases, taken from the insurance maps when they are not mentioned in the deeds. The numbers, it will occasionally be found, do not correspond with the existing ones, owing to there having been no official designation made of them by the Department of Public Works.

4th.—The first date is the date the deed was drawn. The second date is the date of filing same. When both dates are the same, only one is given.

5th.—The figures in each conveyance, thus, 2:482—10, denote that the property mentioned is in section 2, block 482, lot 10.

6th.—It should also be noted in section and block numbers that the instrument as filed is strictly followed.

7th.—A $20,000—$30,000 indicates the assessed value of the property, the first figures being for the lot only, and the second figures representing both lot and building. Letter P before 2d figure indicates that the property is assessed as in course of construction.

December 15, 16, 18, 19, 20 and 21.

GOOD OFFICE FURNITURE DOES NOT MEAN EXPENSIVE OFFICE FURNITURE ANY MORE THAN IT means cheap office furniture.

There is a right kind of furniture for every office, and the price should be fair.

A visit to my store will prove it.

IN observing the current business situation one cannot help fearing that it is assuming a number of dangerous characteristics. Until recently the current activity and prosperity were wholesome and were not accompanied by excessive increases in prices or by any signs of the kind of boom which inevitably necessitates a sudden and disastrous reaction. But it looks now as if the steel industry, for instance, was freeing itself from the moderating influences which hitherto have kept prices in check, and was getting into a condition similar to that of 1902. It looks also as if the leading financiers were again beginning to feel their oats, and were planning further corporate combinations, which will largely increase the existing supply of securities. Finally the speculative fever has undeniably taken possession of Wall Street, and it may well be that wild and excited markets will prevail during the next few months, until the excess brings its inevitable reaction. There seems to be no danger that the reaction will come in the near future, but the time is certainly not far distant when money will be more valuable than securities, and when the wise man will sell out and wait patiently until he can recover his stocks at a considerably lower level. Such a seller may not get the very best prices for his speculative holdings, but he will do well to take a substantial profit, and not to risk being caught with many stocks when the decline begins.

THE current week brings to a close the most active real estate and building year which the city of New York has ever experienced. A full description and analysis of the year's operations will be published in an early number of the Record and Guide, but in the meantime we should like to call attention to certain fundamental facts. There have been approximately 35,000 conveyances recorded in the New York County offices, and 42,000 in the Kings County offices. The percentage of increase over the preceding year has been about 50 per cent. in Manhattan and the Bronx and about 35 per cent. in Kings. Furthermore, it must be remembered that these increases, large as they are, follow upon a constant succession of increases stretching over five years, the net result of which is that real estate in this city is just about three times as active as it was in 1900. It should also be noted that the aggregate value of the Manhattan real estate transferred during the past year was not far from $875,000,000, and if the value of Bronx property were added to this the total would be considerably over $1,000,000,000. The mortgage tables show increases which are smaller, because of the discouraging effect of the mortgage tax during the past six months; but heavily as that tax has weighed upon the lending of money on real estate, there has been about $560,000,000 loaned on Manhattan and Bronx property, which is an enormous increase over the total of the preceding year. The figures for projected buildings tell the same story. In New York and Kings counties buildings have been projected to cost not far from $250,000,000, which is about 70 per cent. larger than the figures for the preceding year, and the great mass of this money has been spent upon the erection of new living accommodations, necessitated by the growth of the city. These are figures which only a few years ago would have seemed inconceivably big; but it can safely be said that this activity is the normal and inevitable result of the growth of the city. It does not mean inflation in prices; nor does it mean, except in some few sections, an excess of speculative activity. It means a solid expansion in business and a sufficient increase in population. Such a pace cannot be indefinitely maintained, but so far it has shown few unwholesome symptoms.

THE question of the debt limit has been raised in its most serious form by the rapid transit merger. The city is confronted by the fact that it cannot spend the money needed for the subway extensions, no matter how desirable it may be to do so, and the consequence is that various methods are again being proposed to effect an increase in the municipal borrowing capacity. It is suggested, for instance, that the assessed valuations of real estate be raised to a still higher level, so as to provide an early increase of working capital. But no such idea as this should be entertained for a moment. Real estate in this city is assessed at the present time quite as high as is safe. A 10 or 15-per cent. margin should be allowed to remain between the assessed and the selling value, because the best real estate appraisers cannot pretend to estimate more closely than that of the actual value of a piece of property. If the general level were raised 10 per cent. it would provoke the utmost confusion, because in that case thousands of parcels would be assessed at more than their selling value; and as this fact could be proved it would involve the city in endless contests with individual taxpayers. We are glad to see that the Mayor has announced his opposition to this proposal. Another suggestion is that the city should be allowed to borrow 10 per cent. of the value of the real estate owned by the city. This seems to be a moderate and reasonable idea, and, as a matter of fact, it is defective because it is too moderate. If the constitutional provision affecting the debt limit is to be modified at all, let it be modified in a radical and effective manner. Adequate preparation should now be made for all the probable future needs of the city. Any debt incurred by the city for the purchase of remunerative property, such as subways, docks or lighting plants, should not be counted as part of the debt included within the 10 per cent. limit; and such preparation should be made, even if the use of the additional borrowing power is not found to be necessary in the present emergency. In this connection it is a fortunate thing that Mr. Bird Coler will after January 1st again have a seat in the Board of Estimate and Apportionment. He is the gentleman who originally called attention to the absurdity of the existing debt limit and to the effective and scientific manner of modifying it. Now that he is again a city official, he may be trusted to keep up the agitation for remedial action, until such action is consummated.

MR. LAWSON PURDY is right in saying that the longer the mortgage tax endures the more difficult it will be to repeal it, and the obvious inference is that no effort should be spared during the coming session of the Legislature to effect its repeal. Up to the present time it has been very decidedly a failure as a producer of income; but, of course, its efficiency in this respect will increase year by year, until at the end of five years it will yield such a large sum that it could not be repealed without dislocating the finances of the State. Hitherto, however, the yield has been so small that its repeal would make no difference, and a larger income could be raised immediately from a mortgage recording tax. In the matter of the repeal, a great deal depends upon the attitude of Governor Higgins. Not only would it be impossible to pass a repealing bill over his veto, but the Legislature obediently follows the Governor's lead in matters of taxation, and the Governor's attitude, so far as it has been made public, is not highly encouraging. The existing mortgage tax is to a large extent his own personal measure, and he will have to be pressed hard in order to submit to its repeal. His message will doubtless contain his revised opinions on the mortgage tax, and it will be interesting to observe how far he can reconcile the actual effect of the tax with the arguments which he used in its favor last winter. The tax is not only being paid by the borrower, but in many instances it has served to increase the rate of interest by more than the amount of the tax. This fact can be proved from the figures published by the Record and Guide, and it substantiates the claim of the opponents of the tax, that the impost is a flagrant piece of double taxation. It remains to be seen whether these arguments will have any effect upon the mind of the Governor. It should be added that any legislative action which may be taken on matters of taxation will depend upon the financial position of the State, as revealed in the Governor's

message. While the mortgage tax has yielded a smaller revenue than was expected, the stock transfer tax has yielded a larger one. If a deficit exists some action will be imperative; whereas a surplus would be welcomed as affording the Legislature an opportunity to avoid new taxes for at least one year.

## The Rapid Transit Merger and Its Consequences.

THE merger of the Metropolitan Street Railway Company and the Interborough Company has long been an inevitable outcome of the local situation in respect to rapid transit extensions. The expectation that these companies would sacrifice millions of dollars in competing for new transit routes, when they could make millions by the simple process of combination, was an absurd expectation. The incident affords one more illustration of the often-repeated statement that this kind of service is a natural monopoly, and that in the long run no effectual competition is either possible or desirable.

In view of the merger, however, it is extremely unfortunate that the policy of the Rapid Transit Commission hitherto has been based exclusively upon the idea that there would be effective competition for the construction and operation of the new rapid transit routes. The Commission was undoubtedly justified in laying out the routes so as to stimulate competition, as far as competition seemed to be probable at that time, but it should also have recognized that some kind of combination would eventually take place, and should have acted accordingly. As the Record and Guide has been insisting for years, the city's interests should have been protected by the passage of legislation, giving the Rapid Transit Commission power, if necessary, to construct and operate subways at the city's expense. If the Commission had declared that such a grant of power was necessary to protect the public's interest, it could have obtained the necessary legislation; but instead of so doing, the Commission has always opposed bills introduced for the purpose of providing against this contingency. It has acted throughout as if the public interest was not in the least endangered, by trusting entirely to the results of corporate competition for the construction of the new subways.

Now that the two important possible competitors have combined, the Commission proposes to act as it should have acted years ago. It proposes to obtain from the Legislature the power to build and operate subways on the city's behalf; but, unfortunately, its lack of foresight in the past necessarily embarrasses the vigor and celerity of its action in the present emergency. An amendment to the Rapid Transit Act is indeed all that is necessary in order to endow the Commission with the formal power to build a municipal subway; but unfortunately there is no way of making that power good for three years. The city has not the money, under the 10 per cent. debt limit, to spend on new subways, and the Commission is confronted by the alternatives either of agreeing to the best terms which it can secure from Mr. Belmont, or else postponing new construction for three or four years. Of course, it is possible that other corporate bidders may be found, but, considering the immense "influence" exercised by the bankers and financiers, who are behind the merger, the chance of effective competition is remote. In the long run it is a case of the City vs. the Transit Combination, and as soon as this condition is recognized as irretrievable, the better New York will be prepared for decisive and effective action.

Unpleasant as the alternative is, it must be faced. The Legislature should be asked to grant to the Rapid Transit Commission the power to build and operate subways, on behalf of the city, and steps should be immediately taken to make that power effective by providing for an increase of the debt limit. Then the Commission will, at all events, be in a position to negotiate with Mr. Belmont on something like equal terms. The knowledge that the local authorities have both the will and the power to build and operate a municipal system of rapid transit would act as a moderating influence upon Mr. Belmont and his associates, and that may be all that is necessary. Unquestionably the very best thing which could happen to the people of New York in this matter would be an arrangement with the Belmont-Ryan combination, which would permit the new subways to be operated as part of the existing rapid transit system. The advantages of such an arrangement would be inestimable. It would mean a degree of efficiency and convenience in the transit service of New York, the like of which could not be found in any city of the world, and it would be the worst kind of a mistake not to make every effort to reach an equitable agreement with the transit combination. But it is none the less true that too high a price could be paid for such an agreement. Mr. Belmont and his associates should be willing to pay full value for the additional subways which they seek to obtain. Public opinion, for instance, would never consent to the leasing of a new subway on the terms which were obtained either for the existing subway or for the Brooklyn extension. Mr. Belmont and the other owners of Interborough stock doubtless deserve the $50,000,000 and more which they have made out of the existing subway, because they were not afraid to risk their money in the enterprise at a time when other financiers would have nothing to do with it. But they must not ask for $50,000,000 of profit on the subway extensions. They must be content to accept a shorter lease, and they must agree to pay more for it.

Whether they will be content with the smaller profits, which under existing conditions is all they can reasonably ask, remains to be seen. The corporate owners of transit privileges in our large cities have in the past carried things with a high hand, and they have not as yet learned the lesson of moderation, with which public opinion will hereafter force them to be satisfied. But it is possible that the gentlemen at the head of the new combination have come to appreciate the fact that conditions are changed, and that they will not be permitted to keep on making large fortunes out of public franchises. They are entitled to a fair return on the money invested, and a fair compensation for the trouble and the work of building up the transit system of New York City; but they are not entitled to profits of 150 per cent. Furthermore, they must appreciate the fact that the officials of a huge transit monopoly are public servants in very much the same sense that the Mayor and Comptroller are. They are not elected by popular vote, but they are dependent for their continued success and prosperity on the approval of public opinion. An arbitrary and grasping policy on their part would mean the early triumph of the municipal ownership movement. Thus they are in politics, whether they like it or not, and they must adapt themselves to this consequence of the monopoly they have acquired. Owning as they do the existing transit machinery of Manhattan and the Bronx, they are in a position to pay more for subway extensions than any other body of capitalists would be, because they are also in a position to make more money out of such extensions; and if they do not outbid any possible competitors, public or private, it will only be because they are seeking to take advantage of the city.

## Against the Savings Bank Tax.

New York, December 27, 1905.

To the Editor of the Record and Guide:

IN 1901, when the Legislature of this State was actively engaged in devising methods of raising sufficient revenue by indirect taxation, to defray the necessary expenses of the State without a direct tax, through a lack of recognition of the philanthropic character of Savings Banks, and the absolute purity of their management by over two thousand of our best citizens, what was called a "Franchise Tax" was laid upon the surplus of all Savings Banks. On the 30th day of June in each year they are obliged to render a statement to the Banking Department, showing the exact amount of their surplus, and on this amount they are compelled to pay to the State a tax of 1 per cent. The Savings Banks are therefore obliged to pay a tax for carrying on a business that is entirely of a benevolen character. The trustees of these institutions give their services gratuitously, and do everything they can to keep down expenses and increase the bank's income, in order that depositors may receive the full benefit, as far as possible, of all their earnings. To have their expenses so largely increased by reason of this Tax is a heavy burden for the banks to carry. It is possibly true that the earnings upon the surpluses of the older and larger Savings Banks are "sufficient to pay the Franchise Tax several times over;" but this is assuming that the banks have no other use for that portion of their income derived from the surplus than the payment of this Tax; whereas, as a matter of fact, with nearly all the Savings Banks of the State a portion at least of this income is necessary to enable them to pay even a 3½ per cent. dividend to their depositors. At best, the newer and smaller banks can only earn enough to pay to their depositors 3½ per cent. interest. Some of the larger banks that, after many years, have accumulated a reasonable surplus, can occasionally pay 4 per cent., but this rate cannot be and never has been steadily maintained.

Permit us to state what the surplus of a savings bank is and what it comes from. It has, from the inception of savings banks, been considered that the depositors were entitled to, as nearly as possible, the entire net income of the bank. Working on this basis, any one can understand that in apportioning the dividend among the depositors, it is impossible to divide to the last dollar, so that after a workable division is made, there will always be more or less of a balance of the six months' income left to the bank, and this balance is the foundation and starting point of the surplus of all banks.

It has been asserted that the surplus account is in part or largely made up of the dormant accounts( accounts which have not been increased or diminished by deposits or withdrawals for twenty-two years and upwards). We believe this is a gross misstatement. Dormant accounts are held, as provided by law, subject at any time to the demands of the original depositors or their heirs, who are constantly being sought for, some banks keeping a clerk for this special work.

It is a total misconception of the situation to complain that the savings banks owe the State anything for the right to exercise their function. The trustees are not organizing and managing them for private pecuniary gain; they are a part of the benevolent work of the State itself, as much so as the poor-houses, asylums, hospitals, reformatories, etc., which annually cost the State $7,540,069.62 to maintain, the very great difference being that they are at the other end of the line. The Savings Banks are the "ounce of prevention," as the latter are the "pound of cure." And now when the Trustees, working without pay, have succeeded in getting the laboring classes to deposit over one and one-quarter billion of dollars in the Savings Banks, and thus liberate that enormous sum for useful service in the State, behold, a tax is laid for the privilege of doing this good work without cost to the State; and the poor of the State pay the tax. The Legislature has placed a protecting arm around the Savings Banks in many ways. Its highest interests and its financial interests prompt such action. It selects the most gilt edged class of securities for them to invest in. It watches over them by requiring detailed reports of all transactions every six months, and by giving all their accounts a most thorough examination at least once every two years. The interests of the depositors have been safeguarded in every way. Then, after affording all this protection, to turn about and impose a tax upon their slender incomes that is equivalent in some instances to one-half the running expenses of the banks, does seem like an imposition that should be discontinued at the earliest possible moment. The banks now have the greatest difficulty in making their investments return much more than 3½ per cent., and it was in view of the fact that they were led to believe that the Franchise Tax would surely be repealed last winter, that some of them felt warranted in paying a 4 per cent. dividend to their depositors. It is not to be expected, of course, that this rate can be continued; but it is the policy of the banks to pay as high a rate as possible, in order that depositors may participate in whatever prosperity the bank enjoys. In other pamphlets we show how the tax comes out of the depositors, and its injustice.

In the year 1892 the Legislature passed a law that the surplus of any bank should not exceed 15 per cent. of the par value of its deposits. The surplus of none of the banks, however, ever reaches that limit. In fact, very few of them have a surplus of even 10 per cent. and most of them very considerably less. After years of fostering legislation it is discouraging to the trustees who have labored hard and long to accumulate and increase this sheet anchor of all banks—the surplus—to have the State suddenly pounce upon it and claim a share, however small. Under the circumstances the banks should be encouraged to increase the amount of their surplus for the security of their depositors, rather than to diminish it. . . . The Committee of the State Association of Savings Banks now propose to introduce the same Repeal Bill early in January, and cannot but believe that with a better understanding the Legislature will promptly pass it, redeem their pledges to the people, and thus free two and a half millions of depositors of an unfair tax.

Very truly yours, on behalf of the Committee,

WM. H. S. WOOD,

(Chairman of Committee on Repeal of Franchise Tax for the Savings Bank Association of the State of New York).

## The Fashionable Residential Section.

FIFTH AVENUE, FROM 72D ST. TO 90TH ST.

No. 3.

The general prosperity that is unquestionably prevailing is already beginning to have its effect on that unique strip of territory on upper Fifth av, extending from the streets in the seventies to those in the nineties. While the northern boundary of this choicest section may possibly be somewhat extended, it is certain that the property on Fifth av facing the Park, between 72d st and 90th st, has a permanent character of its own and different from that of similar residential property not only in other American cities but also in foreign capitals. Fashionable centres do change, have changed and continue to change in many cities. We have seen this in New York from the time fashion centred around the Battery. Washington square, Second av and other quarters had a long lease of life as the home of modish people. Then came Fifth and Madison avs with their contiguous streets lined with residences of our wealthiest and most prominent citizens. That was and still is to a certain extent the brownstone front period, when the construction of a dwelling of that standard material stamped the owner as being in the wealthier class of New Yorkers. The improvement of architectural standards, probably caused in some measure by European travel has caused a remarkable change, and the man of wealth is no longer desirous of living in a row of houses each one of which is precisely like the others.

Business is slowly but surely altering the residential character ow lower Fifth av, and the beau monde, recognizing this fact, has practically made the stand for its permanent location on upper Fifth avenue. Conditions are such in this section that it is likely to remain the fashionable location for an indefinitely prolonged period, and the home of the most notable, distinguished and wealthiest people of the country who make the metropolis their residence.

Great wealth to secure any of this property is of course a necessity. So little remains for sale that in the near future the price demanded for it, if it is to be bought at all, will be almost prohibitive. Its future is assured, and doubtless in a few years the whole section facing the Park, within the limits mentioned, will be built up with handsome mansions vying with the beauty of those already existing.

That the exceptional character of the property and its scarcity are well understood is proved by the fact that, according to leading real estate agents, a man who may want a home there will not be particular as to fifty thousand dollars in buying a house that may be worth $250,000 or $300,000. This is because the buyer wants that particular house in that limited section, and no other will suit him. Other advantages of this locality that appeal to men of means are that business is never likely to creep in, that no trolley cars will ever disfigure or obstruct Fifth avenue, neither are there any subway and elevated railroad stations in the vicinity. Residents on these favored blocks always keep their carriages and automobiles within an easy distance, and by such vehicles reach their clubs, the theatres, the opera and the shopping district. Moreover, with Central Park at their doors the section is a veritable rus in urbe.

## Bronx Real Estate Brokers Dine.

The first annual Dinner of the Association of Bronx Real Estate Brokers was held at the Schnorer Club House, Eagle av and 163d st, Thursday evening, and judging from the merriment and enthusiasm the Board will have to secure a larger hall for their next dinner. Addresses were made by J. Clarence Davies, Judge Ernest Hall, Rev. Gibson W. Harris, Joel S. de Selding, James L. Wells and Lawson Purdy.

Mr. Davies said, in part:

Gentleman—In the name of the Association of Bronx Real Estate Brokers I want to welcome you here this evening at this first anniversary of our organization. Its history is brief and much like the history of all infants, and dates back to the boom in the Fall of last year when the organization was suggested by a city newspaper. We were sired by about 20 to 30 reputable brokers, damned, in more senses than one, by some brokers with offices in their hats, and a few dishonest brokers and real estate dealers, and after a great deal of hard labor were born in the office of the Title Guarantee and Trust Co. just one year ago to-night. We have grown since then at the rate of 4 or 5 members a month, until we number about 75.

" 'To facilitate negotiations in real estate.' That means a great deal more than it says. In the middle ages a man would buckle on his armor and his sword, gather his followers and attack his enemies, and if he could win the battle, would seize all the possessions and so become the successful man. To-day it is different. We are living in a commercial age. The age of dollars and cents. The only opportunity a man has to show he has more brains or more energy or more talents or more perseverance than his neighbor is to be successful, and to be successful means the getting of money; whether it be a merchant, a lawyer, a doctor or an artist, money comes with success. Brains and talents are paid high prices, and become successful and obtain money, and this very fact has led to a spirit of get money, 'no matter how you get it, get it.' This in turn has led to a fierce rivalry in all lines of business to such an extent that the public conscience is being rapidly perverted, and we are getting away from the solid ground of honest clean dealing.

"This applies particularly to real estate. A broker's information and knowledge and experience are his stock in trade. Obtain this knowledge, and use it for your own ends. For instance, a man comes into your office and asks for a house in a certain neighborhood, and you give it to him, and give him full information, give him its value and the advantages and disadvantages, and that man or broker goes directly to the owner and purchases the property. He is stealing just as much as if he went down to Tiffany's and stole a piece of jewelry from the counter.

"You all know what an intangible thing information is and how easily stolen, and you will therefore see how extra careful we must be and how our consciences must be kept sensitive, and now you see before you the future work of our organization. To so direct and guard our members that business will be done on straight lines, both between the public, customers and themselves. To guard, then, against dishonest dealers and brokers and so conduct the Association of Bronx Real Estate Brokers that every man who is a member of our association will be known as a man who speaks true, acts fair, gives a

square deal to every one, and is a credit to himself and to the community in which he lives."

THE MORTGAGE TAX.

In speaking of the mortgage tax law, Lawson Purdy said: "We cannot tell yet about the prospect of repealing the mortgage tax law. But there is just one thing to say about it. If you don't succeed in having it repealed this year, it will be three times as hard to succeed the year after, and five times as hard the year after that. For the tax will bring in a revenue every year much larger than it did the year before. It has been demonstrated that the difficulty of repealing a revenue-producing measure increases in geometrical rather than in arithmetical progression.

"Now is the time to do it, if it is to be done. Complete exemption of mortgages from taxation is to be desired, of course, but I would be willing to see go through any compromise measure which we have hitherto agreed to. For instance, a single tax rather than one recurring annually."

Mr. Purdy is a member of the commission appointed by Mayor McClellan to look into the conditions of taxation in New York City and to report on means for extending the debt limit. The report has not been made public yet, but last night Mr. Purdy told a little of what the report will contain.

"The city has arrears of taxes," he said, "amounting to over $63,000,000. Of this sum over half cannot be collected. That is, $33,000,000 in arrears is carried on the city's books as an asset, and it is an asset of no value at all. We shall never collect a cent of it."

Speaking of the personal property tax, Mr. Purdy continued: "We are assessing personal property at $12,000,000 every year. Of this fully one-third cannot be collected. What is the remedy? The only remedy is the abolition of the antiquated system. All tax on personal property should be abolished.

"Eighteen years ago Mayor Hewitt, in a message to the Board of Aldermen, said that all personal taxes ought to be abolished. He said that the fear that inspired acted as a check to the city's advance., and that conditions in New York should be such that capital should be attracted here from all over the world. And Mayor Hewitt was considered a shrewd and sensible man."

Earlier in his speech Mr. Purdy commented on how hard it was for the Bronx to get things because it was so far from the seat of city government.

Letters of regret were received from Mayor McClellan, William T. Jerome, Wm. McAdoo, Charles E. Hughes, Mark Twain, Simeon Ford, Wm. M. Ivins and Job B. Hedges.

Guests and members present were: Olin J. Stephens, Walter Whewell, R. E. MacDonald, R. W. Thomas, Thomas G. Price, James K. Price, James J. Haggerty, Emanuel Glauber, Chas. F. Sharrott, W. S. Jennings, Hon. Frank Gass, M. Anderson, J. H. Hass, Wm. C. Gotshall, Martin Geiszler, Leo. Hutter, J. Havender, A. A. Ireland, J. F. Murray, E. S. Ridley, B. F. McQuay, J. Bambey, C. Bogert, J. P. Dunn, H. H. Sherman, B. E. Guybert, H. Layng, Samuel Brenner, H. Rodkin, John Reiss, M. Marks, Louis Reiss, J. Homer Hildreth, Hon. J. E. Eustis, Geo. Price, R. Brown, Edw. Polak, Geo. W. Bard, L. E. Field, M. F. Kerby, G. Van Pelt, M. F. Healy, Wm. A. Kurz, T. T. Uren, C. Werner, C. H. Smith, E. G. Bach, A. Gerhards, Geo. J. Stricker, Peter S. O'Hara, John O'Hara, J. H. Behrman, W. C. Watts, J. Steinmetz, Wm. Brown, Geo. Carroll, James Carpenter, H. C. Scharfers, Wm. Peters, C. Mehltretter, Thomas Thorn, F. J. Wood, A. Piser, M. H. Newman, J. Lauber, S. Hecht, S. Gainsborg, S. Cohen, Eugene J. Busher, Chas. A. Weber, C. Kiesling, Wm. Stonebridge, A. Gorsch, J. Ghames, W. H. Harnden, Oscar Loewi, G. F. Moody, W. Lindner, H. A. Gumbleton and Henry W. Riecken. The souvenir of the evening was paper weights in the shape of hand-glasses.

## Laying Out West 157th St.

A public hearing will be given by the Board of Estimate on January 12 in regard to laying out 157th st, between Avenue St. Nicholas and Edgecombe road. The Corporation Counsel, in an opinion dated May 20, 1905, describes the manner in which the street was acquired by condemnation proceedings. He also outlines the action taken by the Board of Street Opening and Improvement in 1893 closing and discontinuing the street, and stating that on the same date, namely, September 15, 1893, there were filed with the Commissioner of Public Works and the Register of the City and County of New York, a map showing the closing of Edgecombe road and the portion of West 157th st under discussion. The Corporation Counsel says that the result of this closing and discontinuing in 1893 was to extinguish a public right-of-way over the land, but he states that the easements of light, air and access appurtenant to the abutting property were not extinguished. He further advises, after a reference to chapter 1,006 of the Laws of 1895, that this easement to light, air and access could be extinguished by the filing of another map again closing and discontinuing the street, which would result in extinguishing the private easements of light, air and access. He concludes that the title to the land acquired for West 157th st, namely, to the width of 80 ft, is still in the City of New York, relieved of the trust of maintaining the same as a public street, but still subject to the burden of the beneficial use of it by the abutting owner.

There are now houses on both the northerly and southerly sides of this street fronting on Avenue St. Nicholas, and Chief Engineer Nelson P. Lewis is informed by the representative of the abutting owners that it is intended to remove these buildings, which are old, and to build houses fronting on the new street. The owners evidently wish to secure title to the strips 10 ft in width on each side, in order that they may be used for the purpose of this development.

Mr. Lewis, in a recent report to the Board, said: "As the city now has the fee to this street 80 ft in width, I see no reason why the abutting owners should secure this land without proper compensation, and in my judgment it would be wise either to lay out the street on the lines followed by the Commissioners of Central Park in 1869, or that the lines which it is now proposed to adopt should be followed only on condition that the city is to receive a substantial consideration for the 10 ft on either side which it is desired should be abandoned to the property owners."

## New Street Plan for Kingsbridge.

Since the adoption of the plan for changing the tracks of the New York Central and Hudson River Railroad Company to the northerly shore of the Harlem River Ship Canal, the necessity for a readjustment of the street system has been apparent, and plans for such a readjustment are being prepared. These plans when submitted will involve two boroughs. The boundary between the Boroughs of Manhattan and the Bronx is Spuyten Duyvil Creek, a stream the importance of which has been diminishing every year since the construction of the Harlem River Ship Canal, with the result that the section known as Marble Hill, although belonging to the Borough of Manhattan is entirely separated from it and is physically connected with the Borough of the Bronx. With the building of solid bridges across both mouths of the Spuyten Duyvil creek, the latter stream will be still less important than it is at present. Still, being a borough boundary, any plan submitted by the President of the Borough of the Bronx could properly extend only to the centre of the creek, while a plan submitted by the President of the Borough of Manhattan would be likewise limited. A joint plan is therefore needed, and it is understood that such a plan will be submitted by the Presidents of the two boroughs.

In a communication addressed to the Board of Estimate by Richard H. Montgomery and others, in October, it was said:

"In view of the completion of the subway station at Broadway and Muscoota st it is most important that we have access from Kingsbridge road to Broadway over Muscoota st. Such access would attract homeseekers, and make it possible for us to dispose of our various holdings by subdividing into small plots. We are at a loss to understand why this work has not been done before, and would respectfully ask that you give this matter your personal consideration, and believe that when you understand the situation you will realize the importance of having this work completed at the earliest possible moment."

Mr. Charles T. Barney owns the Tecca Reed Estate property comprising some 250 city lots on the northerly side of Kingsbridge road; Mr. John Claflin owns about 500 city lots on Kingsbridge road adjoining the Jerome Reservoir, and Mr. Montgomery is president of the Kingsbridge Real Estate Company, which owns the "Bailey Tract," on the southerly side of Kingsbridge road, comprising some 500 city lots. This territory extends from 189th st, at the Webb Academy, on the south, to 229th st on the north.

## The Brick Market.

Hudson River brick are bringing $10.50 per M. for the best grade in the open wholesale market, the highest price since 1882, when common hards sold in April for $10.50 per M., and in the early part of May for $11 by the cargo afloat. The record prices were those paid in the year 1866, following the Civil War, when common brick sold for $18 per M. by the cargo, but gold was then at a premium. President Hammond, of the Hudson River Brick Manufacturers' Association, remembers distinctly that the price of brick delivered in Broome st that year was $20. At this time last year good brick were selling for an average of $7.87½, wholesale, but the ten dollar mark was touched before the winter closed. The river is still open, at least to Newburgh.

Under a recent resolution of the Board of Estimate and Apportionment $75,000 was appropriated for the purpose of extending 177th st bridge over the Bronx River to the new width of said street. The plans and specifications are being prepared, but the city has not yet taken title to the lands necessary for the bridge and its approaches, but proceedings to acquire title have been started, and the whole expense will be borne by the city. This crossing is an important one, Boston road, West Farms road and East 177th st, or Tremont av, all converging at its westerly end, while the West Farms road and Tremont av on the easterly side of the river also find their outlet here. The extraordinary developments which have followed the opening of the Rapid Transit Railroad, now having its terminus at or near this point, emphasizes the necessity of reconstructing the bridge.

# The Washington Terminal

THEODORE STARRETT, IN THE ARCHITECTURAL RECORD MAGAZINE

NOT the least remarkable thing about the great terminal station which is now beginning to rise from the two million yard fill at the intersection of Massachusetts and Delaware avs in Washington is the fact that it is a monument in enduring granite to the Chicago World's Fair and its architect, Daniel H. Burnham. The White City is vanished like a beautiful dream, but its chief designer, grown greater with the years, has produced in this building a structure which surpasses the most beautiful of the ephemeral creations of the vanished city. I have no doubt that this great organizer when he gazed on his finished work in the stucco buildings of the Columbian Exposition dreamed even then of the day when he should do it all over again in everlasting stone. That day has arrived, and the fulfilment of his dream in such a building as the Washington Station should be an inspiration to every one of us.

Though not in any sense part of the original plan of George Washington as worked out by his Secretary of State, Thomas Jefferson, with the expert advice of Major L'Enfant, the new Terminal is one of the great features of the embellishment of the Capitol City and, being the actual design of a member of the Commission of Architects which has restored the plan of George Washington, it gives the motif, as it were, of the grand finale of the composition. It is the first of the series of great buildings which is to make Washington a White City that will indeed be the wonder of the world.

That the Divinity which shapes our ends had a kindly eye on the national Capitol during all the years that elapsed since L'Enfant's time is proved by the fact that she (the Divinity) was so nearly successful in restraining all the race of government architects from muddling with the job of beautifying the city. During the dark ages of architecture in the United States, when clever gradutes from the carpenter's bench and the wood-turner's lathe dispensed architecture for the benefit of the public and dotted the country with Queen Anne and "Mary Ann" monstrosities, squandering the nation's money on buildings like the old Chicago Post-Office, for instance, kind Providence restrained their vandal hands from tampering with the national Capitol, and so the city's plan remains to-day, as far as the government buildings are concerned, almost untouched from the hand of L'Enfant.

The Washington Terminal is only one of a series of great railway stations that are to be built in the United States. The terminals of the Pennsylvania Railroad and the New York Central in New York City are to be colossal structures. Another great New York terminal, although possibly of lesser magnitude, is that of the Lackawanna Railroad at Hoboken. Cleveland is to have a great station, and Buffalo nd Chicgo, to supply the fast-growing needs of the country.

The site of the Washington Terminal is very close to the national Capitol, the front of the building facing up Delaware av directly toward the northwest corner of the Capitol. The grade of the locality where the station stands is to be raised about thirty-five feet, the job of filling along being rather a big one, requiring some two million yards of new material, the raised area covering many acres.

The new Terminal is less than the Capitol in one dimension only, that of height, but viewed from the northeast, it is the dome alone that surpasses it in height. In the dimensions of length and breadth it exceeds the Capitol, the station's length being 760 ft. as against the Capitol's 746 ft. 6½ ins., and its breadth being 343 ft. 9 ins. as against the Capitol's 270 ft. 10 ins.

Few who read the papers or magazines are unfamiliar with the appearance of the Washington Terminal. The building is a sort of grand triumphal archway, inspired by the triumphal arches of Rome.

The central pavilion has three arches, each 50 ft. high, leading into the main waiting room, and the end pavilions are single arches 40 feet high, which are intended as carriage entrances. The one toward the east is for official use and leads to the suite of apartments exclusively for the President and the guests of the nation; the one toward the west is for the public and gives immediate access to the ticket lobby.

* * * *

The Washington Station will have no large span train-shed, as it has been found that great sheds have not justified their enormous cost. They are always dark, dirty and leaky, and in winter afford small protection from the cold. In this particular case an enormous train shed so near the Capitol was regarded as tending to dwarf the dome of what must remain the most notable building in Washington. Instead of the train-shed there will be umbrella sheds covering each platform and wide enough to overlap the trains and furnish protection from the weather.

The cost of the entire improvement will be about $14,000,000, including track rearrangement, the building of the new plaza and the establishment of the new streets.

The exterior of the station is to be of white granite from Bethel, Vermont. This material has an interesting story connected with it. It had previously been used in but few buildings, although it lies in limitless quantities in a hill back of Bethel. The owner of the quarry or property on which the quarry has been made, was a crank of the deepest dye, who, because his only son was killed in a railroad crossing accident near the town, swore a solemn oath that as long as he lived the material should never be used except for tombstones; and so it remained until his death, when the property passed into the hands of those who undertook the work of introducing it as a building material.

It required some considerable boldness on the part of the architect, as well as a good brand of confidence in that architect on the part of his client, to choose an untried material for so great and important a building as the station, but the whiteness of the granite fitted in with the color of the architect's dream, and now that the dazzling, creamy white blocks are beginning to show and give promise for the finished work, it simply scores another success for the men who dare and do.

* * * *

If anyone will stop and think of the time it has taken to build any of the great structures that have come within his own ken, he will appreciate what it means to build a building larger than the National Capitol in three years' time.

Some of the Old World buildings not as great have taken centuries. Our own great buildings, like the Capitol, for instance, have often taken generations to build, and in the case of great structures at the present day we know full well of many a building like the Chicago Post Office, which has been a-building now for eight years, and, as I believe, is not finished yet.

But modern conditions demand modern methods, and to-day the building constructor must make as much speed as the public convenience, if no other consideration, demands.

The man who made two blades of grass grow where one grew before was not one of your conservative mossbacks who are contented to let well enough alone. Else he had never been immortalized. The call of to-day is, make more blades of grass grow, not two but twenty, not twenty but a hundred. Study the problem scientifically. Plan your work as a general would plan his campaign. It must all be mapped out in imagination, just as battles are fought on paper beforehand. The winning general is the one who knows best the ground of the battle field and where the reserves should be located beforehand.

The modern constructor must plan his work to the very end; he must know when his foundations will be finished ready for the superstructure, and the parts of the superstructure made up of a dozen divisions each composed of a thousand, nay, ten million units, must all be prepared in advance at their several points of production, whether it be your granite away up in the green hills of Vermont or your steel in Pennsylvania's smoky furnaces. A dozen army corps must be organized and provisioned and drilled and held in readiness to throw into the breach at the proper juncture. And the well-managed campaign produces results so different, so new, so magical, so astounding, if you but knew, that it is no wonder the enthusiasm of the brain and soul of the man who plans it. Not all the difficulties, the risks, the obstacles placed in one's path by those who love the rut, not the dire threat of the walking delegate can quench for one instant the fire that inspires the master builder.

And so we see great buildings rise like magic, over night, steel on steel and stone on stone, as imperishable as the pyramids, though they took a thousand years to build instead of a thousand days.

# THE REALM OF BUILDING

## Prospective Building.

The following is a list of building enterprises for New York City that may be expected within the year 1906. For some, plans are now under way; for others, no architects have yet been selected; and in some cases the sites have not been secured. The first name is the owner's; the second, that of the architect; the third, the contractor's; the date is the date of announcement in the Record and Guide.

## Building Operations.

### New Apartments for Amsterdam Av. Block.

AMSTERDAM AV.—Maximilian Zipkes, 147 4th av, is preparing plans and specifications for a row of new apartment houses to occupy the block front on Amsterdam av, 176th-177th sts, which will be improved with two 40-ft corners, and three 40-ft inside houses, 6 stories, to be finished in a high-class manner, with all modern improvements, at a cost of $250,000. The Fleischmann Realty & Construction Co. will be the owners.

### Eleven-Story Loft Building for Twentieth St.

20TH ST.—Frederick C. Zobel, 24-26 East 21st st, is preparing plans for the erection of an 11-sty fireproof, steel frame loft and office building, 50x92 ft., which he will erect at Nos. 32-34 West 20th st. The structure will contain concrete floor arches, elevator, steam heat, brick, stone and terra cotta front, plumbing fixtures, oak trim, marble and tiling, composition roof, and all up-to-date improvements. No contracts have yet been awarded.

### An Improvement of Five Flats for Sherman Av.

SHERMAN AV.—The Hanover Realty & Construction Co., 55 Broadway, will soon erect five 5-sty and basement apartment houses, on plot 200x150 ft, recently purchased by them, on the northwest side of Sherman av, 100 ft southwest of Academy st. Each house will be 40 ft front by 138 ft deep. The fronts will be of limestone, light brick, terra cotta, with hardwood trim, open nickle plumbing, hot water supply, steam heat, marble, tile work, and plastic slate roofs, etc. Total estimated cost about $238,000. Louis C. Maurer, 22 East 21st st, the company's architect, will have plans ready for estimating about Jan. 3d.

### Chas. T. Wills To Rebuild Central R. R. Ferry Terminal.

FOOT 22D ST.—The general contract for the rebuilding of the ferry-slip and passenger station, for the Central Railroad of New Jersey, near the foot of West 22d st, recently destroyed by fire, has been awarded to Chas. T. Wills, of No. 156 5th av. The general design and construction will be about an exact duplication of the burned building, two stories in height, and 86x300 feet in size. Work will be begun at once, under the supervision of C. J. Osgood, chief engineer, for the company. Plans for the new slip and station for the Delaware, Lackawanna & Western, are being prepared by Kenneth M. Murchison, of No. 5 West 31st st. For further building particulars see issue of Dec. 23, 1905.

### Plans for the Brunswick Site.

5TH AV.—At a meeting of the Brunswick Site Co., held on Saturday, Dec. 23d, it was officially decided that Francis H. Kimball, of 71 Broadway, and Harry E. Donnell, of No. 3 West 29th st, will be associated as architects for the new office and store structure to be erected on the east block front, in 5th av, between 26th and 27th sts, upon the site of the old Brunswick Hotel. The new building will cover the entire plot, 197.6x130, about 31,106 sq. ft. It will be twelve stories in height, and cost approximately $1,000,000. This action was taken by the Brunswick Site Co., of which Mr. Robinson, of the Gorham Company, 5th av and 36th st, is vice-president, after a long postponement, of the new 20-sty hotel plans which were drawn to be erected on the site. It is said that operations are to be begun at once, but no contract has yet been awarded.

### The Adams Express Company's New Building will be a Skyscraper.

BROADWAY.—A notable addition to the colony of skyscrapers now to be found on the lower portion of the Island of Manhattan will be the coming new office and express building to be erected in lower Broadway for the Adams Express Company. The company already own Nos. 59 to 63 Broadway, a frontage in both Broadway and Trinity pl, of 72.6 ft and a depth of 207.4, and it is understood that additional property will be purchased adjoining. The exact size and number of stories therefore cannot be given yet, although it can be stated that the building will compare with the new United States Express Building in height, equipment and construction.

When interviewed by a Record and Guide representative, it was said that no definite plans or architect have yet been selected. The Adams Land and Building Company was incorporated on Tuesday of this week, with a capital of $6,000,000. Directors are Levi C. Weir, Basil W. Rowe, Charles Steele, Carl A. De Gresdorf, Henry Farmer, Jr., H. Starr Giddings, and Edward B. Bruce.

## BUILDING NOTES

A bull New Year.

Did you get your's this year?

Generally speaking, 1905 was a year of peace.

The best ever for contractors and supply houses.

Richard E. Hennigham, building contractor, has changed his office from Court Square, Brooklyn, to No. 1 Madison av, New York.

The Philadelphia Subway was opened for public inspection on

THIS illustrates the Power House of the Metropolitan Railway Company, at 96th Street and East River, New York City. It is considered, both from architectural and mechanical standpoints, one of the best examples of its class of building in this country. Among the several highly commendable features of this structure, the Architectural Iron Work, including window frames and sashes, stairs, railings, etc., all manufactured and installed by the **Hecla Iron Works,** stand out boldly as master specimens of mechanical handiwork.

**The Hecla Iron Works are recognized as the first and foremost concern in the manufacture of Architectural Metal Work in the World. The plant is the largest and most complete, and the quality of its work is considered the standard, the world over.**

North 10th, 11th and 12th Sts., from Wythe Ave. to Berry St., Brooklyn, N. Y.

the 17th inst. The tracks are laid in a solid bed of concrete. The walls and ceiling are also of concrete.

A general strike of housesmiths to enforce a demand for higher wages, is set for next Tuesday. Several months ago the Iron League was notified that an increase would be expected on January 1st, a notification which comes as regularly as the year rolls around; but recently the Housesmiths' Unions were expelled from the Arbitration Board for violating their agreement, and all negotiations, as between organizations, were broken off. Housesmiths now receive $4.50 a day, and the new demand is for $5. This general strike will be a separate and distinct matter from the strike against the firm of Post & McCord, individually, and will virtually be a test of the employers' ability to enforce the system of open shop which they have declared for the trade. Independent as well as associated firms of iron contractors will have their jobs "struck" if they refuse the advance in wages, and on the other hand, the jobs of any firm acceding to the terms will be manned. A statement from the employers will be found elsewhere in this paper. The trade has more work on hand at present than for a long time past. In the spring of 1905 only about one-quarter of the housesmiths in the section were working.

### South Brooklyn Building.

All through this year South Brooklyn was a region where activity in real estate and building was remarkably pronounced in the various departments. Everything rentable was taken, and with regret hundreds of inquiring families were unable to find rooms. But since the advent of December many dwellings have been finished and remain unoccupied, and hundreds more, which are now in course of construction, will be ready in the spring. At the present time the construction work is principally along and near Sixth av, and generally is of a quality superior to what has gone before. Two particular rows of brownstone front, two-family dwellings on the avenue are exceedingly commodious and substantial.

The trouble with most two-family houses, that are set in solid rows, is that the bedroom space is inadequate, through trying to crowd too many houses on a plot. They are occupied when there is nothing better to be had and vacated as soon as there is. If families were more comfortable than cramped quarters permit, there would be less moving about, and consequently a steadier income from property and fewer repairs to make. It is noticeable that South Brooklyn attracts a large share of the people who move to Greater New York from other American cities. In the spring there will be thousands of floors to rent, but owners are confident that all will be taken.

### Needs Many Houses.

George O. Fowler, real estate agent of Whitestone, has received an urgent letter from officials of the Long Island Railroad requesting him to provide houses that can be rented from $12 to $15 a month in Whitestone to accommodate the families of between 150 and 200 workmen. The letter asks Mr. Fowler either to build these houses himself or to have some local builder to do it. Mr. Fowler is now negotiating to carry out the request.

The request is made at this time because the Aluminum Metal Manufacturing Company has moved its plant from Newark, N. J., to Whitestone.

# ANNOUNCEMENT

## The "Record and Guide" Bureau of Information

On the first day of January, 1906, the "Record and Guide" will commence to issue a special *Real Estate Information Service* to all Persons who may Subscribe for the same.

This Service has been established at the request of a Number of the Leading Real Estate Brokers and Financial Institutions in this City, who to-day are unable to obtain really Prompt, Accurate, and Special real estate information.

The Management of the "Record and Guide" have very carefully investigated the Existing Needs of the Public and the real estate service, which the "Record and Guide" has organized, has been devised with an especial view to Actual Requirements.

By means of a Subscription to the "Record and Guide" *Bureau of Information*, Brokers and Others may equip their offices with a Complete Service of Real Estate Information at a cost of less than *Three Dollars* ($3.00) *a week*. For this amount, they will be supplied with the "Record and Guide Quarterly" (improved), the Names and Addresses of Property Owners, full use of the *Bureau of Information*, a weekly service for Index purposes of *Conveyances* with Names of Grantees and their Addresses, a weekly service concerning *Mortgages*, a weekly service of information contained in *Wills* so far as same relate to real estate, and *other matters of importance.*

The information supplied will be Full, Accurate, and Prompt. Arrangements have been made to avoid Unnecessary Delay of even an hour. The Service, moreover, has been rendered so Flexible that it is believed it will meet the Requirements of *all offices* and of *any system* that may now be in use.

The "Record and Guide" *service* has been so Devised that it necessitates a Minimum Amount of Space, a Minimum Amount of Filing, a Minimum Amount of Reference, and does away completely with any possibility of a Huge Accumulation of reference cards.

*Start the new year with a first-class Information Equipment. A postal card will bring a representative to see you.*

**Activity in the Dyckman Section.**

10TH AV.—The holdings of the Patten estate and George F. Johnson & Sons, comprising about 150 lots just north of Sherman Creek, have been sold to a client of Richard Alexander. L. J. Phillips & Co. represented the Messrs. Johnson in the transaction. The properties sold include most of the block bounded by 10th and Nagle avs, Hawthorne and Academy sts; the entire water front on the Harlem River, between 202d and 206th sts, and twenty-two lots in the block bounded by 9th and 10th avs, 204th and 205th sts. The property controls a water frontage of over 1,000 feet on the Harlem River. Considering the fact that there are left only about twelve blocks of water front available for commercial purposes north of 155th st, the importance of the transaction is evident. The same buyer has also purchased, through David Stewart from Thomas G. and Walter R. Patten and Jacob Hirsch the block bounded by 9th av, the Harlem River, 203d and 204th sts; and also the water front portion of the two blocks to the north of this one.

## Record and Guide Quarterly

The annual number of the Record and Guide Quarterly contains all the legal records for the past year concerning real estate and projected buildings, arranged alphabetically and numerically, with invaluable annotations. These are supplemented by tables of important transactions, with typical prices, covering the past quarter of a century or more, accompanied by expert comments; also by a list of realty corporations created during the past two years, with officers and the enterprises in which they are engaged. The whole makes a volume of reference which no real estate man can afford to be without. It should be on every desk and in every library. Its cost is as nothing compared to its value as a time-saver. This important work can be obtained, with three quarterly numbers, for the comparatively small sum of $20. It is published by the Record and Guide, at Nos. 14 and 16 Vesey St., where interested parties may see it and have its uses explained to them. If you cannot call, drop a postal card to the Publisher, or call him up on telephone 3157 Cortlandt.

## THE REAL ESTATE DIRECTORY FOR 1906

Every system must have a foundation. The Directory is our foundation. It is a most concise and prompt method of locating property owners. The names and addresses will be in a book on your desk, and inquiry of us is only necessary in case of error and removal. These are a small percentage of the addresses a real estate man wants in a day.

**IT STANDS TO REASON**

That in the year past which we have furnished information to every REAL ESTATE office in Manhattan, that every address has been verified and corrected. The 1906 Directory will show the result of this work.

**OUR ALPHABETICAL LIST**

Is the only thing of its kind in existence, and its use has proved most valuable in getting in property for sale or getting information regarding buyers.

**BEGIN TO CHECK UP YOUR DIRECTORY AT ONCE, WE WILL SEND YOU A SUPPLEMENT TO DO IT WITH**

May 1st next, to George Nash & Co. Including taxes and other charges paid by the tenant, the aggregate rental is about $50,000. The same brokers recently sold this property for the Wilkens estate.

The firm of Hopton & Weeks has been dissolved by mutual consent. Mr. Harry W. Hopton continues the real estate brokerage business at 150 Broadway, corner Liberty st, telephone 6,988-6,989 Cortlandt. Mr. Hedley R. Weeks continues the real estate brokerage business at 55 Liberty st, telephone 4,536 Cortlandt.

The old established real estate firm of James Kyle & Sons, who for more than thirty years had their offices at No. 610 Third av, moved this week to new quarters at the southeast corner of 57th st and Lexington av, where they are now occupying the entire first floor. This firm have for many years successfully managed property entrusted to their care, and largely on the upper East Side.

At the Kings County Register's office, 11,854 mortgages were handled up to the close of business December 23, which exceeded the number handled by any other county. From the mortgage tax the gross amount collected in Kings County, to the foregoing date, was $94,603.93, and the cost of the collecting $3,608.77, leaving a net income of $90,995.16. From July 1 to Dec. 23, inclusive, New York County handled some three thousand fewer mortgages than Kings.

The Board of Estimate proposes to lay out a public park lying on the westerly side of Convent av, between West 142d and West 143d sts, and extending 170 feet westwardly, in the Borough of Manhattan; and a hearing is set for January 12. The object of acquiring this park is mainly sentimental, and is designed to create a permanent memorial to Alexander Hamilton by the acquisition of a portion of his property and the removal thereto of his former residence. It is suggested that the Hamilton house could be secured and removed to St. Nicholas Park, only two blocks distant from the land which it is proposed to purchase, the site in St. Nicholas Park being considered by them much more eligible. The report of the Engineer of Street Openings of the Borough of Manhattan also makes the same suggestion. It is stated, on the other hand, that the plot which it is proposed to acquire contains the famous thirteen trees planted by Alexander Hamilton, but these have nearly all disappeared and there remain only a few trunks, almost if not quite dead, so that the preservation of the trees is out of the question.

Regarding a picture of the Croquet Shelter in Prospect Park, Brooklyn, printed in this paper last week and designated a "marble shelter," it may be added that the shafts of the columns in the arcade and the corner piers being marble, the rest of the structure is of dull enameled terra cotta furnished by the Atlantic Terra Cotta Co., of 287 4th av, New York City.

## The Future of Queens.

AS IT SEEMS TO SOME OF ITS CITIZENS.

William A. De Grott (Assemblyman)—"Any portion of Queens is nearer the business centre of Manhattan than is Richmond or The Bronx, and the coming tunnel will make it still nearer. The movements of real estate are pointers tending to show the progress of the territory. In acreage I have seen the prices jump within a few weeks in an almost incredible manner. For instance, a sale was pending involving land valued at about $85,000. The parties were some $2,500 apart from an agreement. The sale was declared off, and the owner sold the land at auction, making a clear profit of $55,000. The influx of people at a rate so rapid that it is well nigh impossible to build homes for them is responsible for such a thing. It was but a few short years ago that every farmer driving along between Jamaica and Hempstead knew and greeted every person he met. Now we scarcely know our neighbors, for they grow up like mushrooms over night."

Colonel W. M. Griffith—"Four years hence we shall be able to take a train every ten minutes which will whisk us to Manhattan or anywhere else we wish to go at lightning speed. No prophet can foresee all that will happen during the coming four years, but it is safe to prophesy wonderful things for Queens. Every year New York adds to her population a Rochester, every two years a Buffalo, every five years a Boston, even ten years a Chicago at the present ratio of increase. Those people must have homes. They cannot live in Manhattan. This is the section they most naturally seek as affording ground for homes with a bit of green grass in front and at the sides."

## CONVEYANCES

**Whenever the letters Q. C., C. a. G. and B. & S. occur, preceded by the name of the grantee, they mean as follows:**

**1st.—Q. C. is an abbreviation for Quit Claim deed, i. e., a deed wherein all the right, title and interest of the grantor is conveyed, omitting all covenants and warranty.**

**2d.—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or encumbered.**

**3d.—B. & S. is an abbreviation for Baragain and Sale deed, wherein, although the seller makes no expressed consideration, and thus impliedly claims to be the owner of it. The street or avenue numbers given in these lists are, in all cases, taken from the insurance maps when they are not mentioned in the deeds. The numbers, it will occasionally be found, do not correspond with the existing ones, owing to there having been no official designation made of them by the Department of Public Works.**

**4th.—The first date is the date the deed was drawn. The second date is the date of filing same. When both dates are the same, only one is given.**

**5th.—The figures in each conveyance, thus, 2:482—10, denote that the property mentioned is in section 2, block 482, lot 10.**

**6th.—It should also be noted in section and block numbers that the instrument as filed is strictly followed.**

**7th.—A $20,000—$30,000 indicates the assessed value of the property, the first figures being for the lot only, and the second figures representing both lot and building. Letter P before 2d figure indicates that the property is assessed as in course of construction.**
